COMMUNITY ACTIVITIES SECTION

PROGRESS REPORT

September 11, 1942
to
February 15, 1943

February 25, 1943

Submitted by
Tats Nakamoto, Director
Division of Coordination
and Information

WAR RELOCATION AUTHORITY
CENTRAL UTAH PROJECT
Topaz, Utah

COMMUNITY ACTIVITIES SECTION

I. INTRODUCTION

The War Relocation Authority, realizing the importance of leisure time activities, included within its organization one department designated as the Community Activities Section within whose jurisdiction lay various community organizations and leisure time facilities, such as the public library, religious groups and churches, adult activities, private agencies, and the responsibility of the fostering of various schemes for the promotion of recreational activity within our center. Justification for the establishment of this section may be found in the realization of the very limited sphere of activity in the daily life within a project center. Various pursuits of recreational activity which were enjoyed by all of us prior to evacuation and which are vitally necessary as an integral part of maintaining the moral well-being of an individual would not be in existence except through the efforts of such an organization.

An outstanding aspect of the general atmosphere in the project center is the apparent ebbing of American influence accompanied with the inevitable resurgence of Japanese culture as exemplified by the increased use of the Japanese language, the interest shown in various Japanese phases of life, and the predominant demonstration of the Japanese way of thinking. This slow transition was not welcomed by all

of the groups of the community, especially with the second generation populace born and reared in this country. The Niseis have never taken part or assimilated themselves into American community life and were not able to absorb traditions or identify themselves with American culture, except vicariously through literature, hearsay, and motion pictures. Yet the emphasis played by this group on American ways of living and thinking as exemplified by the use of American slang, interest in American sports, and the absorption of American social phases of life is a very strong indication that in spite of their Oriental background they are making a definite endeavor to follow in the trends of American normal life.

In view of these vital factors, we firmly believe that the establishment of the Community Activities Section is fully warranted and that the responsibility of this department are too great to be considered in a passive manner.

II. ORGANIZATION

In order to initiate the recreational program at the Topaz Relocation Center, the director of the Tanforan Assembly Center Recreation Program sent four members of his headquarters staff as part of the advance work contingent, arriving at Topaz, September 11, 1942, with the specific responsibility of investigating the possible ways and means of establishing some form of community activities for the evacuees to follow.

The four members were Mr. Tad Hirota, Director of Athletics; Mr. Fred Hoshiyama, Director of Boys' Activities; Mr. Bob Iki, Director of In-Service Training; and Mr. Kimio Obata, Director of Arts, Crafts, and Skills. Before any plan of organization could be formulated, it was evident that the recreational program at the relocation center could not be as extensive as that which was set up at the various assembly centers. Fundamental reason for this difference was in the fact that the assembly center there was no unified work program and the educational system was on an informal basis, thereby leaving a considerable amount of daily life for leisure time activities. However, at the relocation center, the school program being of a much more formal nature and with a definite work program established, the major part of the daily activities of the residents would be spent either on the job or at school. Consequently, it could be clearly seen that the recreational program must be concentrated in providing profitable leisure time activi-

ties after school and working hours, holidays, and on the weekends.

As the first step toward the organization of the Community Activities Section, the four advance delegates held several formal and informal conferences with the Chief of Community Services Division within whose jurisdiction lay the operation of the Community Activities Section. The outcome of these meetings was a realization that a section chief, preferably a Caucasian appointee, was necessary to act in a supervisory and advisory capacity necessary to coordinate the complete activity program. Due to the absence of an appointive member to fill this capacity, Mr. Kimio Obata was elected to take over the post convener for the Community Activities Section, assuming the responsibility of supervising and coordinating the complete activities program.

Fundamentally, the organizational set-up of the Community Activities Section is twofold. Of first consideration is a staff of limited number of recreational leaders in the field, concentrating their efforts in the activity halls located in various section of the community. These are the individuals who would come in direct contact with the residents of our community, and who have the direct responsibility of promoting leisure time activities in their respective districts. In order to perform the necessary administrative functions and to act in an advisory capacity in program planning and general operations, a large headquarters staff was established to aid the

field workers in all phases of the wide scope activities or this department.

Community Activities Headquarters:

The community Activities Headquarters is composed of seven principle divisions, each with its own responsibility and job specifications, and each under the jurisdiction of the director in charge and staffed with assistants.

