AGRICULTURAL SECTION

WEEKLY REPORT

December 31, 1943 - January 6, 1944

AGRICULTURE

Crops:

This week no field activity has taken place in the fields.

Pickling operations:

This week with the arrival of additional Aji-no-moto and other ingredients that go into the finished pickle have speeded up the transferring from vats to small barrels for immediate delivery to messhalls.

It is anticipated to pickle additional turnips next week.

Livestock area:

During the week, straw has been hauled to the livestock area from nearby districts and two carloads of oats and barley and 2 carloads of processed chicken feed were received.

Crops stored in the root cellar:

Please see attached sheet.

LIVESTOCK

Hogs:

	<u>Last Week</u>	<u>Purchased or Farrowed</u>	<u>Slaughtered</u>	<u>Died</u>	<u>Balance This Week</u>
Feeders	727	0	15	* 2	710

Average live weight of slaughtered hogs - 224.6.

\*Death loss.

1 - 160 pound pig due to pig scours.

1 - 120 pound pig due from prolonged chronic dysentery.

Poultry:

	<u>Last Week</u>	<u>Purchased</u>	<u>Death</u>	<u>Balance this Week</u>
Laying Hens	4,090	0	21	4,069
Pullets	4,293	0	15	4,278
Chicks	3,601	0	11	3,590
	<u>11,984</u>	<u>0</u>	<u>47</u>	<u>11,937</u>

Note: These chickens died of natural causes.

Egg Production:

Month of September	348 Dozens
Month of October	1,410 Dozens
Month of November	180 Dozens
Month of December	2,070 Dozens
This Week	<u>1,140 Dozens</u>

TOTAL TO DATE            5,148 Dozens

Again, this week egg production has shown an increase in spite of cold weather, indicating the winterizing program on the poultry houses was effective.

CROPS	Total Produced To Date	Total Transferred To Commissary This Week	Balance in Storage	Total Storage Loss To Date	Causes of Loss
Beet, Table	29,862	0	0	4,921	Shrinkage and over-estimated.

Note: \* Shipped to Jerome, Arkansas.

AGRICULTURAL SECTION

WEEKLY REPORT

January 14, 1944 - January 20, 1944

AGRICULTURE:

Pickling Operations:

This week 9,720 pounds of carrots were pickled. Although, this is the first attempt at pickling carrots the product is said to be delicious. In a few days additional cabbage will be pickled.

Livestock area:

Approximately 32 tons of straw has been baled and hauled to our livestock area from Clark's Fork. An additional 40 ton has been baled and awaits hauling. Baling will continue for some time.

Crops Stored in the Root Cellar:

Please see attached sheet.

LIVESTOCK:

AGRICULTURAL SECTION

WEEKLY REPORT

January 21, 1944 - January 27, 1944

AGRICULTURE:

Pickling operations:

During the week 7,003 pounds of cabbage were pickled. This is the first attempt to pickle such a large quantity. Pickling of cabbage in a very small scale has been going on in the Mess halls.

Livestock area:

Baling of straw has been temporarily interrupted due to bad weather conditions. Baling operations will be resumed as weather clears.

Thrashing beans:

A few beans were thrashed during the week but due to poor weather conditions it will be temporarily postponed.

Crops stored in the Root Cellar:

Please see attached sheet.

LIVESTOCK:

Hogs:

	<u>Last Week</u>	<u>Purchased or Farrowed</u>	<u>Slaughtered</u>	<u>Died</u>	<u>Balance This Week</u>
Feeder	784	124	0	1	907

Death caused by swine flu with pneumonia.

Poultry:

	<u>Last Week</u>	<u>Purchased</u>	<u>Death</u>	<u>Balance this Week</u>

AGRICULTURAL SECTION

WEEKLY REPORT

January 28 - February 3, 1944

AGRICULTURE:

Thrashing Beans:

A few beans were thrashed during the week. It is hoped that this work will be completed before another storm arrives.

Pickling Operations:

Third distribution of daikon pickles will be made next week to the mess halls.

Crops stored in the Root Cellar:

Please see attached sheet.

LIVESTOCK:

Livestock area:

Continued baling of straw has been going on in Clark's Fork Area. Approximately 80 tons of straw has been hauled to our livestock area to date.

Hogs:

	<u>Last Week</u>	<u>Purchased or Farrowed</u>	<u>Slaughtered</u>	<u>Died</u>	<u>Balance This Week</u>
Feeder	907	79	40	2	944

Death of two was caused by flu.

Average live weight of slaughtered pigs was 255 lbs.

Poultry:

	<u>Last Week</u>	<u>Purchased</u>	<u>Deaths</u>	<u>Balance this Week</u>
Laying Hens	8,297	0	15	8,282
Pullets and cockerels	3,571	0	6	3,565
	<u>11,868</u>	<u>0</u>	<u>21</u>	<u>11,847</u>

Poultry death was caused by fowl paralysis (leukemia).

