COMMENTS

— Hawley,

Gaining this information through interviews of this sort is not very satisfactory. Even men living all their lives in this district cannot remember dates of acquisition accurately. Men like Kitaseko and Akasura are not old enough to remember when the lots were acquired. Many of these lots were not farmed by the owners or leasers, but by aliens. In my opinion this information must be checked in the recorders office in Santa Barbara County or elsewhere.

INFORMATION FROM KEN KITASAKO

Ken said he believed he could help us with Guadalupe and Santa Maria.

George T. Aratani

He lived ~~at~~ there all his life. He was born there. I don't know when he leased the ground. He's about 27 years old, and started to farm when he became of age. At the longest he was farming four or five years.

Bud Asakura

He's a young fellow, about 20 years old. The longest he's been farming is 7 or 8 years. He should be able to tell you about the Santa Barbara people. (Bud Asakura is a brother of Taki Asakura who was recommended to me as an informant by X. He has relocated.)

I. Henmi

He was farming in the Guadalupe area. He must have lived there all his life as far as I know. I knew him in 1925. ~~He~~ He was there about 19 years. He was farming in 1925. Prior to that he used to do contract work for a seed farm.

M. Inoshita

He's a truck farmer. As far as I know he's been farming in Santa Maria about 22 years.

Shigeto Inouye

He's a young fellow. Fairly recent. He got out of high school and worked for awhile. He's about 31 or 32 now. He must have been farming in this area 8 or 9 years on the same ranch.

Thomas Ito

He's the block manager of block 47. I don't know about him and you better see him.

I suggest that you see George Nishimura on Lompoc.

Harry M. Kamiya

I've known him since 1928 in the Guadalupe area. He's been there in one place 15 or 16 years until evacuation. He had several ranches all around the area.

Dick Kamon

He's a young fellow. I didn't know he was farming. He must have started right after high school. He lived in Guadalupe for a while and then moved to Santa Maria. Actually he was farming about 2 or 3 years prior to evacuation. I think he was born and raised in Santa Maria and went to school there.

Haruko Kihara

I've known him since 1930. I should judge he was there 14 or 15 years. He must have been living there prior to that on that one place in Guadalupe.

Yoshitaka Murakami

He's just recent. His parents have been Guadalupe a long time, about 25 years. When the alien land law went to effect they had to quit farming. The father was doing a foreman's job for different companies. When his son came of age he took ~~xx~~ up farming. Actually it was only one or two years before the war broke out. But the family was there about 25 years.

N. Oishi

He's been there all his life, born and raised in Guadalupe. He's been farming 7 or 8 years there.

Oji Brother's Farm

They originally came from Sacramento about 5 years ago. That was about 3 years prior to the war. They located in the Santa Maria

Valley and started experimenting with asparagus. They were asparagus farmers to begin with in Sacramento. They got this plot and had everything going just fine. The first crop of asparagus was coming on (It takes about 3 years before asparagus starts giving normal production). They were just going on their third year when the war broke out. It was really tough for them. Here he had worked so hard.

George Sakamoto

He was born and raised in Guadalupe. He had been there all his life and then took farming. He was farming in this place about 8 years before the war.

Santa Maria Produce Company

That was mine. We've been in business since 1930. That's when the company was organized. We engaged foremen who were in and around Santa Barbara County from 25 to 40 years. I picked men for the company who were familiar with the soil and climatic conditions. They were all issei members. The company was young, but it was growing and it's better to have experienced old-timers. We grew, packed, and shipped fresh vegetables. We had all these plots at one time or another from 1930 on. Naturally I don't remember when we leased or let each plot go. It didn't mean that ~~when we took on~~ we'd take on a piece of land for 20 or 30 years. If certain conditions developed and the land was not suitable for certain crops, we'd give it up for new land. Sugar beets, for instance, are very hard on the ground. When the tonnage got way down, we'd give it up. As to the dates of acquisition, we may have had almost all this land 10 years before the war. We'd lease the plots on a three year term and renew

them depending on growing conditions.

