September 14, 1942

MEMORANDUM TO: Earl D. Watterson

From: E. A. Caldwell

Subject: Procurement Conference - Region

The purpose of this statement is to summarize the proceedings of the Procurement Conference held at San Francisco on Monday, September 7.

Generally, the purpose of the meeting was to instruct Procurement Officers as to the use of the unlimited authority for procurement, which is now being allocated to Project Directors. The major subject of discussion was the inability of our organizations to submit proper documents whereby the vendors could receive reimbursement for goods delivered. Particular stress was placed on the importance of clearing the receipt of merchandise as soon as it was received.

During the course of the meeting, the conference endeavored to follow the complete flow of a requisition. I particularly noted during this discussion, that the various projects represented were invariably using different procedures, for instance, in one case the Property Control Section of the project did not see the requisition until after the Procurement Officer had determined the method of purchase. Several recommendations were made by various officials and fortunately, I was able to report that the Gila River Project was adequately fulfilling all requirements stipulated.

Outside of the meeting, I had a discussion with Colonel Foy regarding the procurement, locally, of perishables, specifically bread, butter, milk, eggs and fresh vegetables. Not only was he in accordance with my theory regarding our ability to handle these functions locally, but he stated that the Quartermaster had been so burdened recently by exigency demands from the Army that more than likely they would insist that the WRA assume the immediate procurement of its perishables.

Also, I discussed with Mr. Mills personally, the subject of correlating property, procurement, and warehousing activities. He indicated that in some projects property and warehousing had been transferred to the Administrative Division and that the Procurement Officer had been designated by the Senior

Administrative Officer to direct these activities. Mr. Mills stated that if it were agreeable with the officials of this project, he favored the rearrangement of lines of authority in this manner. That is, to place the responsibility of warehousing, which in the past has been the responsibility of the Transportation and Supply Officer, under the Administrative Division, and directly attach it to a bonded property officer. I gathered from the conversation that there had been controversies regarding who should be the bonded property officer. Apparently some projects feel that it should not be attached to procurement activities; other projects feel that since the activities are so closely related, the Assistant Procurement Officer should be the bonded man.

While I was in San Francisco, Mr. Mills wired Major Clear in Washington asking that he approve some definite organization of warehousing and property under the Administrative Division. My only comment to Mr. Mills in this regard was simply that if property and warehousing were to be units under the Procurement Section of the Administrative Division, specific authority from his office should be issued to the Project Director. He agreed that this should be done and stated that as soon as a procedure was approved in Washington, such authority would be directed to Mr. Smith.

I might also mention that during the course of the meeting, Colonel Foy addressed the conference asking us to urge our Project Directors and Administrators to conserve Government-owned equipment. He stated that it was very difficult to obtain priority ratings for the recapping or purchase of new tires and that at the same time, since manufacturers have ceased replacement parts production, extreme difficulty would be encountered sooner or later, in the purchase of repair parts. He said that plans were in the making whereby individual projects would be given a priority rating quarterly. The procedure would be, as I understood it, to execute anticipated requirement forms, PD 408, for a 90 day period. This would be approved or disapproved by the War Production Board and a priority rating assigned to it, and the Project Director so informed.

To sum up the accomplishments of the meeting, briefly, we concentrated on means by which we could utilize unlimited open market authority without a specific priority rating. Actually, there were few suggestions which, in my opinion, will facilitate procurement locally. I justify this by the fact that we were instructed to apply for priority ratings by individual purchase, which in reality saves very little time over previous requisitioning procedure. However, I did specifically ask whether we could make this application directly to the Central Administrative Services and was informed that there was no objection to this procedure. Officials from the Central Administrative Services informed us that effective October 1, the Procurement Officer of each project will be given full authority to the

extent that he will be allowed to make full award up to and including $20,000. In the meantime, we were instructed to solicit competitive bids by use of Form 1033, if our purchases exceed $500, and attach these competive bids to the fiscal copy of the purchase order. These Forms 1033 would not constitute a formal contract but would be merely a means of competitive solicitation of bids.

Since the meeting was for only a one day period, I did not, for obvious reasons, have sufficient time to discuss all of the pertinent difficulties experienced on this project. I was pleased to be informed that the Gila River Project was, at the present time, issuing their purchase orders with sufficient accuracy for vendors to be paid without difficulty.

E. A. Caldwell
Acting Procurement Officer
