Received on July 13, 1943 one G.M.C. Triple Combination Pumping apparatus fully equipped, from Minnesota Fire Equipment Company, Lindstrom, Minnesota. Motor No. 22888034

Serial No. 27871

Chassis No. 27871

Pump No. 4707

Manufacturers No. 2036

USA Reg. No. 505336

Also received 2000 ft. $2\frac{1}{2}$ " cotton jacket, rubber lined Fire Hose.

On July 13, 1943, a G.M.C.-500 G.P.M. pump was received and it has been impossible to place it on duty due to the shortage of men. Camp #2 and #3 are pretty well manned, but in the near future Camp #2 will be quite short due to the large number who are slated to go to Tule Lake.

The weather here is getting abit cooler and it will not be long before the heat hazard will be eliminated.

Three alarms of fire were responded to in the month of August. The loss sustained was five dollors.

An order recently issued by the Project Director, W. Wade Head regarding the removal of combustibile shades in three camps is progressing satisfactorily and in a very short time this hazard will be removed.

The extreme shortage of man power is being felt very keenly in camp #1.

NARRATIVE REPORT: Use space below to discuss or explain any unusual or significant development effecting Fire Department this month; changes in policy or procedures; explanations of items in statistical report; problems of personnel; comments on compliance with fire prevention regulations; equipment received; equipment needed; progress in eliminating fire hazards; plans for future; any other developments.

During the month of September the department has been greatly handicapped by the loss of 31 firemen through segregation who had become very valuable to the department, men who had been extensively trained in the use of the pumping apparatus, tools and equipment.

This department has had to hire men who are much older than the ones we formerly employed . The older men are willing workers but are not as active as younger men.

It is almost impossible to sell the idea that a fireman is more important to a community than a cooks helper.

Recently we had a fireman drafted from the fire department to the kitchen and no amount of talking could change their minds.

Progress has been made during the month of November 1943 by the Fire Department due to the enforcement of regulations pertaining to the control of outside burning of rubbish.

The permissible burning hours as set forth in an order that was issued by the Project Director, states that between 5:00 a.m. and 9:00 a.m. shall be the only time allowed for burning combustible rubbish.

The order has aided this Department in eliminating needless runs by the companies to investigate clouds of smoke issuing from the far corners of the camps that had been caused by persons who made bon fires without regard to the burning hours.

Upon completion of the school auditorium it was found that several safety matters had been overlooked. The projection booth was not constructed in accordance with National Fire Protection Association Standards. No Exit signs or lights had been installed, no main Auditorium central light switch had been placed in the projection booth.

A letter was forwarded to the Project Director and the Construction Department setting forth the above violations. Since that time the exit signs and lights have been installed, the projection booth is not to be used for nitro cellulose base film, the central switch in the booth has not been installed.

COLORADO RIVER RELOCATION CENTER
POSTON, ARIZONA

JANUARY 7, 1944

Mr. E. J. UTZ
CHIEF, AGRICULTURE & ENGINEERING
BARR BUILDING
WASHINGTON (25), D. C.

DEAR MR. UTZ:

OUR PROGRESS FOR THE MONTH OF DECEMBER WAS MAINTAINED TO THE SAME APPROXIMATE LEVEL AS PREVIOUS MONTH. THERE WERE NO STORM OR INCLEMENT WEATHER TO IMPEDE THE WORK; IF ANYTHING ~~IS~~, THIS CLIMATE AT THIS SEASON IS AT ITS BEST, AND WORK OUTPUT REACHES A HIGH EFFICIENCY AND PRODUCTION LEVEL.

CONTRACTUAL SERVICES FOR THE MONTH OF DECEMBER FOR THE OPERATIONS DIVISION WERE AS FOLLOWS.

1. THE ROADS DEPARTMENT CONTRACT WITH EARL WILLIAMS WAS COMPLETED DECEMBER 15. THE FINAL ESTIMATE OF THIS CONTRACT WAS 31,516 CUBIC YARDS OF MATERIAL, CONSTITUTING 63,221 CUBIC YARD MILES OF HAULING, FOR TOTAL COST OF \$23,382.28.

2. THE CONTRACT WITH J. M. S. COMPANY WAS COMPLETED DECEMBER 31, 1943, AND THE DRAINAGE CANAL IS COMPLETE WITH THE EXCEPTION OF A PORTION FOR WHICH THE NATURAL ⁵¹⁰⁰⁶⁴³ SLEWS ARE TO BE USED TEMPORARILY AS PART OF THE DRAINAGE CANAL. THE FINAL ESTIMATE ON THIS CONTRACT WAS:

EXCAVATION	820,369 CUBIC YARDS
CLEARING	17.18 MILES
SCARIFYING	7.30 MILES

TOTAL APPROVED PAYMENT \$ 79,261.87

3. CONTRACT WITH THE LEWIS CONSTRUCTION COMPANY FOR LAND LEVELING IS PROGRESSING VERY FAVORABLY, AND THEY HAVE SIX RD-8 CATERPILLAR TRACTORS AND FIVE 14 CUBIC YARD CARRY-ALLS WORKING. THEY HAVE MOVED 39,556 CUBIC YARDS OF MATERIALS. THIS WORK HAS BEEN DONE CHIEFLY IN THE AREA WEST OF THE SLAUGHTER HOUSE BETWEEN UNIT I AND II.

