--NARRATIVE REPORT ON VOCATIONAL EDUCATION--

In Vocational Education probably the most significant developments this month are: the receipt of 40 standard typewriters, and a good quantity of auto mechanics tools and equipment.

The Office Practice classes are going ahead nicely in Canal Community. 26 persons there took the Civil Service Examination for Junior Typists and Junior Stenographers. Organization of Office Practice classes in Butte Community is now under way. In Butte, 22 persons took the Civil Service Examination for Junior Typists and Junior Stenographers.

In auto mechanics training, staff cars are providing excellent and practical opportunity for practice and experience.

The Vocational Training Committee has called in Section and Unit Heads for discussion of the trainee program and after very satisfactory discussions, have allocated the following positions for training purposes: Mechanics, Office Practice, Farm (Livestock), plant nursery, wood and metal industry, drafting, carpentry, electricians, plumbers, and painters. At the present moment the Vocational Advisor is supervising the Apprentice Trainee Program.

NARRATIVE REPORT

March, 1944

During the month of March enough tools were received to fairly well equip one auto shop and permission was received to purchase tools for the shop in the other community.

Mechanics classes in Canal have been suspended for two weeks while the building was re-wired to meet safety standards demanded by the Fire Department.

A mechanics instructor has been added to the staff and assigned to the Butte Community, but it appears that we shall not be able to retain him in this position.

Greatest interest is shown in the field of apprentice training where various project Division and Section Heads are now coming to the Vocational Training Committee asking for apprentice trainees.

NARRATIVE REPORT

May, 1944

Mr. Ernest W. Kennedy entered on duty as auto mechanics instructor May 20, is now engaged in setting up shop in Butte in conjunction with the new project garage.

The first full-time high school auto mechanics classes are scheduled to open June 12. Auto shops in Butte and Canal now are well equipped.

Mr. Ralph T. Othmer scheduled for transfer as Vocational Training Supervisor, July 1.

Project Vocational Training Committee is active and securing good cooperation from most other Section Heads. Demand for office help far exceeds possible trainee referrals. Prospect of increased summer training in office practice very poor due to resignation and leave plans of commercial teachers.

NARRATIVE REPORT

JULY, 1944

Significant development during the month of July was the arrival of R. T. Othmer to assume the post of Vocational Training Supervisor and the visit of Richard Johnson, Washington Vocational Training Supervisor, who spent one week on the project inspecting and assisting in organization work.

Mr. Kennedy, auto mechanics instructor, now has one high school auto mechanics class operating every afternoon and two adult education classes operating--one in Canal two nights a week, the other in Butte three nights a week. So far we have been unable to locate another mechanics instructor. When we are able to locate such an instructor, a full-time program can be set up in each community.

Enrollment in vocational classes has increased slightly. With the arrival August 1 of a refrigeration mechanic on the project, we look forward very soon to establishment of adult classes in refrigeration and cooling.

NARRATIVE REPORT

High school Vocational Training classes in Drafting, Industrial arts, Typing, Commerce, Bookbinding, Home Ec. and Camp cooking were dropped at the end of the Summer session, August 31, until the opening of school, September 11.

Conferences were held during the month with the Supt. of Education and high school principals, which resulted in more time being given for Vocational training in the high school program for the coming school year.

Progress charts are now in use in auto mechanics classes for high school students, also in trainee classes in the Motor Pool and tractor repair.

NARRATIVE REPORT

Through the efforts of Mr. W. C. Sawyer, Superintendent of Education at Gila River, the Arizona State Board of Education has agreed to sponsor classes in agriculture and allied subjects in this Center.

The local Vocational Training Committee met on September 11, 1944 and approved courses for Vocational Training in Electrical Refrigeration and Commercial Art. An outline of these courses are herewith inclosed for the approval of the Washington Vocational Training Committee.

Seven hundred ten students are enrolled in High School Vocational Training classes; ninety-one in job experience classes and sixty-one in learnership classes. A total of eight hundred sixty-two students of Senior High School age that are in some phase of Vocational work.

Trainee Program is restricted by failure of Washington to clarify cost accounting system so that trainees are charged to Education rather than training Division.