Vegetables Farms Inc.

~~Both of the men at the head of this company are now relocated.~~
Both of the men at the head of this company are now relocated.

They were our competitors. They were bigger and had greater acreage, but the result of this organization is the same thing. They had a qualified personnel. They were established in 1934 or 1935, about 8 or 9 years. But they had some other organizations prior to this. I know they were there for 8 or 9 years, but i don't know how long before that.

General Farms

This is also a big outfit. Originally there were two partners, Hiramatsu and Iriyama. They were farming there together and then organized the general farming company back in about 1939 or 1940. Hiramatsu came about 1926. Iriyama came later. They operated along the same lines we did. They would take on leases and increase or decrease them according to shipping requirements.

INFORMATION FROM BUD ASAKURA

George Y. Abo

He was one of the newcomers. He settled around 1935. He went to El Captain a year and he went broke, so he started in farming at La Mesa and then gardening. Then was in a hole to the man he leased that from and he started working from under it.

Ken Dyo

The Dyo family came about 1935 or 1936. They went into dry farming. Of course there's oil fields below by the beach, but they took land at the top because Summerland is noted ~~ix~~ for it's weather.

There is no frost there in the winter time. They took a chance with winter tomatoes. All Summerland is more or less specialized in winter farming. The hill soil is adobe and very good. I've looked at it myself. It holds its moisture.

Tom Hirashima

I've known him ever since we were kids twenty years ago since 1924. His father worked as a caretaker for the Seaside Oil Company. They never really went into farming until after he graduated from school, about 1938. Then they invested in a walnut deal.

Richard Ikeda

He was my best man (in marriage). This fellow I've known for a great many years, 15 or 20 years. Right out of school he went into contract gardening. He had contracted a Joseph Sexton family lot there. I was looking for good ranches then too. I asked him and he said the Joseph Sexton lot was good but he was interested in trying out one kind of bunch peas. He did it in 1941. I don't think he made any money.

Suku Imanishi

He came way back around 1929 when he was raising produce. Just he himself was doing it. He was an old man. He must be passed away by now I suppose.

Harry Kamiya

See him for Guadalupe. He's head of the farm here. (I have investigated and found that Kamiya has relocated).

John Suku Kanetomo

He's a newcomer too. They were Colorado people. They went bankrupt there. They had a cousin in Santa Barbara that called them to Santa Barbara. They came in 1939. They were advised to grow winter

tomatoes. They leased the little land and little house. La Mesa has very little frost and the chances of winter things were favorable to us.

Isamu Kanitomo

He is the cousin who called John Suku. They were there as far back as I can remember. I know they were there in 1935 already.

Roy Kunitake

I only know the year he came there were three brothers; Roy, Albert and James. They came from Oxnard about 1938 and started farming with winter tomatoes and winter cucumbers. They hauled for us. ~~Kyaihi/Mayeda~~

Kyaihi Mayeda

He came from around Sacramento or Stockton. He is a newcomer too. He did 8 acres of bunch vegetables and the year following went into about 40 acres of farming, leasing another place. He took this particularly the year before that, 1939, I think.

Mitsumi Miyamori

I've known him 15 years. He was one of the biggest around there, one of the largest tomatoes and sweet pea growers. He's been farming around there for the last 10 or 11 years, since 1934 at least and even before. Before that he started on a little farm on the southern outskirts of the city.

Frank Mori

He's volunteered for the army now. Their family has been in La Mesa for over 20 years. They did just small farming. They had that plot 20 years.

Tokutaro Mune

He came around 1938 or '39 and he did big farming on Cliff Drive and Golata, concentrating on tomatoes and lima beans. He came from up North.

Nakahara

He was a single fellow. He was working at the Cottan Estate as a gardener. They gave him a plot of land and told him to go ahead with it. It was just pin money. He started to work there around 1939. Until then he was doing odd jobs around town.

M. Nakayama

He is a peddler by trade. He took ~~on~~ our land. I use to lease to him. It was not even half an acre. He lived in Santa Barbara 30 years. He just had this plot a half year in 1940. He had just put it in and he had to give it up.

