Dear Mr Hughes.

Your news report this noon
was startling; about the
"news man" who spent a day
with the Japs in luxury
at Ellis Island.

Without further ado, I
feel that man is right

and why should we treat those
- - - friends like Human Beings.
They think all Americans are boobs
and we are, to give them decent
treatment, food etc.

Just imagine what is happening
right now to all Americans in
Japan. We cannot imagine what
is happening to them.

Can't something be done about ^{it.} send
the "news man" in as guard one
day. I'd like to help him
guard them. One Day.

Get behind that News Man and
let his story be sidetracked.
Help him he speaks from
experience.

Sincerely

Dear Mr. Hughes, We here on the farm make it a point to try to listen to you ~~ea~~very broadcast. We are interested in the east and appreciate your slant and information on things relating to the far east.

We were particularly struck with your quotation today from your friend's book relating his experiences of 61 days while interned in Japan. Being a missionary I am vitally interested in the treatment of our friends over there. I am wondering whether you may not be able to call the attention of Mission Board Secretaries to the book you referred to, possibly through some of your New York or Boston friends. Any thing that helps to make things better is all to the good.

Thanking you for your broadcasts, I am

Mr. George B. Hughes:

I have just been listening
to your reading of James R.
Young's letter about the Japs at
Ellis Island and I wish that
you could get that letter before
our people for of course many did
not hear you this morning.

There would be no danger of
hysteria or a too great antagonism
against the Japs here or elsewhere
by the spreading of such information
I think - Americans on the contrary
are too apathetic & hard to arouse -

we have been playing around ^{too much}
and thinking too little.

And by the way in wondering
how it happens that we are so
utterly taken by surprise by the
painstaking preparations of Japan
during the past for what she is
doing to us now.

Can it be that Washington has
been too busy putting over the
New Deal to note what has been
going on in other countries?

Dear Mr. Hughes,

I have listened regularly to your 9 A.M. broadcast over this station for the past year with growing interest and respect for your sound views and apparent knowledge of the Far Eastern situation. When all my friends and relatives were excited about the European war I insisted that they listen to you and watch the developments in Japan. I want to thank you for keeping us

me some sources of reading
or information so I could
learn a little more accurate
knowledge about this problem.
Recently at a gathering of friends
I expressed my views of Japanese
aliens, Americans, etc. and was
promptly labeled uncharitable
unChristian, and so on. I was glad
to hear you expressing essentially
the same ideas this morning.
I believe that most of us in
California should make an
attempt to overcome this laxi-
tude and should really try
to learn the true state of affairs.
I am enclosing a stamped

all posted about developments of
which we otherwise might not
have known.

I was especially interested
in this morning's broadcast in
reference to Japanese Americans
and aliens in this country also
the treatment of Americans by
Japanese. Could you send me a
copy of your broadcast? My
opinions on these subjects
coincide exactly with yours and I
believe that most of us Americans
are asleep at the switch "insofar
as true information is concerned
about this situation. I would
appreciate it if you would give

Dear Mr. Hughes:

This is my first personal letter to any broadcaster - but I do want to express my appreciation of your daily broadcasts over the Mutual Broadcasting Co. Your comments on the situation in the Far East have been so in accord with what we believe and know to be true, that it has given me great confidence in your deductions.

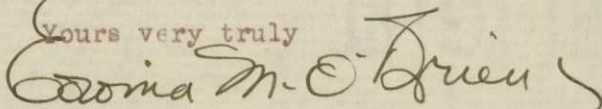

You see, we live in a very large Japanese community and know that what you say is true!

I would appreciate it very much if it is possible for me to have a copy of your comments on the Japanese, the situation in the Orient, and the comments you made on the situation here in this country with respect to the Japanese on your broadcast this morning, Monday,

January the fifth. They are very pertinent to the situation here, - that few people are yet aware of - and I do hope that you will keep on hammering about it in your daily talks to the people of this nation.

