4. Notes:

There have been complaints by the next door neighbors that the bachelors are again making so much noise at night that they are unable to sleep. This has been going on for the past 3 months. These boys want to move into Barrack 14 by partitioning 4 rafters of the school library. The library has been complaining about not having enough room, so I dislike having it partitioned. Besides, I think it is an advantage to the children of this block if there is a school library here where they may go to study if they so desire. Unless there is more room the library will be unable to carry out its plan of having a place for a student may study in the evenings. Isn't there some solution to this problem?
