THE CONTROL PROGRAM

Never before in the history of the world has a democratic nation, battling for its life against three powerful dictatorships, attempted to take more than 100,000 of its residents--some aliens, most of them citizens--and place them quickly, humanely but firmly in guarded resettlement areas.

There have been great migrations before, historic movements, dramatic, terrible, or pathetic--the great mass exodus of the people of Israel from Egypt, the migration of the Acadians to Louisiana, the transfer of the Indians to their reservations, the flight of the Okies and the Arkies from the dustbowl. But none of these could compare with the American evacuation of Japanese from the Pacific Coast in 1942. Never before had a mass migration been conducted with such advance planning and under such extreme difficulties. The dustbowl migration in the thirties averaged 7,000 a month; the Japanese were to be moved 30,000 a month.

In December 1941, there were approximately 113,000 Japanese--72,000 Nisei or American-born and 41,000 alien Issei--in the four western states of California, Arizona, Oregon and Washington. Almost since December 7, there had been a growing demand that these Japanese be removed from the vital Western Defense Command and its strategic military and industrial centers. In some quarters, this demand called for the instant slaughter or at least imprisonment of every Japanese. In others, incarceration was urged of all suspected Japanese and complete freedom, under surveillance, for all others.

Here, mirroring the changing attitude of the public and the decisions of governmental authorities, is a brief record of what actually happened:
