Air, Warm

1. Block Activities: Block Changes.-- Volunteers from Blocks 2, 4, 13, 14, 15, 16 cleaned the area north of Blocks 2 and 3 continuing from last Sunday.
2. Manager's Notes; Concerned about the volunteer workers going out to help in the labor shortage - the contracts signed by the workers specifically denies them medical care and compensation for injuries received during their work outside Poston.

Because of varying state laws - would suggest that the solution would be for the Administration to advise all workers not to sign these contracts unless all employers agreed to take care of every volunteer laborer. Most of these evacuees are without funds to care for themselves in case of sickness or injuries - Evacuees are so glad of an opportunity to go outside, it means liberty and freedom from the restrictions imposed on them here that they do not stop to think of what may happen to them outside - that I feel the administration has a responsibility toward these people to see that every possible protection is afforded them. The Civic Council should take this matter up and work out some plan whereby if necessary each worker should require his employer to deduct a part of his pay to insure each group against sickness or injury - in California many insurance companies will for as little as \$1.44 per \$100

8. Notices Received: Education Dept. concerning high school students to register at 32 Mess Hall who have not received program.
9. Manager's Notes: The administration should make their policy concerning Poston - clearer to the people. Lately we feel that the policy has changed - that it is not the policy of the WPA to make this a cooperative where by each individual will receive his share of what this project is able to earn in profits. Under the present feeling we all are trying to get the softest job, no one is making an effort to earn anything for anyone.

6. School: Decided change of atmosphere today as school children-- up bright and early with clean, neat clothes and business-like countenances.
7. Manager's Notes: A demonstration of non-cooperation by the community - we have to have volunteers to do specific jobs that can't wait. A definite policy by the Administration would in my estimation obviate any necessity for volunteers each Dept. every member in this community would see to it that no department would be staffed with non essential members. It's a shame that any necessary jobs should be done by volunteers. It is the fault of the present policy which is not clean.