Thank you so much for sending this to me - if possible. I am enclosing a stamped self-addressed envelope in the hope that you have a copy available.

Dear Mr. Hughes,

For several years I have listened to your radio commentaries, with a great deal of admiration and respect. I think you know what you are talking about.

Now, in this time of crisis, I believe that you can give us, the General Public, an idea of exactly what we should do in several matters of immediate importance.

The other day, I heard a commentator accuse us, (the G. P.) of being responsible for the follies of the government in the past years-- for the continued sale of armaments to Japan, etc. etc. This all ties in with the question that I know is in many minds today, "What can WE do about it?" A handful of people, proportionately, makes the decisions, if any are made, and I frankly cannot see where our opinions carry any weight at all.

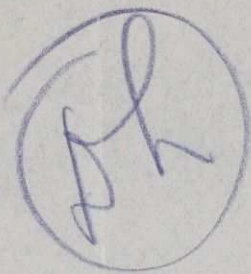

Whenever, during the past years, I have discussed with acquaintances the sale of oil and scrap iron to Japan, they unanimously and strongly disapproved of the government's policy. But what good did our disapproval do? I'm afraid that most of us are so ignorant of the details of the way our government functions that we don't know how to exercise our rights as citizens. Does writing to congressmen actually help? Or do such letters find the wastebasket before they find the congressman?

In this situation of the enemy aliens, what can we, the General Public, do, if the government is too slow in taking ordinary precautions? I should hate very much to hurt a loyal American Japanese. But I think even that would be better than leaving unfriendly persons free to contaminate our food supply and to guide submarines and planes to our Pacific Coast. I simply do not trust the Japanese psychology. I'm really afraid that the loyalty of most Japanese rests with Japan. But, to repeat, what can we do about it? They say sabotage has stopped. To my mind, that is an ominous sign that something big is being planned, and that the enemy doesn't want its agents spotted through ordinary acts of sabotage.

If, in your busy life, you find time to answer, I should appreciate it immensely.

Sincerely yours,

Dear Mr Hughes:-

I want to Thank You for
being the only Commentator on the Air
who has the Courage to tell The Californians
what they are up against with their so-called
American Japs.

I have been in Los Angeles County
for 38 years and for nearly as many years
I have been trying to get the natives here
to see what I could see ~~as~~ as long
ago as that, and to convince them that
a Jap is a Jap. Whether he was born in Japan
or in California. I have dealt with them and
I know whereof I speak.

About 3 months ago I met a young
Naval Officer on our Battleship Saratoga
This young fellow told me that he knew
that The Official Photographer at Pearl Harbor
was a Jap. This was 2 months before
Japan struck. (No wonder they knew all the inside.)

Now Mr Hughes for the real plan to finance the war.

I may be nuts but I am passing the Idea along to you to use as you see fit.

The Idea occurred to me that a grand idea to finance the war could easily be handled by asking Our President to read a list of all persons in the U.S. who are on a salary of \$30000 or over per year to give and really donate to the Treasury Dept. at least one week of his or her salary, this to include all Aliens who are here living on the fat of this land, and never pay as we Americans do; I think after all we will have to pay ourselves back eventually even though we buy Defence Bonds, Since we the people really sell these Bonds to ourselves, why not Everybody give something which need not be returned maybe you can start something maybe it will be a terrible explosion, but its worth trying. I feel out some of our high price keep. like oil, Congress etc. Ill be listening. Yours with brotherly

My dear Mr. Hughes,

Your program this morning was of great interest to me and my only regret is that I did not hear ^{all of} that part about which I write. May I ask a few questions?

How are we to go about "waking up" the Japanese danger here on the coast and then what should we do? Does that mean a stronger home guard? What should the citizen do to be on his guard and continue to be alert at all times? Do you mean extremes of sabotage or perhaps an armed uprising of ^{alien} Japanese against us? Is it a too vivid imagination working that causes me to ask if there may not be such a plan? Is the Federal Bureau of Investigation efficient enough to deal with all this, that is, is there danger of small numbers of Japanese landing at isolated parts

of the coast until they are of sufficient strength
to attack without the F. B. I. or some like department
being aware of it?