Egg production:

Month of September (1943)	348 Dozens
Month of October	1,410 Dozens
Month of November	180 Dozens
Month of December	2,070 Dozens
Previous weeks in January	7,140 Dozens
This Week	<u>2,370 Dozens</u>

Total To Date 13,518 Dozens

Egg production topped previous week by 150 dozens.  
During the week 4,067 eggs have been gathered each day.

MISCELLANEOUS INFORMATION:

1,000 sacks of certified seed potatoes have been received by the Agriculture Section for this year's planting.

Crops	Total Produced To Date	Total Transferred to Commissary This Week	Balance In Storage	Total Storage Loss To Date	Cause of Loss
Cabbage	69,402	3,430	1,567	3,000	Shrinkage & trimmings.
Carrots	271,527	*50,040 3,760	76,033	20,700	Shrinkage & loss.
Onion, Green	43,597	0	18,960	?	Frozen in hot-beds. Extent of loss undeter- mined.

\*Shipped to Poston Relocation Center.

AGRICULTURAL SECTION

WEEKLY REPORT

February 4 - February 10, 1944

AGRICULTURE

Thrashing Beans:

There were no beans thrashed during the week due to mechanical breakdowns and poor weather conditions.

Hot-Bed Preparations:

One hot-bed space has been excavated in preparation for putting in fresh manure for early date seeding of early cabbage.

Pickling Operations:

This week's work consisted of transferring pickles from large vats to small barrels for later delivery to messhalls.

Crops stored in the Root Cellar:

Please see attached sheet.

LIVESTOCK:

Livestock Area:

Continued baling of straw has been going on in the Clark's Fork Area. Also hauling of baled straw to our livestock area.

Hogs:

	<u>Last Week</u>	<u>Purchased</u>	<u>Slaughtered</u>	<u>Death</u>	<u>Balance This Week</u>
Feeders	944	8	40	1	911

Average live weight of slaughtered hogs 242.5.  
Death caused by foreign matter in stomach.

Poultry:

	<u>Last Week</u>	<u>Purchased</u>	<u>Deaths</u>	<u>Balance This Week</u>
Laying Hens	8,282	0	( 16 (* 696)	7570
Pullets and cockerals	3,565	0	26	3539
	<u>11,847</u>	<u>0</u>	<u>738</u>	<u>11,109</u>

\* Up to the present date there has been no actual count of balance of laying hens on hand except book count. It has been noticed in many instances that death losses were not reported to us since at first the crews who worked on shifts did not record death losses accurately; therefore, it was necessary to report these losses at the present time.

Other deaths were caused by range paralysis or leukemia

Egg Production:

Month of September (1943)	348 Dozens
Month of October	1,410 Dozens
Month of November	180 Dozens
Month of December	2,070 Dozens
Previous weeks in January	7,140 Dozens
Previous week in February	2,370 Dozens
This week	<u>Y 2,580 Dozens</u>
	16,098 Dozens

Again, this week's egg production topped previous week by 210 Dozens. It is hoped that in the near future 5,000 eggs per day may be laid.

AGRICULTURAL SECTION

WEEKLY REPORT

February 18, 1944 - February 24, 1944

AGRICULTURE

Thrashing Beans:

Again this week bean thrashing was temporarily interrupted due to a mechanical breakdown. It is expected that a few more days will complete the thrashing of the beans including the High School's beans.

Hot bed preparations:

Construction of one 6 x 100 foot hot bed has started this week by the Engineering Department. This bed will provide enough space for our transplants. Hot bed seeding will begin the first of March.

Crops stored in the Root Cellar:

Please see attached sheet.

LIVESTOCK

Livestock area:

During the week alfalfa hay was being baled. Upon completion of baling the crew moved to bale additional straw near the Project area.

Cattle:

Received From Granada	Slaughtered	Death loss	Balance This Week
30	8	0	22

Average liveweight 739.

Hogs:

Average Dressed weight 428.

	Last Week	Purchased	Slaughtered	Death	Balance This Week
Feeders	871	0	40	0	831

Average liveweight 243 lbs.

Average dressed weight 185.2 lbs.

Poultry:

Death loss of Chicks: House #1 ..... 100  
House #4 ..... 390 This death loss is the total  
since receipt of shipment, March 8, 1944

Egg Production:

Month of September (1943)	348 dozen
Month of October	1410
Month of November	180
Month of December	2070
Month of January (1944)	7140
Month of February	8580
Previous Week in March	5250
This week	2460
	<hr/>
	27,438

Saturday, March 11th's egg report surpassed the all season single day record with 4,883 eggs. Production for the week was at the rate of 58.22. This percentage is lower than last week's for the simple reason that we have added another flock which is just beginning to lay.