4. THE KARLQUIST CONTRACTING COMPANY, UNDER CONTRACT WITH THE U.S.E.D., ARE STILL MAKING ADJUSTMENTS TO THE SEWAGE

JANUARY 7, 1944

DISPOSAL PLANT, BUT SHOULD BE FINISHED SOMETIME IN JANUARY.

PERSONNEL HOUSING UNITS ARE COMPLETE AND HAVE BEEN OPENED, SEVERAL APARTMENTS ARE OCCUPIED AND MORE PEOPLE ARE MOVING IN DAILY. STOVES HAVE BEEN ORDERED AND ARE ENROUTE TO THIS PROJECT.

THE STORE BUILDING FOR THE PERSONNEL HOUSING WAS MOVED APPROXIMATELY ONE-QUARTER OF MILE NEARER TO THE QUARTERS. THE OPERATOR OF THIS STORE HAS PURCHASED CONSIDERABLE STORE EQUIPMENT AND SHOULD BE OPEN FOR BUSINESS LATE IN JANUARY.

A FENCING CREW HAS BEEN EMPLOYED; REESTABLISHING THE FENCE ON THE NORTH BOUNDARY, AND MAKING OTHER NEEDED REPAIRS ALONG OTHER SECTIONS OF THE FENCE.

IRRIGATION CONSTRUCTION WAS CENTERED CHIEFLY ON THE MAIN CANAL EXCAVATION AND PRELIMINARY WORK ON TWO IMPORTANT STRUCTURES. EXCAVATION AND UNDERPINNING OF THE DRAINAGE CANAL UNDERPASS AT STATION 401 AND PLACING OF CONCRETE CUT-OFF WALLS WERE ACCOMPLISHED. WORK ON THE ROCK DROP CONTINUED, AND FOUNDATION CONDITIONS ARE BEING MORE ACCURATELY DETERMINED AS EXCAVATION WORK PROGRESSES. PRELIMINARY STRUCTURE DESIGN OF THE ROCK DROP HAS BEEN ACCOMPLISHED, ALTHOUGH MINOR CHANGES ARE TO BE MADE TO CONFORM THE CONDITIONS AS THEY ARE EXPOSED AS THE EXCAVATION PROGRESSES.

THE ROADS CONSTRUCTION HAS GONE FORWARD WITH ITS USUAL EFFICIENCY, AND GRAVEL BASE COURSE ON FOUR MILES WAS PLACED DURING THE MONTH. SEVERAL FILLS WERE MADE AND ALSO APPROACHES TO FOUR BRIDGES. DIFFICULTY IN SECURING REPAIR PARTS FOR EQUIPMENTS, AND PARTICULARLY TRUCKS RETARDED THE OPERATIONS CONSIDERABLY. HIGHWAY MAINTENANCE IS STILL AN IMPORTANT ENDEAVOR AND THE MAIN ROAD TO THE RAILROAD STATION REQUIRES CONTINUOUS SPRINKLING AND LADING. STREETS WITHIN THE UNITS, AS WELL AS SECONDARY ROADS, WERE ALSO MAINTAINED.

THE FINISHING AND OPENING OF THE HIGH SCHOOL AUDITORIUM IN UNIT 1 DURING DECEMBER CONSTITUTED THE COMPLETION OF THE HIGH SCHOOL AT THIS UNIT. THIS SCHOOL UNIT IS CREDIT TO THE PEOPLE OF THIS CENTER WHO HAVE WORKED UNCEASINGLY FOR THE LAST YEAR AND HALF ON THIS PROJECT.

A SUBJUGATION OF EIGHTY-FIVE EVACUEES HAVE BEEN EMPLOYED THROUGHOUT THE MONTH CLEARING OF ADDITIONAL LANDS. IT WILL BE NECESSARY TO CONCENTRATE ON THIS FEATURE OF THE WORK IN ORDER TO MAKE AVAILABLE SUFFICIENT AREA TO COMPLETE LEWIS CONSTRUCTION COMPANY'S CONTRACT.

Mr. E. J. UTZ

-3-

JANUARY 7, 1944

A SUPPLUS EQUIPMENT PROPERTY YARD, FENCED WITH WIRE, TRANSFERRED FROM THE ~~FOREST SERVICE~~^{FOREST SERVICE} WAS COMPLETED; AND THE FENCING OF A NEW MOTOR POOL AND CAR STORAGE AREA, ADJACENT TO THE MAINTENANCE GARAGE, IS PLAN^{ED} TO START IMMEDIATELY. THE FENCING OF THE MOTOR POOL IS A REQUIREMENT LONG RECOGNIZED AS A NECESSITY, AND IT IS BELIEVED THAT BETTER CONTROL OF MOTOR EQUIPMENT CAN BE OBTAINED BY HAVING A MANTITE FENCE FOR THE MOTOR POOL.

THE AVERAGE EMPLOYED PERSONNEL FOR THE MONTH WAS, REGULAR THIRTY-THREE; IRREGULAR TWELVE; TOTAL OF FORTY-FIVE APPOINTED PERSONNEL.