1. Division of Craft, Hobbies, and Skill--In order to promote a profitable handicraft program and to develop inherent skills of the residents, this department is staffed by a group of specialists, each fully qualified to demonstrate and instruct in his particular field of handicraft; and whose specific responsibility is to conduct through the various activity halls in the center a program designed to promote development of the handicraft field such as model airplanes, woodcraft, pyrocraft, catalin craft, etc.

2. Division of Athletics--In order to coordinate all athletic activity on an organized basis in the center, the director of this department together with his staff of assitants has the responsibility of fostering tournaments of athletic competition on a block, district, industrila or campwide basis. The scheduling of all forms of organized athletics within the center or outside the center is within the province of this department.

3. Division of Art Production, Social Activities, and

Special Events--In order to promote, coordinate, and develop all forms of social recreation, this department was established, whose job is to sponsor special events and special activities on a camp-wide basis; also within the domain of this department lies the art production staff, whose specific task is to make posters, backdrops, and all other forms of art work necessary for the operation of the entire section.

4. Division of Group Work--This department has the primary responsibility of aiding the field workers in program planning and various other phases of group activities; this department also has the responsibilities of conducting In-Service Training for all recreational leaders in order to maintain the highest professional standards which is the basis of organization of the entire Community Activities Section.

5. Division of Supplies and Operations--In order to provide the proper maintenance of all recreational facilities and to be responsible for all recreational supplies, this department was established with a director in charge, assistants, and a maintenance crew. This department has also the responsibility of issuing permits for the use of recreation facilities by private groups, and also the proper clearance necessary when activities outside of the center are involved.

6. Division of Coordination and Information--The specific responsibility of this department is to coor-

dinate the activities of the other headquarters departments, and to assimilate all information necessary for the proper functioning of the entire section, to foster all private agencies, and to fulfill the vitally important task of public relations both interior and exterior. Inasmuch as all pertinent information relative to the operation of the entire Community Activities Section shall be forwarded to this department; an additional responsibility is the task of making daily, weekly, and monthly reports of the entire section.

7. Division of Adult Activities--In order to provide a complete activities program for the older residents of our community, this department was established and entirely staffed by representative first generation members of our city. This department has the responsibility of promoting all phases of recreational activity including entertainment, development of skills, group activities, athletics for the benefit of the Issei populace.

Staff Meeting:

A general staff meeting of all the divisional headquarters staff is held once a week to discuss current problems and make any recommendations or suggestions which may be of value for the over-all functioning of the activities program.

Activity Centers:

On the fundamental basis of carrying on all organized activities on a geographical basis thereby promoting the inhibition of pre-evacuation cliques and other minority groups, 4 activity halls were established in strategic sections of our community. Each hall was placed under the jurisdiction of a director in charge and was staffed with a limited number of recreation leaders having the specific responsibility to carry on all phases of leisure time activities. Each recreation leader has been delegated the task of fostering all forms of leisure time activities for a particular age group of residents.

In order to facilitate the work in the various activity centers, all equipment used at the Tanforan Assembly Center was obtained and distributed. In spite of the dilapidated condition of this recreational equipment, it formed a limited basis on which leisure time activity programs could be instigated.

The ultimate goal of this department is to set up a leisure time activities program in each and every block of our community. Due to various physical limitations such an extensive program is not feasible at the present time. However, in order to work toward this end, the directors of the activity halls have been working in close contact with the block managers in their district for recommendations and suggestions relative to the overall program.

This initial impetus toward our ultimate goal has been of vital importance in the analysis and solution of all problems.

Personnel:

An outstanding serious handicap for the proper operation of this department is the lack of adequate personnel to fill all the required positions. The reason for this shortage lies in the fact that many capable individuals fully qualified to fill the positions of recreational leaders have left the center for outside work or have been employed in the Education Department.

To alleviate this acute need, serious consideration has been given to the possibility of employing high school seniors on a part-time basis to act in the leadership field supervising grammar school children. But it is our firm belief that before such employment can be instigated, some form of pre-entry or in-service training in the field of recreation should be made available to these prospective high school seniors in the high school curriculum. If such a subject could be carried in the educational program, those interested in this particular field, with their enrollment in these classes, could be afforded the opportunity of practical experience in the recreational field on a part-time basis.

In view of this serious lack of leadership, a large number of volunteer workers have been employed to carry on even to a small degree the programs in the activity halls.