<u>Crops</u>	<u>Total Produced To date</u>	<u>Total Transferred to Commissary this Week</u>	<u>Balance in Total Storage</u>	<u>Loss to date</u>	<u>Causes of loss</u>
Carrots	271,527	4,800	35,430	31,183	Spoilage & shrinkage
Onion, Green	43,597	0	9,400	9,560	Spoilage occurred while in hotbed storage
Potatoes	516,500	27,090	73,920 seed potato	13,450	Shrinkage, spoilage and dirt
Rutabagas	62,092	2,600	5,600	12,418	Shrinkage, spoilage and dirt

Note: All of our Bliss Triumph potatoes have been transferred to Commissary. Balance in storage are the potatoes for seed.

Weekly Report

March 17, to March 23  
1944

*Deft*

AGRICULTURE:

Field Operations:

The first field work of spreading our livestock manure was to begin on March 23, but inclement weather has prevented us from continuing this operation.

Hotbed

This week additional seeding took place in the hotbeds. The following varieties were seeded during the week: Tomatoes, Egg Plants, and Peppers.

Cabbage, Cauliflower and Broccoli plants have germinated and are looking fine.

Crops stored in the Root Cellar:

See attached sheet.

LIVESTOCK:

Hogs:

<u>Last Week</u>	<u>Purchased</u>	<u>Slaughtered</u>	<u>Death</u>	<u>Balance This Week</u>
1027	0	40	* 2	985

\* Death losses are as follows:

1 - 90# infection in the leg  
1 - 110# infection in the leg

Average liveweight 254.7#  
Average dressed weight 205.1#

Poultry:

	<u>Last Week</u>	<u>Purchased This Week</u>	<u>Slaughtered</u>	<u>Death</u>	<u>Balance This Week</u>
Laying Hens	7,409	0	0	29	7,380
Pullets & Cockerels	3,471	0	0	37	3,434
Chicks	4,720	0	0	145	4,575
	<u>15,600</u>	<u>0</u>	<u>0</u>	<u>211</u>	<u>15,389</u>

Death loss is contributed to range paralysis in the laying and young pullet flock. The death loss among the young chicks resulted mostly from colds.

Agriculture Section  
Weekly Report

April 14, to April 20, 1944

AGRICULTURE

Field Operations:

During the week, the Agricultural Section has obtained rental on two Cletrac 55 from Missoula Forestry Service. This has greatly speeded up the plowing and discing program to meet our planting schedule.

Finer seed-bed preparations have been done with the smaller tractors.

To date, we have planted 35.3 acres. They are as follows:

Onion, Southport White	2.53 Acres
" Yellow Sweet Spanish	6.88 "
" Early Grano	3.00 "
" Yellow Denver	6.04 "
Garlic	1.83 "
Table Peas	5.00 "
Canning Peas	10.00 "
	<hr/>
	35.28 Acres

Crop Protection Program:

The engineering section is completing about 12 miles of barb wire fence to protect our fields from range cattle.

Hot-bed Program:

Hot-bed plants are growing fine. The plants look healthy and sturdy. No damping-off or diseases have affected our plants to date. At the present time transplanting of tomato seedlings are going on.

Crops Stored in the Root Cellar:

Please see attached sheet.

All carrots remained from the 1943 crop were delivered this week.

Part of the 1943 gobo crop was left unharvested due to frozen ground. This was dug and delivered to the Commissary Section during the past week.

Heart Mountain Relocation Center  
Heart Mountain, Wyoming

Agriculture Section  
Weekly Report

April 28, to May 4, 1944

AGRICULTURE

Field Operation:

During the week we have been very busy plowing, discing, leveling, and preparing seed-beds.

All large tractors have been operating on a double eight hour shifts while smaller tractors operated the regular eight hour shifts.

We have been able to follow our planned planting schedule for mostly all vegetable crops. The seeding of grain crops have been delayed somewhat due to wet and heavy soil condition during the early part of the week. During latter part of the week it has dried out sufficiently and now much equipment is being concentrated upon grain seeding and weather permitting, we should be able to catch up with our schedule shortly.

This week's planting are as follows:

Swiss Chard	1.00	Acre
Radish (White Icicle)	.83	"
Grain	25.00	"
	<hr/>	
	26.83	Acres

Hot-bed Program:

Transplanting of all seedlings is nearly complete. All hot-bed plants are looking fine.

Crop Harvested:

<u>Crops</u>	<u>Total Produced</u>	<u>Transferred to Commissary</u>	<u>Balance</u>
Gobo	8320	8320	0
Green Onions	3360	3360	0

Gobo and Green Onions were harvested during the week and delivered to the Commissary Section. These crops over-wintered from last year's late plantings which at one time was thought a complete loss are our early produce today.