Jim Namba

He had about 11 acres. He had the land right next to mine, and went in extensively for tomatoes. He came in around 1939. He made big money.

Jack Nishiwaki

He came from Hawaii back in 1915 or so because he lived with us during that time. He was World War I veteran. He farmed in La Mesa, dry farming. He went in for peas and tomatoes. He farmed there for the last 13 years, since 1930.

Tom and Ken Ota

They are very old people. They were there in 1929. They started a little strawberry farm at that time and grew to be the biggest farming company. They were backed by the San Diego Produce Comapny. They went in for as big farming as they could do. All this was done up on the hills.

It's dry farming.

George Ryusaki

I've known him all my life. He was the proudest man in Santa Barbara. He went broke there and so we advised him to invest in a home. He wanted to get married. He bought in Goleta. He went into share-farming with the American fellows there. He came around 1935 or 1936. He was a prominent man in town.

~~Viz/Viz/Viz~~

Sugoru Mizukami

He must have come around 1935 or 1936. They farmed way out in the foothills of Carpinteria.

Jengoro Teraji

They were just a father, mother and small children doing by themselves. They made just enough to get by. They must have been there at least since 1936 or 1937.

Tom Tsunoda

They've been there in Santa Barbara itself 30 years or more. The father's a gardener and the mother takes care of a little plot of land of some owner they were leasing their house from. They've been there 30 years or more.

Bud Asakura

That's myself. All the family was born in Santa Barbara. I've been there 33 years because I'm 33 years old. Right after I got out of school I went into business with my brother as a florist for 6 years. From 1930 to 1936 I worked as a florist. Meanwhile I was growing sweatpeas and chrysanthemums on this little land that Nakayama took over. For two years I gardened out for experience. Then in 1939 I went into farming on my own, specializing on winter sweatpeas and tomatoes. I dealt with McClelland Company in San Francisco.

What I've told you is more or less accurate, only since I'm young they might have been there earlier.

DeWitt says that the Japanese wouldn't farm in the fertile land in the Santa Ynez. The Japanese did try farming there, Miyake said. But very few Japanese went in for dry-farming, because they were afraid to take a chance. They tried it there and found they couldn't make a go of it.

~~1941~~

INFORMATION FROM GEORGE RIUSAKI

Tom Tsunoda

His father farmed there for a long time. He's a stock holder of a lemon orchard in Fillmore.

(I was in Santa Barbara 30 years. For 6 years I was president of the Japanese Association.)

Jengoro Teraji

I think he farmed there around 10 years before evacuation.

Mizukami

He was there around 10 years/ too.

Takezo Sakaji

He started the same time as Teraji, about 10 years ago. They came from the same place.

George Riusaki

The most part of my life I spent in the wholesale business. I was farming at the same time I was in the wholesale business. Once I had about 500 acres. Before I evacuated I had about 60 acres beside this. I had two places in Goleta. About 7 years ago I gave wholesale business and took this farm. For 25 years before that I had this wholesale business in Santa Barbara. I had about a quarter million

dollar business.

Tom and Kenota

They had the biggest farm. They produced \$1000 a day for the Los Angeles market. They came to Santa Barbara about 20 years ago. They started small, getting bigger and bigger. They had about 100 acres of their own land.

Jack Nishiwaki

He stayed there pretty nearly 25 years in Santa Barbara. He's an ex-serviceman. He worked for my place about 10 years. He had this land about 6 or 7 years before evacuation.

Jim Namba

I think he was there 3 years before evacuation.

M. Nakayama

His father was a vegetable man. He just had a small strawberry patch around his home. His father peddled vegetables from house to house. He's moved to Chicago now.

Nakahara

He started only a few years ago.

Tokutaro Mune

He was there about 5 years before evacuation. He moved in from San Jose.

Frank Mori

This is an old-timer. He lived 35 years in Santa Barbara. He worked in a nursery and started about 15 years ago on his own farm when his boy got big enough to be of help.