DURING THE MONTH A COMPLETE INVENTORY OF THE OPERATIONS DIVISION WAS MADE. THE CHANGE OF JURISDICTION OF THIS CENTER FROM THE INDIAN SERVICE TO THE W.R.A. WILL NECESSITATE THE TRANSFER OF CONSIDERABLE EQUIPMENTS. WHILE IT IS ANTICIPATED, THIS WILL NOT SERIOUSLY RETART WORK, THE RETURNING OF SOME INDIAN SERVICE EQUIPMENT WILL IMPEDE A FEW OPERATIONS UNTIL ADJUSTMENTS CAN BE MADE.

The job of testing all gate valves in Camp I-II-III has finally been completed. The delay in testing was caused by the fact that many valves had been covered with dirt by the road grading crews.

DEPARTMENT PERSONNEL:

Number Firemen on Regular Duty 82 Additions This Month 7 Terminations 4

Number Volunteer Fire Fighters x Additions This Month x Terminations x

NARRATIVE REPORT: Use space below to discuss or explain any unusual or significant development effecting Fire Department this month; changes in policy or procedures; explanations of items in statistical report; problems of personnel; comments on compliance with fire prevention regulations; equipment received; equipment needed; progress in eliminating fire hazards; plans for future; any other developments.

In the future the testing of valves will be a very simple matter as all valves locations are now marked.

Plans for new water lines in the three camps have been made, and soon several places will have hydrants for protection that heretofore have been quite a problem as to the manner in which lines of hose would have to be laid to reach them.

The new fire reporting phone boxes have been placed on poles in all camps and the report is that a crew will be in shortly to install the phones. This will assist greatly in transmitting alarms of fire, thereby giving the department a better chance to combat the fires in their incipency.

The long looked for fire reporting telephone system is finally taking shape. The boxes have been installed on poles in the three camps, and the phones have been placed in them. In Camp II and III the wires are being strung into the switch boards, but in Camp I there will be some delay as the board has not arrived.

The younger firemen are leaving the job, some to relocate and others are being inducted into the armed forces. We have been quite fortunate in replacing them with the older men. Constant practice and drills will make the older men quite efficient.

WAR RELOCATION AUTHORITY
COLORADO RIVER RELOCATION CENTER
Poston, Arizona

In reply, please refer to:

March 4, 1944

Mr. E. J. Utz
Chief, Agriculture and Engineering
War Relocation Authority
Barr Building
Washington, D. C.

Dear Mr. Utz:

Progress for February 1944 for the Construction, Maintenance, and Irrigation- Road Sections of the Colorado River War Relocation Project is submitted on the attached Form WRA-235 and this narrative.

Construction of high schools at Camp II and III has progressed as scheduled, and there has been no change in plans different from our report for January.

The Lewis Construction Company, contractor for leveling additional land on this Project, has been delayed about one week, due to very heavy rains which occurred during the end of February. This contract up to the end of February totals \$51,776.90 for 217,550 cubic yards of materials moved, and represents the leveling of 205 acres of land under this contract.

Completion of the concrete structure at main canal station, approximately 402+00, has been accomplished. This is where the drainage canal crosses the main irrigation canal. However, there is some back filling to be done about the structure as well as the fill over the structure for the main canal.

The complete exposure and excavation of the rock formation at the Rock Drop, located at approximately main canal station 416+00, has been made and the design for the structure is about finished. Concreting operations at this site will be started the middle of March with the estimate completion date April 30.

Primary roads construction has continued, and the oiling of the four miles started in January was finished this month. The efforts expended on the primary roads from Poston to Parker have proven to be worth-while, as very heavy rains here during the last two weeks have made the unimproved roads impossible, and even some

of the gravel surface roads have soften considerably. The last four miles of road which we have just oiled were finished at a very opportune time; as it permits the use of four gravel surfaced roads instead of the one used up to now over which to haul supplies to this Relocation Center. Incidentally, three days after the oiled road was opened a large box culvert installed where the main drain crosses the gravel road, over which the supplies were hauled, caved in, due to the very heavy rain.

The average employed personnel for the month of February was as follows.

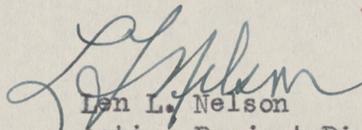

Regular 47 Irregular 50

Evacuees

Engineering & Irrigation	210	Motor Pool	104
Agriculture	427	Motor Repair Shop	35
Building Construction	430	Machine Shop	30
Utility Maintenance	148	Fire Department	108
Total		1,492	

Administrative Order No. 6 and the detailed preparation of the Fourth Quarter Budget, diverted much of the efforts of the engineer force in the preparation of the required forms and estimates. Miscellaneous constructions and improvements are being held pending authorization and approval.

Very truly yours,

 Len L. Nelson
 Acting Project Director

The testing of all gate valves in Camps I, II, and III have just been completed and were found in good order. The installation of the fire reporting telephones in the camps is progressing nicely. In Camps II and III the phones have all been connected to the unit switch boards, but some little work still remains to be done. In Camp I the Signal Corps is now working on the switch board, and it is reported that the system will be in service by April 9, 1944.

Camp I is to have 30 fire reporting telephones that will connect directly to the board in the fire house. The only line from this board will be connected to the Fire Protection Officer's quarter. An annunciator cabinet is mounted on the wall of the fire apparatus floor. Lights behind numbers in the cabinet will correspond to the number of the telephone box that the alarm was sent from.

In Camp II and III the calls from the fire reporting telephones will go through the unit switch board and then be transmitted to the fire houses. No indicating cabinets are installed in Camps II or III.