LIVESTOCKHog:

Agriculture Section  
Weekly Report

May 5, to May 11, 1944

AGRICULTURE

Field Operations:

During the week we have made good progress in the way of plowing, discing, and leveling although we have faced some breakdown on three of the crawlers.

Seed-beds for major plantings are now being prepared to plant the following crops; lettuce, mustard, canning peas, table peas, dry beans, china peas, sweet corn, canning corn, cabbage, cauliflower, broccoli, potatoes, pop corn, tomatoes, watermelon, cantaloupe, green onion, cucumber, shiro uri, summer squash, winter squash, egg-plants, peppers, and grain.

This week's plantings are as follows:

<u>Variety</u>	<u>Approximate Acres</u>
Shingiku	.83
Parsley	.60
Spinach	2.00
Red Radish	1.00
Shogoin	2.00
Grain	60.00
Total	66.43 Acres

Seeding of cucumber and cantaloupe under hot-caps took place during the week.

Hot-bed Program:

All transplanting work in the hot-beds have been completed this week.

Labor Condition:

This season we are facing a very rapid turnover in more skilled labor positions as a result of selective service, and relocation. This is particularly true of tractor operators and foremans.

Crops Harvested:

<u>Crop</u>	<u>Total Harvested To Date</u>	<u>Harvested This Week</u>	<u>Transferred to Commissary This Week</u>	<u>Balance in Storage</u>

AGRICULTURE

Field Operation:

During early part of the week we have made good progress in the way of discing, leveling, and planting. The crawlers that are under repair will be in operation early next week, it was stated.

Thursday's .54 of an inch rainfall has stopped all field operations. This rain will be of a great benefit to the crops already planted, but it will delay our plantings of other crops for several days or more.

This week's plantings are as follows:

<u>Variety</u>	<u>Approximate Acres</u>
Cucumber	6
Cantaloupes	11
Watermelons	6
Table peas	11
Oats	73
Corn, Canning	20
Beans, Canning	15
Squash	4
	<u>146 Acres</u>

Hot-bed Program:

Cabbage, broccoli, cauliflower, tomato, and cucumber plants are ready to be set out in the fields next week.

Labor Condition:

At the present time on the truck crops and grain program we have 126 men and women employed.

We are continually facing a very rapid turnover in more skilled labor positions as a result of Selective Service and relocation.

Weekly Report

May 19, to May 25, 1944

AGRICULTURE

Field Operation:

During the week, good weather has permitted us to cover a large area of seed-bed preparation.

Double shifts on tractor operation have been continuing all through the week. The work consisted of discing, leveling, and planting.

The week's planting are as follows:

<u>Variety</u>	<u>Approximate Acreage</u>
Oats with Clover	152.0
Table Peas	11.0
Canning Peas	11.0
Canning Corn	20.4
Cantaloupe	4.4
Watermelon	.29
Squash	9.64
Green Onion	2.2
Shiro-Uri	6.61
Pop Corn	1.52
Swiss Chard	2.14
Shogoin	2.1
Red Radish	1.0
Spinach	2.47
Cabbage	1.5
Shingiku	.5
Parsley	.45
Mustard	.6
Chinese Cabbage	1.02
Loose Lettuce	1.20
Lettuce 615	1.97
Sweet Corn	20.0

Total Acres . . 254.01

Hot-bed Program:

Hot-bed grown "wakefield" cabbage has been transplanted to the field Friday, May 26. Other hot-bed plants will be set out in the fields as soon as possible.

Labor Condition:

We are continuously facing a very rapid turnover in all labor positions including livestock workers as a result of Selective Service, Relocation, and Outside Employment.

At the present time we have 136 men and women employed in our Agricultural fields.

Crops Harvested:

AGRICULTURE

Field Operation:

During the week good weather prevailed which permitted us to cover a large area of seed-bed preparation.

Double shifts on large equipments have been continuing all through the week. The work consisted of discing, leveling, and some planting.

AGRICULTURE

Field Operations:

During the week, intermittent rain has interrupted our seed bed preparation for June plantings.

All large equipments are being concentrated in turning under cover crop for our potato planting. It is hoped within a week the planting of the second field of potatoes will begin.

Agricultural Section  
Weekly Report

June 9, to June 15, 1944

AGRICULTURE

Field Operation:

During the week, heavy intermittent rain has interrupted our plowing, discing, and seed-bed preparations.

Storm Damage:

Thirty-minute hail storm which occurred June 14 has done considerable damage to our crops planted in fields A and J. Other fields have been reported in various degrees of damage from none to very slight.

The fields that were affected by this storm are our most diversified and intensively farmed fields.

Replanting program is now underway to replace some of the crops and make substitutes for others.

During this thirty minutes of hail storm a total of .58 an inch of precipitation was recorded at Heart Mountain Weather Station.

Transplanting Operation:

All transplantings of hot-bed seedlings were completed except for few broccoli seedlings.