III. PROGRESS OF WORK

DIVISION OF GROUP WORK:

This department primarily concerned with the recreational program in each of the activity halls, completed at the time of its initiation a physical survey of facilities available for the carrying on the activities program.

A typical recreation hall contained nothing more than three large coal stoves and two or three dining tables with benches, and the total initial equipment comprised of a few wellworn-out decks of cards, several table games, and a few patched ping pong balls which were all salvaged and transported to this community from the Tanforan Assembly Center. In spite of this tremendous handicap, the recreation leaders had been carrying on their program borrowing privately owned equipment whenever possible or conducting phases of activity which do not necessitate the use of any equipment.

It was not until approximately three months after the initiation of the activities program that equipment of any kind was forthcoming through requisitions placed via the proper channels. The financial aspects have been a tremendous obstacle in the path of the smooth functioning of the operation of this department. The entire activities program has been conducted without the assistance of a definite petty cash fund, although various sources of income to establish such a cash fund has been investigated but to no avail. Inasmuch as the older residents of our community

had no difficulty in gathering funds to support their own activities, the adult program for the younger people has not been as extensive as that desired. We believe that serious consideration should be given to the possibility of raising financial aid to carry on the much needed program for the benefit of the younger residents of our community.

Each activity hall is maintained between the hours of 10:00 a.m. to 9:30 p.m., 7 days week. A typical day within an activity center is as follows:

Morning: Staff meetings, program planning, In-Service Training

Afternoons during school hours: Activities for adults such as handicraft, paper flower making, etc.

Afternoons after school hours: Organized indoor activities such as table games, ping pong, group games, Organized outdoor athletics such as volleyball, basketball, and football.

Evenings: Indoor activities in the form of table games, social recreation, exhibitions, and tournaments, etc. Each activity hall sponsors special events on an average of twice a month. Usually in the form of a community-wide dance, variety show, rally, or exhibition.

In order that activities program shall meet with the highest professional standards, all recreation leaders have been attending In-Service Training Classes 5 hours a week. In addition, plans are being formulated for an incorporation for a first-aid class for all interested parties for which the attendance of all recreation leaders shall be compulsory.

DIVISION OF SOCIAL ACTIVITIES AND SPECIAL EVENTS:

When the first advanced contingent of two-hundred workers arrived at the Topaz Relocation Center, it was evident that even before the organization of the Community Activities Section was initiated, some stop gap phase of recreational activity was imperative. To fulfill this acute need, on the third day of arrival, an informal dance was sponsored with the aid of resident volunteers who obtained the necessary equipment for the affair. The following day, Sunday, Church services were held for all of the workers, and a softball game was promoted in the afternoon.

With the impending arrival of the balance of the evacuees from the assembly centers, the temporary Community Activities Section Staff, now organized, formulated plans for aiding in the daily induction of the new residents. A drum and bugle corp was formed among the employees of this section, and this group provided proper reception of each contingent of arrivals at the induction center, creating a heart-warming atmosphere which was most gratifying to the evacuees after the long arduous train ride from the assembly center.

Mass meetings were held for each new contingent for the purpose of getting them all acquainted with the administrative staff and informing them of the basic principles and policies of the relocation program. The work accompanied during this trying period for the new arrivals was a tremendous contribution to the uplifting of the general

"mental climate," and had a most gratifying effect upon all of the people concerned.

Embarkation in the field of social recreation was initiated during the first weeks of October when the first public community-wide dance was held in one of the dining halls with the equipment borrowed from one of the residents. Since that time, dances have been held on the average of once a month, usually on some holiday or other timely occasion.

Most popular of social activities with the residents is a variety or talent show consisting of a series of spot acts in which talent from the community is incorporated into a program of approximately an hour and a half in duration. Series of these variety shows sponsored by this department were presented for the residents in the nearby community of Delta, Oak City, and Hinckley constituting a major contribution towards the promotion of good will with our neighbors on the outside. A typical variety and talent show program is as follows:

1. Vocalist
2. Jitterbug dancers
3. Ventriloquist
4. Tap dancer
5. Harmonica soloist
6. Classical vocalist
7. Tamborine dancer
8. Magician
9. Boys' chorus

These variety shows presented in the nearby cities were enjoyed by an audience of from 300 to 500 residents of their respective communities. Enthusiasm shown by the response is

a certain indication of its success.