Any person of average mentality knows we
must abouse ourselves from this paradise of the
not-to-bright. What happens to people of the
democracies all over the world happens to us,
here. I hope that the American people still
have enough of that stuff to meet the ordeal
when it comes - here in this soft, fat, luxury-
loving United States. It seems to me that
we shall be much the worse for it if we
are not called upon to experience some of those
hardships, those cruelties which have been
the common lot of millions like us, who
were not to blame. It seems to go beyond
war, even war on these proportions.

I've written far too much even to a favorite
commentator. I don't go for the strutting ^{courses}
of the orator, nor the sugar candy of the
too-optimistic, but yield neither!

The article on treatment of Japanese
in this country versus American citizens
in Japan burned me up. Good gentle kind
Uncle Sam. He needs a mailed fist equipped
with brass knuckles to deal with Nippon
instead of a benignant raising of the hand
in blessing.

Is it possible that I may have an answer
to a few of my questions?

Would you take children
out of West Coast? I have
three. Two of my sisters in the
East would take them, I want to stay here.

Very truly

Dear Sir:

Your warning at 9 o'clock this morning against the danger from the Japs in our midst was very timely but please don't stop there.

I have sensed this menace for some time but like many others feel that "something ought to be done about it" and let it rest there because the individual doesn't know what he alone can do.

For Heaven's Sake get some group or organization to press the proper authorities to really curb all Japs here on the Coast before it is too late. Events in Hawaii should be all the warning needed.

Americans better wake up to the fact that they cannot continue to "muddle along."

Dear Mr. Hughes,

After listening to your broadcast this morning I felt impelled to write and thank you warning of the Japanese menace on this Pacific coast.

We always listen to your news broadcast every day and have noted your keen analysis of the situation in the Orient. Can we as individuals do anything to arouse our government officials to the danger of leaving these people at large? Or must we wait until they wreck our water supply, other public utilities, and our factories working on defense before we wake up and do something.

My husband would never patroize a Jap or let them buy of him while in business in Seattle. Neither of us would knowingly buy Jap goods. If only every one had done this, they could never have gotten such a hold on this coast area.

Please keep hammering at this most serio
serious situation until something is done about it.

My daily prayer for our officials whose duty it is to do something about this, is
"Open their eyes that they may see."

My dear Mr. Hughes,

I'm the person who always says, "I must write a letter about that." To Ernie Pyle. To the newspaper about Tony Martin and his easy berth in the Navy. To Mrs. Roosevelt, etc, etc. But I've never written one of those letters. However, at nine o'clock this morning I heard your warning about the Japanese menace in California.

My house is all upset — only as it can be upset when I take down Christmas decorations. However, I have stopped in the midst of everything to tell you that I was so impressed by the message referred to above that I am at last really writing a letter.

I am one of those people inclined to feel a little sorry for Japanese, tho' even in the past I haven't hired any to do any type of work. Your announcement made me sit up. I am writing to suggest that you

My dear Mr. Hughes:-

WE like the way you talk and believe in what you say. Please keep on hammering. Please tell us how we can protect ourselves and in particular how we can get at the politicians and wake them up to the fifth column menace in the country.

We were in Honolulu the summer of 1940 and we knew they were there -

WE were in California in 1940 also and know they are there.

What is this country thinking of to permit those dirty, yellow devils to fish, and grow vegetables - They could use poison, they could spy, they could and will do all kinds of damage - Why do we permit them such rights while our people suffer in Manila?

You keep on telling why - maybe it'll help.

The idea of those Japs living at Hot Springs - put the lot of them in concentration camps - treat them as men like they treat us as possible in accord with our Christian, gentle ways.

Wier them for what they are - cruel, cunning monsters deserving of no consideration.

We've gone all out for defense - let's get in for defense, also.