COLORADO RIVER RELOCATION CENTER
Poston, Arizona

April 6, 1944

Mr. E. J. Utz
Chief of Agriculture and Engineering
War Relocation Authority
Barr Building
Washington, D. C.

Dear Mr. Utz:

Progress report of March, 1944, covering activities of the Engineering Section for the Colorado River War Relocation Project is submitted on Form WRA-235 along with this narrative.

The Lewis Construction Company, contracting land leveling on this Project, moved 80,966 cubic yards of material this month; making a total of 298,516 cubic yards. This represents the leveling of 305 acres of land under this contract which is now 59.7 per cent complete. They have been employing six dirt moving units, but plan on bringing in two more units early in April. Severe wind and dust storms created, adverse moving conditions and several working days were lost.

Excavation of the main canal is nearly completed. It will require an estimated twenty days more to complete the removal of some material from the bottom of the main canal, in addition to an earth plug left in the canal as protection during the construction of the rock drop structure at station 420+00.

The work on the main canal rock drop structure progressed favorably, but construction will probably not be completed before middle of May, due to the difficulty in securing and retaining labor.

Construction of primary roads from Parker warehouse area to Poston continued with the gravel surfacing of approximately three-quarter of mile of roadway. Subgrade for this road is completed and remaining work is the placing of base courses and oil cakes.

Secondary roads are being developed as required with surveys, and plans being prepared well in advance of requirements.

The average employed personnel for the month of March were: regular 46; irregular 44; evacuee 1485.

April 6, 1944

Application for project approval and priorities assistance on Form WPB-617 were prepared and submitted from this Center for twelve projects, listed as follows:

- Hospital Unit Project
- Unit I Shop and Grounds Improvement
- Motor Pool Units II and III
- Administration Building Project
- Corral and Stable Unit I
- Guard Station
- Project Fencing and Cattle Guard
- Physical Education Building
- Miscellaneous Construction Project

Resubmitted

- Motor Pool Fence Unit II and III
- Shop and Grounds Improvement
- Guard Station

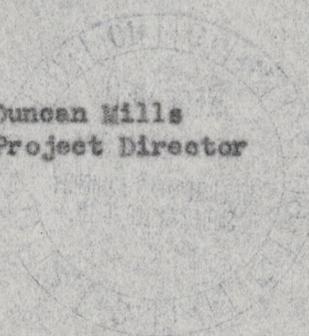

Exchange of WRA trucks for army units was made with WRA units being placed in the Project's Surplus Property Pool.

Clearing for lateral A-73, needed to supply water to Camp III, has gone forward, and construction of this lateral will be started as soon as the draglines which are now being repaired can be returned to service.

Very truly yours,

Duncan Mills
Project Director

No fires occurred during the month of April, 1944.

The fire reporting telephone system in Camps II & III is nearly completed. The stenciling of numbers on the boxes is about all that is holding up the putting of the system into effect. In Camp I the system has not progressed very much in the past month. The telephone man stated that he had been ordered to install and repair Administrative phones, and when that was completed, he would be able to continue the work on the fire reporting phone system.

A request has been received from the Gila River Project for 6 - 4" couplings, national standard thread; 3 solid plugs, 1½", 2", and 2½", to be used on standard hose. The couplings and plugs are now being made in the Machine Shop here for them.

Colorado River Relocation Center
Poston, Arizona

May 8, 1944

Mr. E. J. Utz
Chief, Agriculture and Engineering
War Relocation Authority
Harr Building
Washington, D. C.

Dear Mr. Utz:

Form WRA-235 with this narrative comprises the progress report for April, 1944, of the Engineering Section at the Colorado River War Relocation Project.

Land levelling by the Lewis Construction Company progressed better than any other month and a very credible showing was made. Areas to be leveled were not as rough as those previously leveled, which accounts for a larger acreage being completed but did not increase his equipment. The contractor was also able to establish a second shift.

Excavation of the main canal still has approximately twenty shifts of work left to be done in May. Practically no excavation was made on it in April as equipment and personnel were not available. Two dragline were out of service, and other vital work required the use of the draglines we were able to use. However, it is necessary that the main canal be put in service during May in time to supply sufficient irrigation water to Project growing crops, particularly to Camp II and vicinity. The diminishing quantity of water which is being delivered by the present feeder canals is caused by the growth of moss, tullies, and other vegetation in the canals. This, along with the limited canal cleaning and dredging facilities, makes it necessary that the main canal be opened this month and be used to supply water to the Poston farmed areas. Plans and schedules are to have the main canal to Poston finished by late in May.

Main Canal Rock Drop structures at Station 420+00 was pushed and will be completed by the middle of May.

Construction of the main road to the Parker warehouse area from Poston continued, although the difficulty in maintaining

Mr. E. J. Ute

-2-

May 8, 1944

dump trucks in operation retarded some of the work. In general the road construction program was impressive.

The average employed personnel for April were: regular-43, irregular-35, and evnouce-1,410.

With the recent interpretation of Order L-41, permitting of minor construction work, the building and maintenance crews has an opportunity to schedule and accomplish a number of necessary small jobs which have been accumulating for lack of approval or permission.

Three applications, WPE-617, for (a) Project Fencing and Cattle Guards, (b) Additions to Shop Facilities, Camp I, (c) Motor Pool and Storage Yard, Camp I, have not been returned to this Project. They cover necessary projects and their approval is very desirable.