One of the most successful pep rallies sponsored by this department was that in conjunction with the annual football games between the University of Stanford and the University of California. Inasmuch as the majority of the residents of this community were formerly from the Bay Area section in the State of Californian, tremendous interest and enthusiasm was shown as to the outcome of this all important game. Appropriately, this division sponsored a huge big game rally on the eve of this game with a program consisting of community singing, leading of yells, and alumni speakers.

Probably the most ambitious undertaking of this department which we believe to be the epitome of all social functions to date was a three weeks' program conducted over the Christmas Holidays. With a schedule consisting of all forms of activity from athletics to social recreation and exhibitions to game tournaments, this holiday program was received most enthusiastically by the residents. An outstanding aspect of this program was the cooperation of all work divisions of our community, each doing its share of the responsibilities required for its success. The highlight of this program was a gigantic Christmas Pageant, "The Other Wise Man," under the direction of Mrs. Harry Kingman of Berkeley, California, who came to this center specifically for the purpose of its presentation. Two performances of this pageant were presented in English and one in Japanese for the benefit of older residents of this community. In order to present a

better concept of the scope of activities carried on throughout the Christmas Holidays, a calendar of events is included at the end of this report.

A very popular phase in the field of social recreation conducted by this department is folk dancing which has had the enthusiastic response of the residents between the ages of 20 and 35. To date, twelve folk dancing programs held in conjunction with various types of get togethers such as parties social dances, and so on, have been presented with an average of approximately 75 residents participating.

The Topaz Dance Band, composed of resident musicians, has played a very important part in the various phases of social recreation. It has also played at a Delta High School dance, February 16, 1943. Due to the enthusiastic response of the residents of that city, they have been invited to play again for the county War Bond Drive dance. The members of the band have given their services voluntarily to practice after working hours and have played a major part in the success of the various dances held throughout the community.

ART PRODUCTION DEPARTMENT:

A very important cog in the function of the machinery of the Community Activities Section is the Art Production Department with a staff of 8 very versatile artists. This department has been handling the remendous task of producing all necessary art work for all phases of the Community Activities Section, and in addition for other departments of our community.

It may be well to point out at this time the significant difference in the type of work accomplished by this department and that which comes within the category of "sign painting." Sign painting and printing in the strict sense of a word is so done automatically by mechanical means such as stenciling, whereas, sign painting produced by the art production department is a commercial art whereby the work is accomplished by brush and paint entirely by hand and which incorporates the personal touch and techniques of the individual doing the work.

During the period of the preceding five months of activity, the art production staff has turned out approximately 3500 signs of all types with an average of 200 man hours of work weekly. A partial list of the type of work done by this department is attached at the end of this report.

In order to maintain the highest standards of art production, the entire staff has been attending two hour seminars five days a week to gain more information in this

particular field. This seminar has been conducted by the director in charge with the assistance of individuals particularly qualified on any one phase of art work.

DIVISION OF ATHLETICS:

In the field of athletics, tremendous progress has been made especially due to the enthusiastic response of the residents in this particular area. From the very first week-end following our arrival in this relocation center, exhibition games, inter-block and inter-center athletic competition has been carried on and enjoyed by the entire community. Softball games between the female residents and the older male residents have been very popular. In addition, softball, football, and basketball have met with enthusiastic response on the part of the younger residents of this community. As part of the Harvest Festival conducted during the Thanksgiving Holidays an inter-district co-recreational volleyball tournament, several softball games, and an exhibition of touch football was conducted. In conjunction with the Christmas Holiday Program, several athletic contests were conducted ranging everywhere from ping pong tournaments, tug-of-war contests, marathon, speedball, softball, and football exhibition games, and co-recreational volleyball tournaments.

For the first three months of operation of this department, the proper functioning was seriously handicapped due to lack of athletic facilities. Games were still conducted, using the well-worn equipment of the assembly center and limited facilities constructed by the residents in various areas of the community. However, by the middle of January enough basketball facilities were available to initiate an industrial basketball league with teams representing

various work divisions of our community participating. This activity has met with the tremendous response of all groups of our city, and the keen competitive atmosphere which accompanies each contest is a gratifying indication of the success of this program. Concurrently, initiation of athletic competition with high schools of the neighboring communities was effected, and an average of three or four different basketball teams representing work divisions of Topaz traveled to Delta, Hinckley, and Oak City to engage in basketball contests with the respective high school teams. We feel that this again is another outstanding factor in favorable public relations work.