I understand the politicians want to keep aliens in defense industry - are looking the other way while the Communists have meetings and go on a membership campaign - just because Russia is fighting Germany doesn't make us agree to Communism - we've got to be vigilant in that direction, too.

We citizens who will be taxed and are spending all we can on defense - don't want this attended to. Thank you

Dear Mr. Hughes:

Wish to compliment you on your wonderful broadcasts of Monday and Tuesday, referring to Japanese situation in California. I called Mr. Ray Dady, Mgr. of station K.W.K. here calling his attention to your broadcast and asked him that it was in the interest of public safety, that our government be forced to act at once to correct this situation. It is up to men, who are able to bring pressure to bear on our congress to get busy immediately to stop ~~stop~~ this Japanese menace. And by that I mean the commentators who can reach the greatest number of people are best in position to help.

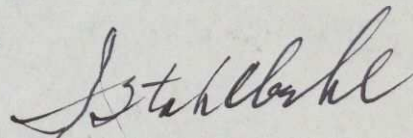

I wrote our Senator from this state yesterday, calling attention to your broadcast, and asked him to use his influence to help for an immediate plan for greater action by the F.B.I.

Our Boys are at the front fighting against odds, and why should this danger at our very door be permitted to continue. Surely, the American people must do their part to help here at home. Fifth Columnism must be destroyed without fail.

You are doing wonderful work to publicize this in your broadcasts, to bring home to the American people this dangerous situation. I hope sincerely that other commentators will cooperate to do this also.

With my best wishes for your continued efforts and success, I remain,

Dear Mr. Hughes-

Your "News & Views" has been one of the high lights of our radio program for years and we greatly admire your clear, concise, and courageous presentations of the news. We regretted the loss of your "Viewing the World from the West" that was one of the best air columns of either coast.

The Japanese Fifth Column danger has been much in our minds for

some time and your broadcast of yesterday Jan 5th was most timely. Is it possible to get a transcript of that broadcast? I would like to send it to various foreign-mind-people I know.

It seems to me that that is one way a stay-at-home mother can serve, as well as knitting and making dress-up. Less of both may be needed if we stop some of the trouble before it starts. Have you any suggestions how a private citizen can ~~make~~ draw attention to this Fifth column danger? We are westerners too and know how vulnerable the west-coast ^{power} air craft factories are, and light & water lines, to a cunning enemy. Most Americans look down on the Japs as somewhat sub-human which is true but they forget the unbelievable cruelty such creatures are capable of. I shudder to think of the bare men of Wake Island when they fell into the hands of the enemy.

3. If the evidence of that
missionary you spoke of on your broadcast-
(Jan 5th) would start working on the churches
and others on the women leaders ^{of the country} and how
about seeing Mr. Dies on to it. Some one
must kindle a fire under the FBI. I have
been told by Chinese friends that the loyal
Chinese in this country are organized into
a counter fifth Column to watch the
internal enemy.

If Walter Winchell started
to heat the Tom. Tom on this coast as
you do on the west, that might help. As
you are aware - the Atlantic Coast is as
regional in its interests as the middle west
and most of them do not realize the

Mr. John B. Hughes,
c/o Mutual Broadcasting System,
San Francisco, Calif.

My Dear Mr. Hughes;

Your "News and Views" broadcast at noon EST yesterday was of immense interest to me because of your treatment of reports from the Philippine war theatre concerning treatment accorded members of the white race by the Japanese armed forces.

I am by no means an authority on things Asiatic but some ten years ago after a residence of some seven years in the Philippines and South China I made a prediction; based upon personal observation and an alleged understanding of Japanese psychology; that any future war between the Japanese and any of the white races would be, from the Japanese standpoint, a war of proportions calculated to annihilate the white race if possible. In the intervening years I have seen developments which point directly to this theory and I firmly believe that we are now witnessing the beginning of a Japanese attempt to fulfill the destiny which every Japanese believes implicitly to be the ultimate achievement of the Japanese race. Namely, that the time will surely come when the existing world will be populated exclusively by the Yellow race and the Japanese will be overlords of all.