Difficulty in making allowed replacements in vacancies caused by transfers and terminations of several Engineering Section employees will necessitate a general streamlining of this section.

Very truly yours,

Duncan Mills
Project Director

END:pm

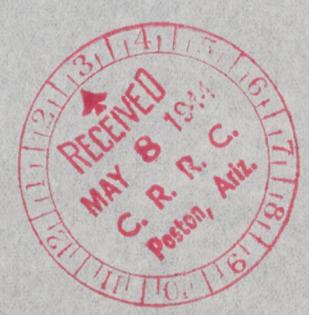

Dear Sirs: I have the honor to acknowledge the receipt of your letter of the 21st inst. in relation to the above mentioned matter. The same will be given the consideration it deserves.

Very truly yours,
[Signature]

Enclosed for you are the documents mentioned in my letter of the 14th inst. I am sure they will be of service to you.

I am, Sir, very respectfully,
Your obedient servant,

The fire reporting telephones in Camps I, II, and III are now in service and are being tested each day by the fire inspectors. This should speed up the response of fire companies to the scene of fires.

At the present time we are about to lose quite a number of firemen who intends to relocate or change to other jobs.

Colorado River Relocation Center
Poston, Arizona

June 6, 1944

Mr. E. J. Utz
Chief, Agriculture and Engineering
War Relocation Authority
Earr Building
Washington, D. C.

Dear Mr. Utz:

The attached form WRA-235 and this narrative comprise the progress report of the Engineering Section for the Colorado River Relocation Center during May, 1944.

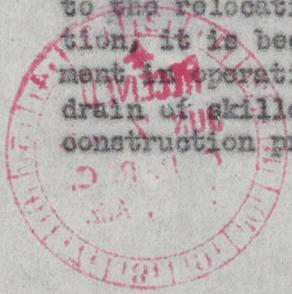

The number of employees for May were: regular-27, irregular-19, and evacuee-1,300.

Land levelling under the Lewis Construction contract was completed May 17 with an estimated levelling of 640 acres of land. The final surveys and computations are being made and should be completed by the end of June.

Excavation of the Main Canal was completed this month as was also the construction of the Rock Drop structure. Water was turned through the Main Canal Thursday, May 25, 1944. The Main Canal is now operating from Headgate Rock Dam to Poston, Unit I. The cleaning up along the Main Canal and particularly around the larger structures has been accomplished. Construction equipment used on the concrete structures has been moved into the construction equipment yard or returned to other Agencies.

During May we produced 1,742 cubic yards of concrete aggregate. The plant used in production of this aggregate is to be dismantle and returned to the White River Indian Agency in June. However, a smaller gravel plant is to be erected near Poston, Unit II, for the production of future concrete aggregate requirements.

Road construction slowed down considerably during May, due to the relocation of many evacuee employees on road work. In addition, it is becoming increasingly difficult to keep trucking equipment in operating condition as repair shops are also feeling the drain of skilled workman by relocation. The complexion of the road construction program has changed so in the last month that it is

Extremely faint, illegible text, possibly bleed-through from the reverse side of the page.

June 6, 1944

doubtful if it can be completed with evacuee labor. The production of stabilizing material and mineral aggregate surfacing continued unabated during May, and it is estimated that the production of only 5,000 cubic yards more including both classes of material will be needed. However, hauling and placing on the roadway were not accomplished as planned.

During May, five turnouts, four road culverts, one spillway drain, and three drain culverts were installed.

Fencing around the main repair shop areas at Unit I was completed during the month and work was started on the tire shop, an addition to the garage building.

Furniture Production for May

Unit I

<u>Item</u>	<u>Section</u>	<u>Amount</u>
Open Front Book Case	Procurement	\$ 9.41
Shelf Cabinet	Cost Accounting	15.04
Typewriter Table	Construction	5.57

Unit II

Desk	Transportation	34.61
Filing Cabinet	Construction	24.28
Filing Cabinet	Comm. Activities	24.78
Chair, (3)	Transportation	12.67
Watchman's Shelter	Intr'l Security	

Unit III

Tofu Box	Com. Services	9.66
File Box	Family Welfare	2.00
Telephone Box	Census	1.02
Ice Storage Box	Com. Services	15.00

Manufacturing of furniture for June will be very light as the carpenter shop crews are being employed in the framing of material required in the agricultural program.

Very truly yours,

Duncan Mills
Project Director

The fire reporting telephones are proving their worth. In the two recent fires, one in the Tofu Plant in Camp I and the other in Camp II, Block 202, the fire phones were used. In the first instance, the alarm was transmitted promptly, but in the latter fire, due to the early hour, no one discovered the fire until considerable headway had been gained. At the time of the Camp II fire, no wind was blowing, but the late transmission of the alarm greatly hampered the firemen in extinguishing the fire.

The manpower situation remains about the same. Several firemen have relocated, but we have been fortunate in being able to fill their positions.

The gate control valves have been tested in Camps I, II, III, and found to be in good working order. Considerable trouble has been found in the last two fires with the $1\frac{1}{2}$ " mystery nozzles. It has been found that the nozzle works well with low pressure, but under high pressure, the nozzle jams. No trouble has been found in the camcone.

The center was quite fortunate during the month of July, 1944. One fire in a heater room caused \$15.00 damage. Orders were given to place bricks beneath all water heaters in buildings. To date a few have been done, but several are still quite a life hazard.