To fulfill the demands for winter sports activity, this section with the cooperation of the Landscape Architectural Department, constructed a gigantic ice rink, 400 x 440 feet, in the recreational area south of the City of Topaz with the help of resident volunteers. This rink was completed and informally opened to the public on January 4, 1943. With weather permitting, the rink has enjoyed an attendance of approximately one hundred fifty skaters daily. The entire ice skating program was placed under the supervision of the winter sports director and his staff of maintenance workers who were given the responsibility of instruction, direction, and maintenance of the entire activity and its facilities.

In conclusion, we believe that the athletic program has met and fulfilled the demands of the residents of our community, particularly those of the younger group to whom recreation

and all forms of athletics are synonymous. With the advent of the spring and summer seasons, we believe that the demand for athletic activity adapted for those particular seasons will be exceedingly great, and consequently plans are now in the formation for an extensive program of athletics suitable during that part of the year.

DIVISION OF COORDINATION AND INFORMATION:

The first task confronted by this section was the ascertaining of the approximate age groups of each block in our community; the interest of the residents of each block; and investigation of the possible talent inherent in various individuals who could possibly be called upon to act on a voluntary basis in the recreation program. Consequently, an information survey was conducted by this department consisting of distribution of survey forms to each individual in the community, requesting pertinent information in regards to interests and inherent capabilities. This survey was completed in approximately three weeks, and all necessary information was compiled and assimilated to be used for the benefit of all sections. As a result of this survey, recreation workers in the field were able to determine the number of individuals in the various age groups, thereby, forming a basis for program planning.

As an additional task of this division, daily, weekly, and monthly reports of the entire activities program have been compiled and submitted. Statistical data have been compiled to provide information for adequate program planning the future. A staff member has been assigned to the specific task of carrying on research work, investigating all sources of reference materials, and negotiating with other Centers for an exchange of ideas to gain additional information to be used for the benefit of other departments of this section. The field of Public Relations lies within the province of this department, including the

responsibility of making all necessary outside contacts, and keeping the public, both interior and exterior, properly informed to activities of this section.

In order to foster cultural discussion groups among the residents of our community, a community-wide forum was sponsored during the month of December for the purpose of presenting to the people, all pertinent problems of direct interest. Such vital topics as the cooperative movement, student relocation, and resettlement have been the principal items on the agenda of these discussion groups. Speakers well qualified on the subject at hand were invited to inform the residents on all phases of the particular subjects. A speaker's bureau has also been sponsored by this department. The organization consisting of residents well qualified in particular fields, and who have had experience in a certain line of work. Primary purpose is to encourage the people of this community to participate in discussions which may stimulate the thinking process.

The outstanding private agency group within the jurisdiction of this department is the Boy Scouts of America. This movement was instigated in November, 1942, as a result of a meeting with Scout officials representing the Utah National Parks Council. Subsequent to this meeting, foundations were laid for the establishment of four Boy Scouts Troops in this community, each within the four districts, thereby, establishing this movement on a geographical

basis in order to inhibit former locality troop identity. One activity hall designated as the Boy Scout lodge has been completely turned over to this activity. All phases of the Boy Scout movement is carried on at the Scout Lodge including handicraft, outdoor activities, athletics, and educational pursuits. In addition, a Cub Scout movement is being sponsored to care for the elementary school students of this city. The Boy Scout drum and bugle corp has been organized and is called upon to participate in all camp-wide functions such as civic affairs and entertainment shows. During the Holiday program, the Boy Scout made an outstanding contribution by spending two weeks in constructing Christmas toys for younger residents of the community. This toy making program has been continued to supply the preschool nursery with the much needed equipment. An outstanding contribution toward Public Relations has been made by the Boy Scout in having informal get-togethers with the Scouts of the neighboring town of Delta. Majority of leadership in the Scout movement has been done through volunteer workers who have unselfishly devoted their spare time toward the fostering of this worthwhile cause. The national Scouting program has been followed, and the participation has been exceedingly gratifying. Scout Sunday and the observation of Scout week has been conducted with over 100 Boy Scouts participating. Inter-troop competition has been fostered in various scouting activities.