NARRATIVE REPORT

Our chief activity during the month has been an attempt to get a working program of cooperation under the Food Production War Training Program with the new lease of life given to it by the State Board of Education on September 30, permitting the Arizona Vocational Education Department to resume its supervision and support of FPWT activities on the Project.

Mr. Halbert Miller, State Supervisor of FPWT, spent the day on the Project on October 26. In company with Mr. Othmer, he contacted the Heads of the Agriculture and Transportation Divisions, visited the fields and shops, and set up a tentative program of classes for Washington approval. This Program was made to cover activities coming under this FPWT Program commencing the 15th of November and running through the last of June, 1945. If approved, this program will give a well-rounded Vocational Training Program support by Federal funds through State channels.

There are now on the project two persons who for five years made their livelihood from the production of ceramics. We are attempting to secure the necessary materials to construct kilns and mixers essential to their work. We believe that, for an outlay of not over \$400, we can start this work, giving both vocational and vocational training to several hundred persons during the next few months.

NARRATIVE REPORT: On separate sheet to be attached to this report, comment briefly on significant developments in the program during the month. This may include matters not covered in the statistical report or data supplementing it; changes in policies or procedures; problems encountered; matters relating to equipment, space and personnel; plans for new courses or apprenticeships; assistance needed on budget or technical matters; visits of vocational training officials; and anything else of note.

NARRATIVE REPORT

During the month the approval of the Washington office for Wartime Food Production Training was received for a budget of approximately \$6,000. Subsequently, the State Supervisor of WFTT came to the Project on November 21 and, after consulting with the affected parties, a program of training courses was set up and submitted to Washington.

Local authorities anticipate the approval of the program as presented. However, up to this date approval has not been received, and classes scheduled to start on December 4 will probably be postponed one week.

We feel very much encouraged about this program. Our concern now is in getting an adequate number of enrollees to justify continuance of the courses.

NARRATIVE REPORT

Gila River Vocational Training Committee met Dec. 15, 1944 and approved the following subjects in the War Food Production Training Program:

1. Operation care and repair of tractors, trucks and Automobiles.
2. Woodworking.
3. Elementary Electricity.
4. Repair, operation, construction of Farm Equipments.
5. Milk Production.
6. Poultry meat production.
7. Egg Production.
8. Pork Production.
9. Beef Production
10. Vegetable Production.
11. Production Conservation processing of food.
12. Field and vegetable seed production.
13. Soil and water use.
14. Training farm workers.

We plan to begin these courses January 2, 1945

VOCATIONAL EDUCATION

Narrative Report for Month Ending January 31, 1945

The Vocational Education Program, under the War Food Production Training setup, is developing slowly. Classes in Operation and Repair of Automotive Equipment, in Farm Electricity and Electrical Repair, and Farm Carpentry, Woodworking and in Conservation and Processing of Food are popular and well underway, but the other so-called production or classroom courses are meeting with no response whatever.

VOCATIONAL EDUCATION

Gila River

Narrative Report for Month Ending

March 31, 1945

Three courses were completed and two started this month in the Food Production War Training Program.

For the past three months new enrollments in the Trainee and Job Experience program have about equaled the number of students that have been promoted to full-time jobs and those that have relocated.

NARRATIVE REPORT: On separate sheet to be attached to this report, comment briefly on significant developments in the program during the month. Include matters not covered in the statistical report or data supplementing it; changes in policies or procedures; problems encountered; matters relating to equipment, space and personnel; courses completed during the month; number completing each course (male and female); plans for new courses; assistance needed on budget or technical matters; visits of vocational training officials; and anything else of note.

WAR RELOCATION AUTHORITY

VOCATIONAL EDUCATION

Gila River

Narrative Report for Month Ending

May 31, 1945

Two courses in the War Training Program were completed this month and three classes in this program that were scheduled to close in June were terminated as of the 31 of May, by order of J. W. Studebaker, Commissioner of Education.

Thirteen courses have been completed in the last five months under the War Training Program with an enrollment of one hundred eleven men and sixty four women.

Learnership

Two students, one boy and one girl, were advanced to part time employment, and two students relocated.