The man power shortage is quite a problem in Camps I, II, and III, due to relocation and induction. Requests have been made by this Department to the Unit Councils for more men, and we have been promised that the situation will be taken care of.

Considerable trouble has developed in the automatic sprinklers in the Poston General Hospital, due to loss of pressure in the sprinkler line. Recently the Maintenance Department has been pumping water into the upper lines and raising the pressure to 125 pounds. By so doing they have prevented water surge alarms from registering and have stopped the response to these alarms by the Fire Department.

Response to alarms of fire was made by the Fire Company in Camp I to five fires. There was no loss on four and a \$13.00 loss on the fifth, which was due to a careless smoker.

In August additional fire fighting equipment was installed in the main garage in Camp I. Five 2 $\frac{1}{2}$ -gallon foam extinguishers, four 30-gallon cans of sand, two 1-quart pyrene guns were installed on the portable welding tanks. This latest addition of equipment, to the two 100-foot 1 $\frac{1}{2}$ " lines and the three 2 $\frac{1}{2}$ -gallon hand water pumps, should make the garage pretty safe from fire.

On September 1, 1944, Assistant Fire Protection Officer Harry M. Frum was transferred here from the Gila River Center. Mr. Frum is to be located in Camp II.

In the past month three alarms of fire were responded to, one of which was a \$10.00 loss to a private car.

The manpower situation is somewhat better as some of the older men are coming on the Department.

The weather is a little cooler and this should eliminate the heat hazard that has been with us for several months

The schools are nearing completion and the pupils will soon be moved from the barrack type school rooms to the new adobe buildings. It has not been possible to hold exit or fire drills as there was no device installed to warn the pupils of the existance of fire. The Board of Education has ordered electric fire bells and state that the installation will be made soon.

All gate valves in Camps I, II, and III have been tested and found to be in good working order.

The Assistant Fire Protection Officer at Camp 2 has moved into new quarters where the weather recording equipment is installed and he is to keep an accurate record of the weather.

The only draw back is that we have no approved Wind recording instrument.

During the month of October one Fire reporting telephone was moved from Camp 3 to the Stewards warehouse area. Which should hasten the response to Fires in that locality.

The new High School Auditorium is now completed. Mr. J. L. Horn, Motor Transport Supervisor will communicate with the Army Engineer's Depot at Salt Lake and have a man come here to check our Pumping apparatus.

* \$502.70 of this is Government loss, as determined by a Board of Survey. \$8,395.00 is evacuee private loss, as estimated by themselves; \$3,370.00 is claimed to represent loss of currency in the fire; \$975.00 is represented as loss of jewelry and pictures. The claims have not been substantuated. No insurance was reported on the private loss.

WASHINGTON NOTE: The other items contained on the original November report seem to be in order. The \$502.70 Government contents-loss was originally reported on WRA-98's and on the WRA-158 as \$302.70; the Board of Survey report raised this amount \$200.00 to \$502.70. Care and close cooperation between all parties concerned with these reports is required to submit the correct losses in ALL reports. The salary raise for Fire Department engineer from 16 to 19 per mo. has raised the morale of the members of the Dept.

Classes for the Hospital Staff and employees have been held in November. 134 were in attendance. Instructions were given on how to call the Fire Dept., how to operate hand extinguishers and what to do if the sprinkler system registers a number in the annunciator cabinet.

Other classes are to follow. The Fire Protection Officers have met with the block managers for the purpose of organizing volunteer Firemen in the blocks. Another meeting is to be held on Dec. 6, 1944.

The bells are being installed in the schools and during December fire drills are to be held.

During December, Volunteer Firemen groups were organized in the 3 camps. They have not been drilled yet. In the schools the fire gongs are being installed and in camp 3, the work is completed and several fire drills have been held there.

The weather here is quite cool and should eliminate the Fire Hazard to a great extent. The companies are fully manned. The Gate Valves have all been tested and found to be okay.

On Dec. 21, 1944 Mr. Ernest W. Hendrix, Fire Truck And Equipment Engineer from Fort Douglas, Utah visited the camp to inspect the Fire Apparatus and recommended the Ford motors of the apparatus in Camp I and II be replaced with new ones.

✓ Fire Protection Officer Fien transferred to Manzanar and Frank E. Hon replaced him at Poston. Associate Fire Protection Officer Woodhouse on leave effective January 26 to February 9, 1945. -

good

By conference with the Block Manager's, six volunteer firemen were secured from each block with a total of 216 volunteer firemen. They were assembled for instructions for the use of auxilliary fire fighting equipment which was given by the F.P.O.S.

A physical inventory was taken of all Fire Department equipment and a list of shortages was sent to the Board of Servey for action. The practice of burning all rubbish on open fire throughout the center is deplored and very hazardous, but this has been a practice for some time due to insufficient help and motor equipment to handle the same. Some action will be taken soon to eliminate this hazard after conference with the Assistant Project Director in charge of operations and the Block Manager's Council. The annual test of Fire Department hose will be made as soon as a guage which is on order is received. This is very important as some of the single jacket hose has been in operation about three years and would be dangerous to use it on fires.

Physical inventory of all three camps has been completed and the property in each camp is being transferred to their respective Associate Fire Protection Officers. This will place the responsibility for the property at the point where it is being used.

