NARRATIVE REPORT:

Industries in Operation: Discuss any unusual or significant developments this month; current problems; plans for next month; production schedules; orders on hand; policy changes; problems in connection with labor, materials, tools, equipment, housing, etc., etc.

Industries in Process of Development: Present status of such industries; progress this month; problems and difficulties involved; when operations expected to begin; expected volume of production; outlets for products; number to be employed; training programs; problems of supply and equipment, etc., etc.

Canning factory equipment was located, appraised and bids submitted but authority refused from Washington office. The bids, specification and preliminary plans for a canning factory were submitted to Washington for purchase for use at another center. No action was taken.

Industries Proposed: Indicate kind of industry; facilities available; estimate number to be employed; outlet for products; suggestions and recommendations.

It is expected that a canning plant will be set up perhaps in the dining room where canning will be carried on by the home canning method using glass fruit jars which are available. It is expected that there will be tomatoes to be canned. Pickles will be prepared also from cucumbers, green tomatoes, etc.

For Month Ending August 1943

NARRATIVE REPORT:

Industries in Operation: Discuss any unusual or significant developments this month; current problems; plans for next month; production schedules; orders on hand; policy changes; problems in connection with labor, materials, tools, equipment, housing, etc., etc.

Due to extremely poor seed, faulty grills in the propagation barrels and due to the long termination of the project, the workers had lost contact with details, made factors against a good crop of bean sprouts.

Seed is being re-cleaned, new grills have been made and all faults have generally been corrected.

Industries in Process of Development: Present status of such industries; progress this month; problems and difficulties involved; when operations expected to begin; expected volume of production; outlets for products; number to be employed; training programs; problems of supply and equipment, etc., etc.

"Tofu"

In final stages of development. Building allotted but need official sanction to recruit crew to start construction.

Plan approximately 9500 servings weekly.

Need marble grinders to water grind soy beans.

Industries Proposed: Indicate kind of industry; facilities available; estimate number to be employed; outlet for products; suggestions and recommendations.

MEMORANDUM TO: Mr. Roscoe E. Bell  
Assistant Project Director

FROM: Harry Konda

SUBJECT: Monthly Summary Report

1. PERSONNEL EMPLOYED AND RELOCATION PROGRESS:

- a. Permanent - None
- b. Temporary - None
- c. Residents - 4
- d. Indefinite Leaves for this period - None
- e. Adequacy of Present Personnel - Additional 12 for contemplated "Tofu" manufacturing; 2 or 3 for ice cream project.

2. CURRENT WORK:

Bean sprout is in full production.

3. SUPPLIES AND MATERIALS NEEDED:

No comment.

4. PROBLEM AREAS:

No comment.

5. RECOMMENDATIONS OR GENERAL SUGGESTIONS:

- a. Recommend extending boilerroom of Bean Sprout plant for seed and equipment storage room. Extension of approximately 425.
- b. The laying of an additional pipe line to supplement water supply. Inadequate at present.

6. RECOMMENDATIONS OR GENERAL SUGGESTIONS:

- a. Tofu project needs approval of transfer from Garage to Hospital area to begin construction.

NARRATIVE REPORT:

Industries in Operation: Discuss any unusual or significant developments this month; current problems; plans for next month; production schedules; orders on hand; policy changes; problems in connection with labor, materials, tools, equipment, housing, etc., etc.

Subsequent developments proved that production had been low due primarily to an insufficient supply of water and poor seed. A 2 inch pipe was properly connected to the main line and the new installation, better seed and the diligence of the foreman, Mr. Tamaki, produced a bumper crop of 1680#.

Experiments are now being carried on with flat boxes 28" x 44" x 12" with the intention of replacing present barrels if production proves more satisfactory. With the spreading of seed over a wider area, faulty sprouts can more readily be detected and rotting should be held to a minimum.

Industries in Process of Development: Present status of such industries; progress this month; problems and difficulties involved; when operations expected to begin; expected volume of production; outlets for products; number to be employed; training programs; problems of supply and equipment, etc., etc.

"Tofu"

Plans are progressing rather slowly but satisfactory

Industries Proposed: Indicate kind of industry; facilities available; estimate number to be employed; outlet for products; suggestions and recommendations.