Fantastic as this may seem to we of the White race, I know from a word gathered in one place and a phrase gleaned in another that the Japanese people are psychologically inculcated with the theory of planning the future of the race not for a decade, a century, or five centuries but that every Japanese today is living, working, and striving for the future benefit of the race ten thousand years hence. If we are able to approach present conditions from the Japanese angle of thinking we may possibly be able to get some insight into the unimportance (from their point of view) of such dastardly acts as the Pearl Harbor attack, the bombing of the open City of Manila, and barbarous and inhuman treatment of white prisoners. Obviously, these acts will register as of no consequence to the Japanese when considered in the light of the ultimate "Karma" of the race some ten thousand years in the future.

A minimum of thought and logic on the subject should convince those of us who are capable of thought that the atrocities which are being perpetrated by the Japanese with no thought of concealment are comparatively minor as compared to those which are, almost certainly, being perpetrated where no living eyes save those of the Japanese are present to observe them. Is it possible, in view of the stubborn resistance which American and Filipino ground troops offered the Japanese advance, that there have been no AMERICAN prisoners taken in this war? Reports have reached us of Filipino prisoners who were marched to prison ships and then beaten across the feet with rifle butts to render them incapable of travel in the event they escaped.

Are we to believe that any American troops who fall into the hands of the Japanese will fare any better? It is my firm conviction that any American who should be so unfortunate in an engagement against Japanese troops as to find himself in a position so untenable that surrender was indicated should be prepared to sell his life as dearly as possible since he may be certain of death even after surrender. The Japanese are neither economically nor psychologically prepared for the maintenance of extensive war prisoner facilities and, if it were possible to know the facts, they would undoubtedly show that American soldiers are being slaughtered in the act of surrender or, if accepted as prisoners, are being executed at the leisure of their captors in ways no Occidental mind could conceive.

In view of what seem to be logical deduction, does it not seem to you that the American people should be educated (Propagandized, if you prefer) to the fact that we are engaged in a RACE WAR in the Pacific which may decide the ultimate fate of the human race? Your broadcast of yesterday was a step in the proper direction but there is much more that can and should be done to convince our people of the folly of the smug, self-sufficient attitude which is the national heritage of a large percentage of we Americans. I do not suggest that we should become worried about the ultimate outcome of the struggle but I do suggest that we should rise up in concerted national anger and disgust at our attackers and should be prepared to deal with them in a manner calculated to instill a genuine fear in their collective hearts.

Mr. Hughes; yours is an enviable position. I know of no man in the United States who is in a better position to make the country FIGHTING MAD than the position you now occupy. Literally hundreds of thousands of persons depend upon your "News and Views" broadcast to keep them in touch with important happenings and to supply them with explanatory comment. Isn't the situation such that this position could be effectively used to great advantage in the education of the American people to the really grave conditions which face us?

LET'S MAKE AMERICANS FIGHTING MAD. When we do, our enemies will find themselves in the unenviable position of the man with a wildcat by the tail. They won't be able to hold on and they won't Bare let go. Lets not forget that there's nothing quite so hard a fighter as a MAD AMERICAN.

In the event that you have read this far before consigning this letter to the waste basket, perhaps a short sketch of my own position might help to allay any suspicion that this was written by a professional crank or a dyed-in-the-wool calamity howler.

I am a member of the Armed Forces of the United States, hold a responsible position therein, have served a total of twelve years, and confidently expect to serve another eighteen years before retirement. I have never before written to any newspaper personality nor do I ever again expect to do so. In view of the signature and address attached to this letter you may be assured of my good faith and my confidence in your discretion since a letter of this type would undoubtedly meet with the disapproval of the War Department should the writer come to the attention of the Chief of Staff.