In the field of religion, four principle denominations

have been established in the City of Topaz. Namely, Protestant, Catholic, Seventh Day Adventist, and Buddhist. The protestant Church has a weekly attendance of approximately 1700, having the services of 13 resident ministers; Buddhist Church has a weekly attendance of approximately 1500, and the services of 6 resident ministers; the Catholic Church and the Seventh Day Adventists have a total weekly attendance of approximately 300, with one minister in charge.

The Topaz Public Library was formally opened in December 1, 1942, with approximately 5,000 books with a staff of 8 people. The library building has been a haven for literary minded residents, enjoying an attendance of approximately 2500 people weekly. To provide for the older residents, a Japanese section library has been established with an estimator 1500 volumes. A special activity of the library is a record concert sponsored weekly with a purpose of bringing to the resident, a program of recorded concert music.

DIVISION OF HANDICRAFT, HOBBIES, AND SKILLS:

In order to conduct a sound recreational program, some provision must be made to foster the development of self-expression in the creative field. This department has made a tremendous amount of progress toward making a major contribution toward this activity.

Although the handicraft program had been conducted on an informal basis throughout the various activity halls, it was not until the month of December when it was definitely placed on an organized basis. Model Aircraft Division was established under the auspices of this section, staffed with several qualified individuals particularly interested in the instruction, demonstration, and construction of model airplanes. As part of the department, a hobby shop was established to furnish the residents an opportunity to purchase at cost, materials necessary in this particular activity. Several model airplane clubs having an enrollment of many of the younger residents of our community were organized in each of the various districts, holding meetings to discuss plans for the promotion of this particular activity. Several exhibits of model airplanes have been held, and instruction classes have been initiated for the benefit of all those desiring to obtain more information in this particular field.

Various other phases of handicraft work are carried on in the activity centers such as braiding, pyrocraft, wood-carving, catalin-craft, paper flower making; toy making, and metal-craft, each under the supervision of an instructor.

To fulfill the demand of a large group of the residents, bridge tournaments have been included as part of the activities program. This particular activity was first initiated in December, and a response shown at the first city-wide bridge tournament definitely warranted the inclusion of this particular activity in the recreation program. Consequently, a bridge instructor and tournament director was added to the personnel, and bridge tournaments and classes have been conducted on the average of three or four evenings each week. Each affair enjoys the attendance of approximately seventy-five participants and over one hundred spectators. In order to service all the residents of our community, these tournaments are held in various dining halls of the city in order that residents of all sections may participate.

DIVISION OF ADULT ACTIVITIES:

With the basic principle of servicing all groups of our community, and cognizant of the vital need for some form of activity for older residents of our community, this department of the Community Activities Section was established. The activities of this department were planned to include all phases of recreation which were designed and formulated for the younger groups of this community. Consequently, the scope of the program planned include entertainment, athletics, table games, cultural pursuits, indoor activities, and group discussions. The department, initiated at the time of the instigation of Community Activities Section, has been progressing very smoothly, and its activities have been broad and profitable, from the standpoint of older residents of the city. In the field of Japanese entertainment, this department has sponsored on the average of two Japanese entertainment shows weekly, presented in various Dining Halls in the community in order that the residents of that particular section may enjoy the performance. These events have been promoted solely through the employment of resident talent and volunteer workers, donating their services willingly in order to present to the populace, an entertainment show worthy of their consumptions. Each of these entertainment shows has enjoyed an attendance of approximately 700 enthusiastic residents, which completely justify the continuation of this particular activity.

In the field of adult athletics, softball games have been conducted from time to time which have been received

enthusiastically both by the spectators and by the participants. Judo has been very popular, with one recreation hall devoted exclusively to this activity. Instructions and demonstrations of this particular art has been enjoyed by a weekly attendance of almost 300 residents. Two recreation halls have been set aside for table games and classical singing. Goh and shogi, the most popular of the indoor activities has enjoyed an attendance of over 2,000 interested residents weekly. The indoor game of karuta has received the enthusiastic response of the older female residents of this city in weekly tournaments being held with an attendance of approximately 150 people. During the Christmas Holiday program, the adult activities section sponsored six adult entertainment programs, several goh and shogi tournaments, judo exhibitions, classical singing performances, servicing during three week period, a grand total of 14,500 people.

We believe that we can definitely state without fear of contradiction that the recreational program for the adult residents of the populace is greater in scope than that which was ever hoped for. Thanks to the untiring efforts of the director in charge, and his efficient staff, we have been able to present to the Issei residents of Topaz an activities program well rounded out in all particular fields. The enthusiastic response received, and the eager participation in all the events sponsored, is a definite justification and an added incentive for the continuation of this particular division.