By directive Compensatory Time is being given to the Fire Protection Officers when they are working Sundays and holidays as per to W.R.A. hand book 20.1, .120A1. On Feb. 25, Fire Protection Officer Harley Woodhouse left on transfer to Manzanar Relocation Center. ~~Leonard I. McEachern~~ reported for duty Sunday Feb. 18¹⁹⁷⁴ and was assigned to camp III as Associate Fire Protection Officer. Testing of fire hose has been started and defective hose are being tagged for repair and survey.

The Fire Protection Officer has been given permission to appear before the Block Managers' at their regular meetings to ask their cooperation in eliminating the open fires and the use of charcoal in the center. This custom has been carried on from the beginning due to insufficient heating facilities and stoves for the cooking in their apartments.

Inspections of fuses in all the apartments and work shops is being made by the inspectors and to date very few defective or bridged fuse have been found. All the equipment and fire department clothing is being issued to the evacuee fire men and their receipt for the same taken on the regular issue slip for tools and materials. The clothing helmets, boots, blankets, etc. is being numbered for identification.

All damaged property is now being assembled for repair and action by the Board of Survey.

NARRATIVE REPORT: Use space below or additional sheet if necessary to discuss or explain any unusual or significant development effecting Fire Department this month; changes in policy or procedures; explanations of items in statistical report; problems of personnel; comments on compliance with fire prevention regulations; equipment received; equipment needed; progress in eliminating fire hazards; plans for future; any other developments.

Fire Protection Officer met with Safety Committee and discussed the question of outside fires. The same was brought to the attention of the Project Director and permission asked for the F.P.O. to appear before the assembled Block Managers and ask their cooperation in enforcing the fire regulations regarding the same. The F.P.O. called attention to the winds and dry climate, also asked that no burlap or cloth sun shades be installed.

Hydrants in Camp 2 and 3 were inspected by the Fire Dept., all were in good working order.

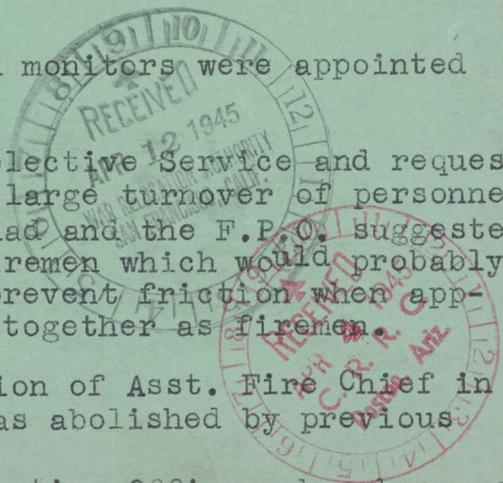

All 2½ and 1½ inch hose were tested at 225 pounds. Thirty-one 2½ and two 1½ inch hose was declared unserviceable and the same segregated for action by the Board of Survey.

Contact was made with all school and monitors were appointed and used in fire drills.

Camp 3 is loosing some men to the Selective Service and request has been made for older men to prevent a large turnover of personnel. A conference with Personnel officer was had and the F.P.O. suggested using evacuees on fully paid basis for firemen which would probably prevent a shortage of firemen, and also prevent friction when appointed Personnel and evacuees are thrown together as firemen.

Request has been made for the position of Asst. Fire Chief in charge of inspectors, a position which was abolished by previous request some time ago.

The work of the Associate Fire Protection Officers has been very good and the Center is very fortunate in securing FPO's of experience.

Board of Survey met and surveyed off damaged hose and other equipment. The Board of Survey suggested that all couplings be cut off and turned into the Warehouse. This was held up until approval from Washington.

Fire Protection Officer met with Block Managers and explained dangers of outside fires, especially during very dry or windy weather.

An improvement is noted in the center.

Camp #1 finished testing all hydrants and valves, all were in good order.

Fire Protection Section was placed under Acting Chief of Operations R. N. Parnell.

Camp #3 is having trouble securing firemen.

Many of the pump type fire extinguishers are beginning to leak from corrosion and are being repaired. Sufficient extinguishers are available until closing of the Center.

One Fire Telephone at Camp #3 has been stolen and has not been found. A report to the Internal Security was made at once.

Fire Advisor, Rumley, visited the center from the 9th of May and inspected the entire center including each Warehouse. Very few of the Warehouses needed attention. Some aisles were blocked but the Warehouse Division was very co-operative.

All grass and weeds were cleaned from the Warehouse areas. 1200 ft. of 2½" hose 500 ft. 1½" and 300 ft. 1" booster hose removed from warehouse to replace damaged sections. Semi Annual reports from 1943 are being prepared. Many records concerning same are not in our files.

List Evacuee Committees Appointed by Project Director This Month and Purpose of Each:

Mr. Dick Nakamura, 213, was appointed by the Local Council to be a member of the Relocation Advisory board. Mr. G. Mukai, Council Chairman, Mr. J. M. Kubota, Central Block Manager, and Mr. K. Uyeno, Unit II Administrator will serve as advisors to Mr. Dick Nakamura for unit problems.

Indicate Major Recommendations Made or Complaints Filed by Block Managers This Month:

The poor quality of food offered in the mess halls was brought to discussion. The matter was taken up by Mr. J. Kubota, the member of Poston Community Council Food Committee. The poor quality of serving is evident in view of the increased point value to many of the rationed commodities during the month. Report has been made that the situation will be alleviated to much extent during June.

