**T**he 1984 legislative session ultimately centered on the position of Governor Deukmejian with regard to labor-backed bills approved by Assembly and Senate.

The Governor signed into law 33 AFL-CIO-endorsed measures and allowed another bill to become law without his signature. This set a record for gubernatorial approval of AFL-CIO bills in any legislative session.

However, he vetoed 26 bills, a new record in the other direction. Also on the negative side: legislative efforts to restore funds for cuts made in 1983 in the branch offices of the Agricultural Labor Relations Board, CAL/OSHA, the Labor Commissioner's office and the Division of Industrial Accidents were again vetoed by the Governor resulting in a continued decline in the ability of these agencies to protect workers' rights.

Examples on the positive side: bills signed into law to protect employees against discrimination by employers for disclosing their wages, to require employers to furnish employees with itemized statements of total hours worked during a pay period, to protect women workers against sexual harassment, to require employers to advise employees of their right to be treated by physicians of their choice in industrial injuries.

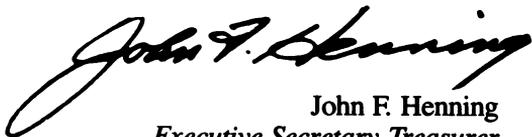

The Democratic majorities in the Assembly and the Senate continued their liberal traditions. However, there was the failure to act on such grave issues as plant closure relief, extend unemployment insurance benefits and visual display terminal (VDT) protections for workers.

In sum, 1984 was a mixed experience for labor. The working people of California deserve something better than that.

The following pages tell how members of Assembly and Senate considered the economic and social issues that affect the lives of millions of California workers and their families.

These evaluations have a certain dramatic integrity. They present the unvarnished record of legislative deeds, whether good or bad.

Fraternally yours,

John F. Henning