DIVISION OF SUPPLIES AND OPERATIONS:

In order for the proper functioning of the entire Community Activities Section, it was vitally necessary for a department to be established with a responsibility of obtaining supplies and material, of performing the proper maintenance of all recreational facilities, and to perform in a most efficient manner the proper disbursement of supplies and materials.

Initial task of this division was to obtain an inventory of supplies and facilities available at the time that the leisure time activities program was initiated. Upon investigation, it was found that the only equipment available was that salvaged from Tanforan Assembly Center Recreation Program and transported to Topaz. In spite of the worn-out condition of this equipment, it was distributed to the various activity halls for use in carrying out their program. This consisted of mainly five ping pong tables with allied equipment, table games, and a limited amount of outdoor athletic equipment. It was evident that there was an immediate need of construction of outdoor athletic facilities such as volleyball courts and basketball courts, baseball diamonds, etc. The construction of these facilities was hampered by the serious lack of raw materials in spite of the fact that volunteer help was available in all cases. It was not until approximately three months later that four basketball courts were constructed and three volleyball courts made available to the residents of the community.

It may be well to point out at this time the general set up relative to the allocation of recreation halls in our community. Although there is a recreation building in each block of our city totaling 36 in number, many of them are being used for office buildings and other purposes in the various work divisions of the camp by Administrative order. 17 halls have been allocated to the Community activities Section of which 5 are used by the religious groups and one by the Topaz Public Library. Consequently, there are only 12 recreation buildings available in the entire community to carry on the widescope activities of this section.

This division has handled all requisition for supplies and materials, starting this very important task, concurrently with the initiating of the entire Community Activities Section program. To date, this office has passed through the proper channels, approximately 136 requisitions for supplies and maintenance work. The results have not been too gratifying, due to the necessary time and delay involved before delivery of the supplies requested. To date, approximately 36 of the requisition have brought results. However, this department has been performing the Herculean task of maintaining all the facilities of this department with a skeleton crew.

The office of clearance which lies within the jurisdiction of this department who has the responsibility of issuing permits for the use of Community Activities Section facilities. Private parties have been serviced with the

use of activity halls at an average of one weekly, providing them with the hall with all of its facilities.

Since January, all educational trips outside the Center have been handled by this department, obtaining the necessary clearance and transportation facilities for private groups wishing to embark on such a trip. To date, educational trips have been enjoyed by over 500 of the residents, leaving each weekend for nearby areas surrounding the center.

In order to keep an accurate inventory of all our equipment for this section, a warehouse was established with a foreman in charge. All equipment allocated to this department has been properly marked and labeled before disbursement to the various activities hall.

An important sub-division of this department in the technical staff having the responsibility of supplying public address systems, stage lighting, and other electrical apparatus necessary for the presentation of the various activities. Although the Community Activities Section does not own a public address system, we have been fortunate in being able to borrow suitable equipment of this nature from some of the residents of the community. This entails the payment of a small rental fee for the use of these facilities, which we believe justifiable. Serious consideration should be given to the possibility of allocating to our section a suitable public address system capable of playing major part in our program plan.

This office has accomplished a tremendous amount of work, efficient distributing and maintaining the limited amount of recreational facilities in use at the present time. The entire staff of this office is to be complimented in the professional manner in which the various tasks have been handled and accomplished.

CONCLUSION:

In retrospect, considering the serious handicaps of limited facilities encountered in the operations of this department, we believe that we can safely say that this tremendous task of the past five months has been accomplished with all the success that is to be expected.

In spite of the numerous obstacles confronted, such as the limited number of personnel, the decrepit condition of supplies and materials available, and the existing facilities, it is the belief of all parties concerned that the Community Activities Section Staff is to be complimented on the manner in which the problem has been approached and the accomplishments made towards the solution of these problems. The progress made during the last five months has been accomplished in the line of maintaining the following basic principles of a sound recreational program:

1. To be a true recreational program, it must be camp-wide.
2. It must serve all groups and ages.
3. In its operation it must maintain the highest professional standards of performance.

On the basis of the accomplishments made and the records of operations for this past period, we believe that an optimistic outlook of the future of the department is justified.

