INITIAL STANDARD HOSPITAL EQUIPMENT AND SUPPLY LIST

Dated May 1, 1942

This list follows as closely as possible the U. S. Army Station Hospital Equipment list for 100 beds for 9 months' supply (U.S. Army Medical Department item 97315 dated July 1941). It has been adapted to be consistent with the needs of a civilian hospital of 150-175 beds. When changes or additions have been made in the Station Hospital list, regular Army code numbers have been used so far as possible, such codes being obtained from the U. S. Army Medical Department Supply Catalog, items 70001, 70002, 70003, 70004, 70005, 70006, 70007, and 70009.

This list will require certain minor changes for hospitals of slightly smaller or larger capacity. Details for certain items will be furnished for each hospital. It will be necessary therefore to have a specific request for each hospital before actual ordering of supplies or equipment.

See attached sheets for details by class:
