Dear Yoshiko - What a truly fine
and beautiful book. Few are able
to pay such a tribute to their parents
and family life as you have to
Yours! You are such a good writer
and every word means so much -
Your fairness and restraint in
writing of the miserable experiences
is so commendable. The whole war
experience is so miserable for all
of us - we lost friends who were
detained in Japan and at sea so

no one is ever spared when mankind
stoops to such lowliness as to fight
a war - Hope Britain & Argentina
Come to peace soon! And that all
people everywhere give up nuclear
arms & weapons -

[My little puppy is distracting me
So excuse my mistakes here & there.
She is adorable - a Welsh Corgi!]

Don Ellegood & the whole press staff
came over to a Press party for
a new book Gardening with Native Plants

by a Botany professor - at my
neighbors the Bloedels who are
giving their garden-arboretum
to the University - So Don brought

a gift of your book & a beautiful
Book on Weaving and the Native
Plants book! He is so kind and
such a good friend - Audrey Meyer
their designer is also a great
friend - I hope you met her -

I am sorry you could not have
stayed over and visited me
here! And regret not coming
to your book-signing party but
my malaria came back again
& I was not well enough -

My congratulations to you - I am
going to find your children's books
what an impressive list! Love to you -