Mitsui Miyamori

He lived for 25 years in Santa Barbara and started to farm about 10 years ago.

Kyahi Mayeda

He moved there from Guadalupe about 10 years ago and started farming.

Roy Kunitake

He moved from Oxnard 5 or 6 years ago to this place.

Isamu Kanetomo

He was there about 3 years. He moved to Santa Barbara from Colorado.

~~40~~

Junsuke Kanetomo

I think he's the father of Isamu.

Suku Imanishi

He's an old man. I think he started in 5 or 6 years ago there. (before evacuation).

Richard Ikeda

He worked for Mr. Sexton as a gardener and at the same time had 6 acres on the Sexton Place. It was only a few years.

Tom Hirashima

He bought 5 or 6 acres of good land in Gilleta. His father worked in the Seaside Oil Company all his life, 25 or 30 years. He bought this land about 3 years ago.

George Abo

About 3 years before evacuation he moved here from Lompoc. He worked with the San Diego Produce Company. He's in Heart Mountain now.

Ken Dyo

He came to Santa Barbara about 6 years before evacuation.

Emiko Fukamura (Fukumura?)

I don't know Fukamura. I think it may be the wrong name. I knew a man named Fukumura who lived in Santa Barbara over 30 years.

started farming ago.
He ~~stayed on this farm~~ 15 or 20 years. He had many children and his wife died. Before evacuation when his children grew up he had this place only a few years. Before that he lived at La Mesa.

Hikaru Fujimoto

He came to Santa Barbara about 15 years before evacuation. I gave my carrot field to him to farm and he must have had it about 6 or 7 years ago. He has two boys in the army.

George Aratani

He's the biggest man in Santa Maria. He's the boss of Guadalupe Produce.

Y. Yamamoto

He was there 6 years before evacuation.

Hiseki Yamaoka

He came from Guadalupe about 5 years before evacuation.

INFORMATION FROM GEORGE NISHIMURA

Minoru Hosaki

He bought lots 37 and 38 in 1934 or 1935 the others he leased. He leased lot 40 in 1936 from a person named Bianci. Lot 38 was where he had his home. At first he leased it and then he started buying it around 1931. He bought lots 37 and 40 from John F. Langer in 1935 or 1936.

Tomika Iwamoto (Mrs.)

Lot 2.48 she leased from a person named Nate Hall. Back in 1928 '29 or '30. She gave it up around 1935. On lot 55 they've been there at least 10 or 12 years. They moved in in 1932 and stayed until 1942.

Masanobu Honda Kaoru Honda

Masanobu and Kaoru are brothers. They got the land in 1938 and stayed there until evacuation.

Mrs. Toshi Inouye

She started in 1936. She leased one of the lots, I don't know which one, around 1936. The other one she bought in 1937 '38 or '39.

Nishimura suggested that the best information on these lots would be obtained in the recorder's office in Santa Barbara.

Michisuke Tanouye

He took the place in 1930 and stayed there til evacuation.

F. Shimomura

He's just recent. He was in Lompoc before but came to this particular ranch only two years before evacuation.

Ichiro Ota

He got lot 2.39 in 1929. He got lot 2.51 in 1940. He had them until evacuation.

Masaharu Nakashima

Lot 2.33 was owned by Ben Grossi. Nakashima got it about 4 years, in 1938. But Ota and Nakashima had been farming on another piece of ground in Lompoc 20 or 25 years. Nakashima was born in Lompoc.

Masayuki Nakamura

He got this land from Tony Mattaish in 1938. He was in Lompoc for 5 years.

Masaru Morinaga

He didn't farm this land. The actual man farming the ground had it about 5 years, since 1936. Often times the person mentioned is not the one who farmed. The person mentioned is often a young boy. But the actual farmers usually were there a long time.

H. Miyazono

The actual man who farmed this was Kawahata. Miyazono just held the lease on it. He leased it in 1930.

Chitose Kitaguchi

He bought it in 1930 and stayed until 1932.

Mrs. Umeko Ikeda

He had it two years. He got it in 1940.
