

Research Center for the Americas records Subseries 12.2 File Directory

This searchable document lists the digital files in:

Subseries 12.2: Disks

Access information

Open for research. Digital files are available in the UCSC Special Collections and Archives reading room. Some files may require reformatting before they can be accessed. Technical limitations may hinder the Library's ability to provide access to some digital files. Access to digital files on original carriers is prohibited; users must request to view access copies. Contact Special Collections and Archives in advance to request access to digital files.

Processing information

Files were transferred from 16 3.5-inch floppy disks, 3 Zip disks, and 4 CDs in 2018 by Special Collections staff. The original order of the files was maintained. Labels were transcribed from original carriers. Original carriers were retained and are stored in box 28.

Special Collections staff assigned each disk a unique identifier (such as ua0120_med_0001) for cataloging and file management purposes. This unique identifier serves as the folder name for the contents of each disk. See the finding aid for the transcription of the original disk label.

Note

Note that while many files in this subseries are identified here as Unix executable files, they are most likely data files, not executables. The Mac operating system interprets unknown file formats as Unix executable files, which is transposed on this file directory document. Contact Special Collections and Archives for more information.