Hoping that what I have written above may bear fruit and assuring you of my sincere appreciation of your broadcasts, I am

Faithfully yours,

Mr. John B. Hughes-

Dear Mr. Hughes-

I have been listening to your broadcasts for some time past, and wish to commend your insistence as to our danger out here on the coast & especially in California.

Since I came out here to live twenty-two years ago, have been very much interested in this Japanese question, and I can

truthfully say that I agree with you whole heartedly, in your estimation of the dangers involved, and what should be done to combat them.

Please, keep on doing your best to make up a sleeping public, a squabbling bunch of politicians, and a procrastinating S.B.I.

Over a year ago I went to them and drew their attention to what appeared to me a rather dangerous situation over in the Valley, and at last accounts that situation seemed to be the same, and nothing had been done about it.

We are right in the middle of a condition that is filled

with dynamite, and I ¹²⁷
am no alarmist either.

Thanking you for your
enjoyable and comprehen-
sive work on the radio,

I remain

Dear Mr. Hughes;---

I was astounded to learn of the criminal negligence of the F.B.I in rounding up the enemy Japs on this coast. More astonished to hear that the Jap fleet would be allowed to resume operations. To whom can we send our protests? Can you not get some influential organization to back you up ere it is too late? Are the Newspapers doing anything? How about the Mayor of L.A? Or the women's organizations?

More power to you. Should we write to our congressman and senators?

Dear Sir,

We have been
interested listeners to
your broadcasts for a
long long time. But -
your talks of Jan 5 & 6 -
(Yesterday & today) have
been so good, - so in
accord with our views, -
I feel I must tell you
how heartily we endorse
all you have said.

We need more like you.
We need more realism
& less idealism, in
dealing with the Japanese

within our own borders.
Why does Mexico have to

Maybe we have many

My dear Mr. Hughes,-

I have just listened to your broadcast at 9 o'clock this morning which is alarming, to say the least. I am writing to know if it would be possible for you to repeat it again soon at a later hour in the day so that more people might hear it? If the Japanese menace to us out here on the Coast, is so great, do not our Congressmen know all about, and are not proper steps being taken to safeguard us from it? Also would it not be possible for this Mr. Young, whom you quoted and of whom we have heard before, to go to Washington, and have an interview with the proper persons? Valuable time should not be lost, and so I am taking the liberty to write

you, as you always seem so well
posted and in no sense an alarmist.

Thanking you, I am

Dear Mr. Hughes:

After listening to your last two broadcasts we cannot refrain from writing and saying "Hats Off to you Mr. Hughes"--please, please keep up the good work!. We would like to see every male Jap old enough to think up his treacherous tricks, put into a concentration camp (and not with 'all the comforts of home') or at least put under guard where they can be watched.

We wish that every commentator would do as much as you have to try to bring this terrible condition to the public. It seems to us that people like Mr. Young should know what they are talking about, and that people like us should have something to say about what happens to these enemies in our midst. It is all very well to be "sweet and light" but this is war and I'm sure that if we knew the truth we would never get the consideration under like circumstances from the Japanese. So please keep fighting, Mr. Hughes, and perhaps in time this big country of ours will follow the suit of our "backward" little neighbor Mexico.

Sincerely,

Mr. & Mrs. R. G. Moore

Dear Mr Hughes.

May I thank you for your faithfulness in hammering home, by radio, the facts concerning the activities of the Japs on our coast and inner vallies. Many are not yet aware of our danger, not only from the Japs who enjoy unbounded freedom, but the aliens of the other two Axis partners as well. It is ~~an~~ ^{this} group of, as yet, unawakened people that we are praying your messages may fall.

To the rest of us who do guess and know, it is inconcievable that officials who are actually in the "know" can so unconcernedly continue to give this enemy in our midst, their unrestrained freedom. I would class them as quickly as direct enemies of our country.

Isn't there a possibility that the public could be aroused by personal effort through group meetings and if necessary, door to door calling to get them to write demands to the proper influentials until they will do something about this situation? I mean concentration camps!

