

Context Connection Time

Context, connection and time are the three themes that define the environment and landscapes of the Kallis, Carling, Schrage, and Kappe houses. The video depicts these themes as they appeared at the residences during the late summer and early spring seasons. Terrain, vegetation and structures provide the contexts that define physical and visual connections. Time is registered by the quality of light, edge and color, daily and seasonally. Temporal aspects also appear as evolving phenomena, affected by seasonal forces, and at the intersections of structures and organic elements.