General Comment:

Evaluate work of evacuee-government bodies, their strength and weaknesses; degree of co-operation; your recommendations or suggestions for change in policies or procedures; major controversial matters considered; actions of government bodies ratified or vetoed, and reasons; comment on any other significant trend or development in the field of community government this month.

Terminations have not effected the Fire Dept. very much as they are mostly older men. Fire Prot. Officer Lawrence J. Mc Cuteheon terminated June 7. Evans transferred to Camp #3. Thirteen firemen completed standard First Aid course, 130 man hours.

1 Outdoor stage burned 1:56 a.m. June 26, 1945, and was re-ignited 5:30 p.m. June 27, 1945. This scene of fire was inspected at 12:15 p.m. by Fire Prot. Officers Hon and Frum and no sign of smoldering coals were present. It is the opinion of the above named officers that these fires were of an incendiary origin. Reports of same have been made to the Chief of Internal Security.

Average high temperature - 102 degrees, highest temperature in June - 116 degrees, lowest humidity - 13.

Requisition to Personnel Division has been made for 12. Appointed Personnel Firemen to replace evacuee firemen in Camps two and three. There will be only 2 men on duty and no relief for time off. There are no appointed Personnel in Camp two and three for volunteers.

One Warehouse #315 burned at Camp 2 with a total loss to building and contents.

This was believed to be of incendiary origin and Internal Security patrols have been established as a preventative measure. Hydrants were again tested and flushed due to excessive amount of sand in the water lines. This center is still short one Asst. Fire Protection Officer.

It is suggested that a Fire College be set up by the Adult Education to teach the incoming Indians firemanship. They may be used as firemen or Volunteers.

Unit three went on duty August 30, 1945 with six firefighters working fifty-six hours per week. Working schedule previously forwarded. Unit two on duty, September 1, 1945 with three men. Fifty-six hours per week. It may be necessary to replace the evacuee firemen in Unit one about September fifteenth due to relocation. Willie B. Miller reported as assistant Fire Protection Officer, August 24, 1945. Drills of volunteer firemen, all of which work in Unit one, during the day are being held in Unit II. Twenty volunteers are secured for Unit I. No volunteers in Unit III. Only nine firefighters secured to date. Firefighters C. P. C. 7.

Request for siren for Unit I has been made. As Unit I must depend on volunteers, some means of giving the alarm should be provided.

Unit two Fire Department on duty September 1, 1945 with four Appointed Personnel Firefighters. Have had some trouble in obtaining firefighters for Unit one in September but five have been obtained and drilled so that Unit one will soon be on duty with A.P. firefighters.

Evacuee firemen are working two shifts until replaced.

We have no volunteers at Unit three, two volunteers in Unit two and 21 in Unit one. They are divided into three squads which drill twice each week until they are familiar with the different Fire Department evolutions. The response and willingness of the A.P. volunteers is commendable.

Inspection is limited to work done by the A.P. firefighters on their off-duty time.

The firefighters in Unit 3 are operating the telephone board from 12:00 P.M. until 8:00 A.M.

There is much accumulation of trash throughout the blocks after the evacuees have moved out but the same is being removed as soon as possible.

Arrangements are being made to quarter the firefighters in the Fire station at Unit one with kitchen provided.

NARRATIVE REPORT: Use space below or additional sheet if necessary to discuss or explain any unusual or significant development effecting Fire Department this month; changes in policy or procedures; explanations of items in statistical report; problems of personnel; comments on compliance with fire prevention regulations; equipment received; equipment needed; progress in eliminating fire hazards; plans for future; any other developments.

1/ \$502.70 of this is Government loss in two (2) fires.

2/ All of this is Evacuee loss in two (2) fires. Three families suffered a total loss of \$2,400.00 in the fire of November 28th. One (1) family reported a loss of \$5,995.00 in the fire of November 26th. This loss was reported as follows: Currency, \$3,370.00; clothing, \$1,000.00; jewelry, \$575.00; furniture, \$500.00; miscellaneous, \$150.00 and pictures, \$400.00. These losses have not been confirmed; they were reported by the residents of the burned buildings. It is reported that no insurance was carried. WASHINGTON NOTE: Two persons, (evacuees) are making claims totaling \$12,740.00 for losses suffered in the fire of December 25, 1943, when six (6) buildings burned; the high losses "claimed" by the evacuees at this center may be part of a plan, based upon hope of collecting under the Small Claims Act, to collect upon the property claimed to be lost.

In November, organization of Volunteer Block Fire Brigades was started; it is expected to have this organization in action by the second half of the 1944-45 fiscal year.

During this period Fire Protection Officers Joseph M. Fien and Harley Woodhouse were transferred to Manzanar and Frank E. Hon was transferred to Poston.

All 2½" and 1½" fire hose were tested with 31 sections found defective. These were passed by the Board of Survey and replaced with new hose. All hydrants and valves were tested and found in good order. Fire Protection Section placed under Acting Chief of Operations R.N. Parnell, Rupkey having transferred to another agency. One fire telephone at Camp #3 was stolen but has been replaced by another. Fire Adviser Rumley visited the Center and inspected all the warehouses. All recommendations have been carried out including removal of grass and weeds from area. Fire Protection Officer Lawrence J. McCutcheon resigned June 7, 1945. Outdoor theatre burned at Camp #2.