After your talk this morning I was so angry and filled with concern that I took it upon myself to talk to a minister and one of the P. T. A. presidents. Both have agreed to help me providing we can get help and advise to start the ball rolling. Rev. R.C. Rogers is going to bring the matter before the Ministerial Board tomorrow and will I think, write you also. P. T. A. president, Mrs F.W. Mitchell tells me the study group is a grand place to bring this thing and what to do about it. ~~is~~, if I can have some definite information for them. Also a very prominent P. T. A. woman is to be ~~here~~ the last of this month and Mrs Mitchell has promised that I get a chance to

get all ideas across to her. I can see it must be the women to carry this thing through and you know how we can work and demand when once aroused.

Please let us help you, tell us what to do. WE CHERISH our COUNTRY, our FREEDOM, our HOMES. We can not bear to sit idly by and see all this endangered by this ruthless group of fanatics in our midst.

Yesterday I took my turn at one of the 38 "listening" posts here in the valley. Day and night men and women who must leave labors and warm beds stand guard listening, watching and reporting every plane that it might be checked against enemy invasion. To my notion this is all to no avail if we fail to check the ground work just as thoroughly.

Please continue your efforts to get all facts into the public mind. Many of us are conscious but no one tells us what to do. I realize this to be a very delicate subject. How can we best handle it?

I understand our D.A. here is all for the camp idea but his hands are, after a fashion, tied. However tomorrow I have an appointment to see him. I am going to offer what assistance I can give, ask for his advice and eagerly await your instructions.

Sincerely,

Evelyn Kirby

Japanese in California. I
have thought them dangerous
it could be and yet had

One thought which has
so particularly troubled

should surely be alert to
every form of attack, and
this moved to a very simple

Perhaps this has been

As one who lived
in Japan for 30 years, please
permit me to make a slight
correction.

"The number of death" is not 7
which is shichi in Japanese,
but shi, which means four.

As shi is the word for death,
it is avoided as far as possible
in counting and another form
is used. A child of four is yotsu.

Ichii mi san shi 90
1 2 3 4 5

or
Hitotsu futatsu mitasu yotsu
1 2 3 4 itsutsu 5
are two ways of counting.

My dear Mr. Hughes,

I wonder if you could find time to give me more information about the Japanese in California, whom you describe as operating fishing fleets, and owners of property along the coast.

What is the status of these men? Are they not American born, or American citizens, through any other process? Is the F.B.I. allowing them to go free, and not be under the constant surveillance of their eagle eye? Truly yours, Harriet N. Jones

For some time we

that that Sumner Welles

the article in "Look

Dear Sir.

About four years ago I was talking with a Jap who had just returned from Alaska with a great many pictures he had taken up there. we started talking about the war in China And about the suicide Squad we than drifted on to the human torpedo and he told me how it could be controlled by a person on the inside but the person had to give his life he than told me that about Japs giving up there life in dive bombers and he said there were hundreds who would give their lives in a bomber. I than said to him that the Japs in this country that were born here They would not do that kind of suicide, And he said there were many right here in Seattle that would be glad to do it, no matter if they were born in this country or out it made no difference. when a Jap born here goes to our schools and when he finishes he than go to Japan

for further study. And I suppose this study would be in the Japs way of life. under the Japan teaching. I would not trust even any Japs born in this country, they would just as soon poison us as look at us, if they thought they were obeying their God, I cannot understand why the people of this country put so much faith in them knowing well what they would do for the sake of their belief. And when I was told by the Jap that the American Jap would die for Japan as well as for America. I am of the belief that we will be sorrow that we put so much trust in them before this war is over.

From Mr Hughes -

including me in ^{mailing} your list of
Mr. Jungs' letter -
- We need much more of such
to awaken California to its
"menace of the Japs."

The enclosed may or may
not have met with your
notice -

My Red Cross work seems so
little - can you suggest an
- other work for me as well -

Sincerely
Ray Simonds
