SELECTED VARIATIONS IN THE SPELLING OF JAPANESE SURNAMES

By Robert Iseri, Statistician, November 1945

When difficulties are encountered in identifying a Japanese name, (1) the name may be misspelled, (2) the person involved may sometimes go by another name, e.g., a yoshi name (wife's maiden name which is taken by husband), maiden name, pen name etc., or (3) the records which are being referred to may contain the name, under one or more possible and correct variations.

In general, variations in correct spelling come about because of three factors: (1) The Chinese characters (which make up the name when written in Japanese) may have two or more quite different but correct translations, (2) persons with the same Japanese name may pronounce their names slightly differently, and (3) persons translating Japanese names may choose different letters to represent the sound of the Japanese name. More detailed explanations are given below:

A. Chinese characters which make up a Japanese name may be correctly pronounced in two or more ways, e.g., one character can be translated as UE, JYO, or KAMI; another character can be translated as TA or DEN. If these two characters are combined, several correct names are possible, e.g., UETA, JYODEN, KAMITA, etc. Reversing the characters, several more are possible, e.g., TAUE, TAKAMI, TANOE, etc.

B. Some persons vary the spelling of their names to make pronunciation easier, e.g., UEDA may be written as WEDA, OHARA as O'HARA, ENJO as ENJOW, UOZUMI as WOZUMI, etc.

C. When a name has two joining vowels (the second vowel is usually E), it is customary to place a letter Y between the two vowels, e.g., the name UETA may be written as UYETA, NAKAE as NAKAYE, SOEJIMA as SOYEJIMA etc. This is also true when a name begins with an E, e.g., ETO may be written as YETO, ENOKIDA as ENOKIDA, etc.

D. The first letter of the translation of a second character is often changed from a pure sound to a modified sound as follows:

K to G	SH to J	CH to J
S to Z	T to D	TS to Z
H and F to B or P		

For example,

UETA will often be spelled UEDA (or UYEDA),
TAKETA will often be spelled TAKEDA,
MIYAKAWA will often be spelled MIYAGAWA,
NOSAKI will often be spelled NOZAKI.

E. To lengthen the sound of the vowel O, it may be written as OO, OH, AU, OU, OHO or OW, e.g., OTA may be written OHTA, OOTA, AUTA, OUTA or OWTA.

OHOTO

F. When a name has a double consonant, the syllable TSU may sometimes be inserted in place of the first consonant, e.g., KITTAKA, BESSHO and KIKKAWA may be spelled KITSUTAKA BETSUSHO and KITSUKAWA.

G. When a letter Y appears between a consonant and a vowel, it may be changed to I or IY, e.g., RYUGO, may be written as RIYUGO or RIUGO and KYONO may be written as KIONO or KIYONO.

H. Other miscellaneous changes in spelling which may occur are:

HA to WA	U to WU	SHI to SI
FU to HU	O to WO	CHI to TI
KA to KWA	YU to U	TSU to TU
I to YI or WI	ZU to DZU or DSU	
E to YE or WE	JI to ZI, DZI, DJI, or DSI	

I. When the letter N is followed by another consonant, this letter may change to an M, e.g., KANBARA may be written KAMBARA, KANMORI may be written KAMMORI, etc.

The attached list of variations is far from complete. However, it contains enough variations so that clues to variations which are less common and not listed can be obtained. For example, suppose the name SUMIHATA cannot be identified. By referring to the names SUMITANI, SUMIDA, and SUMIKAWA in the list, it will be noted that the character for SUMI can also be translated KAKU, KADO, or TSUNO. Also by referring to such names as KOHATA, KUWAHATA, MIZUHATA, etc., it will be noted that HATA is sometimes spelled BATA, BATAKE, or HATAKE. Hence, by combining these syllable variations, the following possible variations for the name SUMIHATA are determined:

SUMIBATA	KADOHATA	KAKUHATA	TSUNOHATA
SUMIHATAKE	KADOBATA	KAKUBATA	TSUNOBATA
SUMIBATAKE	KADOHATAKE	KAKUHATAKE	TSUNOHATAKE
	KADOBATAKE	KAKUBATAKE	TSUNOBATAKE
