NARRATIVE REPORT:

Industries in Operation: Discuss any unusual or significant developments this month; current problems; plans for next month; production schedules; orders on hand; policy changes; problems in connection with labor, materials, tools, equipment, housing, etc., etc.

During the month of October, tomatoes were harvested and delivered to mess halls fresh and also to the cannery. The freeze which occurred about mid month reduced the total production material. A considerable volume of tomatoes was harvested green and placed under cover from protection from the weather. As these tomatoes slowly ripen they are being canned. The cannery crew has taken a great interest in this industrial and have made some changes since the operation began which increased efficiency and daily out-put of the plant.

Industries in Process of Development: Present status of such industries; progress this month; problems and difficulties involved; when operations expected to begin; expected volume of production; outlets for products; number to be employed; training programs; problems of supply and equipment, etc., etc.

NARRATIVE REPORT:

Industries in Operation: Discuss any unusual or significant developments this month; current problems; plans for next month; production schedules; orders on hand; policy changes; problems in connection with labor, materials, tools, equipment, housing, etc., etc.

The responsibility for industry on this project was given to Agriculture during December because here industry is food preservation or processing. In fact the question has been raised as to whether activities are industrial or a further step in the agricultural production program. It is intended that facilities be developed here for canning, pickling, Tofu making and bean sprouting. Surplus seasonal crops will be utilized and some increase in acreage of tomatoes, beans and peas is planned for canning. Some soy beans will be raised for tofu and trial plantings of Mung beans for sprouts will be made this year. Canning and pickling facilities need to be built and equipped. Tofu equipment is on hand, but additional space is needed. Some pickling is being done in barrels. Results of canning last fall were very unsatisfactory.

Industries in Process of Development: Present status of such industries; progress this month; problems and difficulties involved; when operations expected to begin; expected volume of production; outlets for products; number to be employed; training programs; problems of supply and equipment, etc., etc.

Industries Proposed: Indicate kind of industry; facilities available; estimate number to be employed; outlet for products; suggestions and recommendations.

NARRATIVE REPORT:

Industries in Operation: Discuss any unusual or significant developments this month; current problems; plans for next month; production schedules; orders on hand; policy changes; problems in connection with labor, materials, tools, equipment, housing, etc., etc.

The Industry Section was reorganized this month to provide for one Supervisor and a foreman for the tofu enterprise and a foreman for the pickling enterprise and necessary workers to carry on these projects at their present rate until such time as facilities can be provided. Tofu is being manufactured in a corner of the Block 22 laundry room and pickling is being done in barracks in an annex to the hospital boiler room.

Proposals for construction of facilities for canning, pickling and tofu manufacture are being prepared for submission.

Industries in Process of Development: Present status of such industries; progress this month; problems and difficulties involved; when operations expected to begin; expected volume of production; outlets for products; number to be employed; training programs; problems of supply and equipment, etc., etc.

Industries Proposed: Indicate kind of industry; facilities available; estimate number to be employed; outlet for products; suggestions and recommendations.

NARRATIVE REPORT:

Industries in Operation: Discuss any unusual or significant developments this month; current problems; plans for next month; production schedules; orders on hand; policy changes; problems in connection with labor, materials, tools, equipment, housing, etc., etc.

The supply of project produced vegetables available for pickling was exhausted during the month and therefore the pickling crew was reduced to a maintenance basis. In addition some of the workers at the pickling plant were carrying on some unauthorized manufacture of miso, koji, etc. Pickling will be resumed when surplus vegetables become available from the farm. Tofu manufacture will continue as at present in order to supply a limited amount of this product to mess operations. Facilities for canning will be needed by July 1.

Industries in Process of Development: Present status of such industries; progress this month; problems and difficulties involved; when operations expected to begin; expected volume of production; outlets for products; number to be employed; training programs; problems of supply and equipment, etc., etc.

NARRATIVE REPORT:

Industries in Operation: Discuss any unusual or significant developments this month; current problems; plans for next month; production schedules; orders on hand; policy changes; problems in connection with labor, materials, tools, equipment, housing, etc., etc.

The Tofu plant is being transferred to Mess Operations on July 1. It is proposed to continue the sewing project as an industry in order to have facilities available for repairing clothing issued by the project and for making articles needed by the various Sections which are not available for purchase. For example, work gloves cannot be purchased in sufficient quantities for farm workers, garbage crews, warehousemen, etc. Therefore, material has been purchased and gloves are being made.

Industries in Process of Development: Present status of such industries; progress this month; problems and difficulties involved; when operations expected to begin; expected volume of production; outlets for products; number to be employed; training programs; problems of supply and equipment, etc., etc.

Industries Proposed: Indicate kind of industry; facilities available; estimate number to be employed; outlet for products; suggestions and recommendations.

NARRATIVE REPORT:

Industries in Operation: Discuss any unusual or significant developments this month; current problems; plans for next month; production schedules; orders on hand; policy changes; problems in connection with labor, materials, tools, equipment, housing, etc., etc.

Sewing Plant

Our Sewing project did not do so much this month due to the fact that they did not have materials to make gloves and other necessities with. Most of the work done was repair work to garments already made.

Pickling Plant

Our pickling plant has only pickled 4900 pounds of vegetables this month but the workers in the pickling plant were harvesting crops in the fields in their spare time.

Industries in Process of Development: Present status of such industries; progress this month; problems and difficulties involved; when operations expected to begin; expected volume of production; outlets for products; number to be employed; training programs; problems of supply and equipment, etc., etc.

Industries Proposed: Indicate kind of industry; facilities available; estimate number to be employed; outlet for products; suggestions and recommendations.
