

Bruce Bridgeman papers

Subseries 1.2 File Directory

This searchable document lists the digital files in:

Subseries 1.2: Files from CDs

Access information

Open for research. Digital files are available in the UCSC Special Collections and Archives reading room. Some files may require reformatting before they can be accessed. Technical limitations may hinder the Library's ability to provide access to some digital files. Access to digital files on original carriers is prohibited; users must request to view access copies. Contact Special Collections and Archives in advance to request access to digital files.

Processing information

The majority of Bridgeman's digital files were transferred from his office computers via external hard drive to Special Collections and Archives in 2017. Additional digital files were transferred off CDs in 2019 by Special Collections staff. The CDs were retained in the collection. Special Collections staff removed duplicate files, student and personnel records, and other out of scope records. Files were not reformatted, and file names are original to the creator.

Note

Note that while many files in this subseries are identified here as Unix executable files, they are most likely data files, not executables. The Mac operating system interprets unknown file formats as Unix executable files, which is transposed on this file directory document. Contact Special Collections and Archives for more information.

See the [Collection Guide to the Bruce Bridgeman papers](#) for more information.
