

## Walter Hood Collection: Digital Files

This searchable document lists the digital files in the Walter Hood Collection, Series V. Digital Files, 1980-2011.

### General note

This file directory lists file name for each file, with file type listed afterwards if available. Folders are expressed as file paths.

### Access information

Collection is open for research. Digital files are available with advanced request in the Environmental Design Archives (EDA) reading room and are not available online. Boxes 4-8 contain the physical media (including compact discs, floppy disks, and hard drives) that digital files originated from. Access to digital files on original carriers is prohibited; users will be provided with access copies. Technical limitations may hinder the EDA's ability to provide access to some digital files.

### Processing information

Digital materials were processed in 2020 by Emily Vigor. Logical copies of all media were made using Data Accessioner and were analyzed using TreeSize. Temporary files and system files were identified and removed, and files were screened for personally identifiable information (PII). Files were not reformatted, and file names are original to the creator.

See the Walter Hood Collection finding aid on the [Online Archive of California](#) for more information.
