Use additional sheet if necessary.)

Plans have been completed to introduce a course for adults in auto-mechanics through the War Production Training Program. The Motor Repair Shop has co-operated with us in trying to secure tools and equipment. The High School auto-mechanics course is proving both popular and effective.

During the month of December Mr. Jeff Farris, Physical Education Director of Arkansas State Teachers College visited the schools and made certain recommendations. His visit was helpful.

Mr. Tom Collier of the War Manpower Commission made two trips to the Center in the interest of the War Production Training Program. Mr. Fred Graham of the Trades and Industries Division of the State Department of Vocational Education came down to assist in setting up our auto-mechanics course.

Dr. Lester K. Ade, Education Adviser of the WRA, spent two and one half days at the Center. He gave definite assistance along many lines of endeavor and especially pointed to Summer program.

A. G. Thompson
Superintendent of Education

There are several outstanding events and activities to report for July. Mr. W. F. Hall, State Supervisor of Elementary Schools visited the Elementary Schools and gave an "A" rating. The Board of Consultants visited the Center and made a thorough trip of inspection. Dr. Lester K. Ade, Educational Consultant and Dr. W. E. Viles, Educational Adviser, visited the Center.

The Secondary School is undertaking the publication of an Annual which will be ready for delivery early in September.

Although a definite report on the Library is not available this month the list of books is increasing and the new space for the Community Library will be occupied soon.

A slight turnover of teaching personnel is expected during the month of August and September. Plans are being made to add approximately eight teachers to the staff.

In the Secondary School a Carnival was given to assist in financing the School Annual. Over \$2,000 was raised. The Annual has been completed and will be delivered early in September. Father's night was successfully held in the Elementary School. The classes in Automotive Mechanics have been very successful, although no tools are available. The Commercial night classes have been pushed forward. Although there have not been many additions or resignations, many personnel problems have existed due to many factors including working under the most difficult weather conditions. The most pressing problem at the present time is the employment of four elementary teachers and eight secondary teachers.

Many evacuee teachers were terminated for the three weeks period between school terms. The number of evacuee employees was reduced from approximately 130 to 85 for the 1943-44 school term beginning October 4. This change reduced the vacancies listed on this report although there were large numbers of resignations. The present plans call for the certification of 12 evacuee teachers.

In the Secondary School, the Principal and Assistant Principal have resigned. One of the teachers and assistant has been recommended for a position of Assistant Principal. In the meantime, the school will be operated by the Assistant Principal, one head teacher, and the Night School Director.

On September 11 approximately 60 students received their diplomas.

The outstanding activity in the Secondary School which ended during the month of September was the production of the Denson High School Annual. 925 copies of this year book were sold and distributed.

The Public Works Division has begun work on certain improvements recommended by Washington officials and approved by the Project officials. Lighting will be more efficient. The arrangement of rooms or storage space will be made more convenient after these improvements have been made.

The Denson Schools began their 1943-44 term on October 4. At no times has the quota of appointed personnel allowed been filled. In the Secondary School the Assistant Principal, with the aid of one Head Teacher, has organized and operated the program.

There is an increasing number of personnel changes among the evacuee teachers due primarily to relocation. The decrease in the number of evacuee assistants has produced a more efficient work program with the development of better work habits. A full quota of appointed personnel is sought to avoid the instability caused by the changing evacuee personnel.

The Adult Education program has secured a skilled automotive mechanics instructor who will give most of his efforts to the promotion of a practical vocational training course for both secondary and out of school students. The present plan is to employ two commercial head teachers who will offer comprehensive instruction in all commercial subjects to both secondary and out of school students. These head teachers will also give guidance to apprentice-training applicants.

The greatest need in the Elementary School is appointed personnel teachers. There should be at least five additional teachers at the present time.

The Secondary School is operating more smoothly than at any time during the past. This is partly due to the fact that the program of segregation is over and that the facilities of the plant have been improved.

The program in adult education and vocational training is changing. Auto mechanics has been added both to the High School and to the Night School.

In the High School a full time band instructor will report for duty January 1. It is likely that the War Production Training Program will place a full time instructor in auto mechanics and possibly in refrigeration. Mr. Tom Collier of the War Manpower Commission visited the Center to determine how many trainees might be placed.

Mr. Jeff Farris, Director of Physical Education in Arkansas State Teachers College, visited Penson High School as a consultant in developing the Health and Physical Education program. He held conferences with the physical education teachers and talked to all the High School teachers.

Use additional sheet if necessary.)

The actual school month began November 29, 1943 and extended through January 14, 1944. During this time school was actually in session twenty-two days. School dismissed at the close of December 21, 1943 and convened at the beginning of January 10, 1944. The interruption was due to an epidemic of influenza.

The teacher changes have not been great but will increase with three, possibly four resignations among the appointive personnel effective within thirty days. There will be about the same number of changes among the evacuee teachers.

The vocational training program is being strengthened. The Vocational Training for War Production has an auto-mechanics class for eight hours, five days a week, with a full quota of fifteen men. These men are assigned as apprentices and are doing actual production work on live units while learning.

The Secondary School auto-mechanics teacher has one afternoon high school class of boys and one night adult class of men. At the beginning of next semester two high school classes and one adult class are planned.

The co-ordinator for the summer program has been appointed and he is working with an over-all committee on plans. These plans will be submitted to the Education Staff for review and revision. Plans from other Centers are being studied for suggestions and ideas.

The activity program in the Secondary School is rapidly developing. The student publication, "Condensor", is an excellent paper. Plans for an annual have been made. The Club Program is becoming effective. A new band director, Mr. J. H. Rennick of Beatrice, Nebraska, is doing outstanding work in organizing, promoting, and developing a secondary and community instrumental music program.

Plans are being made to enlarge the basic English and academic program of the adult school, especially during the months of July and August when academic teachers will be available.

Scholarship funds are being sought by the Vocational Adviser from the Education Fund of the Co-op and others.

A planned visual education program through films is in progress in the Elementary School. These films have been scheduled in advance.

NARRATIVE REPORT: (Use space below to comment on significant developments in educational field at center this month changes in policies and procedures staff and student participation in activities outside center; special programs or projects completed or undertaken; problems of equipment, space, and personnel; visits of state education officials and other educators; plans for the future; suggestions and recommendations; and anything else of significance. Use additional sheet if necessary.)

The enrollment and attendance of the Elementary and Secondary Schools continues normal despite the proposed closing of the Center. The adult program has shown some effects of the announcement and probably will be seriously affected. The vocational training program will suffer the most.

Many activities are being planned and pushed to completion in order that the general morale of the school may be held on a high level during the closing months of the project.

The Denson High School Annual is being prepared for publication. Distribution will be made by the first of June.

A Handbook of the Education Section has been prepared and will be mimeographed soon for distribution to the teachers and other officials.

The Band is making remarkable progress. A series of concerts will be given during the next three months. There are over fifty pupils enrolled in the Band.

The Denson High School "Condensor" and the Denson Elementary School "Elementary Echoes" will continue to be published throughout the school year.

The mid-term graduation of 12-A Seniors was held on February 24 with 52 graduates. The hall could not accommodate the people who wished to be present.

Two high school, one OSYA, and one War Production Training Program Auto Mechanics Classes are in session.

Shorthand, Typing, Office Practice and English are receiving considerable emphasis in the Adult and vocational training programs.

The Vocational Retraining Committee is endeavoring to encourage apprenticeship training. A meeting of section and division heads will be held soon to inaugurate a greater apprenticeship training program.