The entire Community Activities Section Department is in accord with the belief that a sound recreational program is not a panacea or a remedy for the elimination of the degenerating effects of delinquency, but, we sincerely

believe that the leisure time activities program conducted in Topaz has been a tremendous contribution towards that end.

REPORT ON COMMUNITY ACTIVITIES

by Hugo W. Wolter
March 11, 1943

The Community Activities Section includes the whole range of formal and informal associations and leisure time pursuits in which the residents take part. In general, these activities are initiated by the residents themselves and are under their direction. The Community Activities Section serves to facilitate and coordinate such activities in order to avoid confusion and duplication. The C.A.S. serves both as a Public Recreational Department and as a Coordinating Council.

The C.A.S. is vital to the community since it attempts to substitute wholesome activity for the tendency is to let the "devil find work for idle hands and minds." It urges participation in group organization and government. It challenges initiative to produce out of enthusiasm and in the face of great limitation, articles of usefulness and beauty. Its basic function is educational, introducing as a leisure activity such skills, abilities, and attitudes which will be useful in resettlement. The organization of its clubs and general structure provides for participation in democratic procedures and government.

The C.A.S. is organized under a Council composed of lay representatives of clubs or organizations, issei and nisei representatives of blocks, and members of the professional staff who are invited to become members because of their vision, objectivity, and abilities. The Council elects an Executive Committee of not less than five which in turn appoints the following committees: Facilities, Research and Survey, Finance, Personnel, and Training. The staff is divided into several divisions with specified responsibilities. They are: Formal or Classes in skills; Clubs and Organizations including interest groups, issei, nisei, women's, boys', and girls', and National Affiliates--Boy Scouts, Girl Scouts, American Legion, Red Cross, Y.M.C.A., Y.W.C.A., Federated Women's Clubs, etc. as they can be developed; Library; Toy and Game Library; Community Events--movies, dances, parties, etc.; Athletics; and Children's Playgrounds. The C.A.S. cooperates with the other departments in the use of space, equipment, and in planning for church, educational, or health programs.

The staff varies in size from 125 to 150 according to seasonal requirements in the two communities. It is supervised by one appointee in each camp. In addition, a large number of volunteers assist as club leaders, team captains, and informal hobby group leaders. At present there are 35 clubs, 37 basketball teams, 20 hard ball teams, and a tremendous number of other teams and informal activity groups.

CLUB ACTIVITIES REPORT

GIRL SCOUTS OF AMERICA

Organization: The first meeting of former Girl Scouts Leaders and those interested in scouting was called on September 15 with 12 present. Troops were gradually organized as interest grew and leaders were obtained. Miss Ruth Stephensen member of the National Field Staff (910 Public Service Bldg., Portland, Oregon) was with us November 9 and 10 to help us in organization.

Leadership: Until the end of February, Mrs. George S. Kashiwagi was Girl Scout Supervisor, and under her direction, a Leaders' meeting was held once a month. Since her departure for Denver, we have been without a supervisor.

Troops: Section I & II Mitsuko Hino, Leader 5-7-E
(Intermediates) Isako Takahashi, 5-11-E
Meetings held Saturdays, 7:00 PM in Rec. Hall 4

Section III Mrs. Masako Takayoshi, Leader 17-
Hideko Tsutakawa, 17-9-E
Kiyo Nagai, 17-4-B
Meetings held Saturdays, 4:00 PM in Rec. Hall 16

Section IV Edith Suzuki, Leader 24-11-A
Pearl Aoyama
Meetings held Saturdays, 1:00 PM Rec. Hall 28

Section V Meetings held Fridays, 6:30 PM
Rec. Hall 36

Section VI Mary Wakai, Leader 24-3-C
Meetings held Saturdays, 3:30 PM Rec. Hall 36

Section VII Chizuko Ikeda, Leader 38-12-F
Mitsuko Hayasaka, 40-2-B
Meetings held Wednesdays, 6:45 PM
Rec. Hall 40

Section III Kazue Higo, Leader, 19-5-B
(Brownies) Kiyo Ueda, 10-3-GD
Meetings held Saturdays, 1:30 PM in Rec. Hall 16

Section V Mary Yokota, Leader, 32-10-C

We have a membership of approximately 100 girls.

Finance: Each troop is financed by its troop dues. A sum of \$6.90 was given to the organization to buy handbooks and publications. The Seattle and Portland Girl Scout Councils have both sent materials and books, while a friend troop in Connecticut also sent books.

Outstanding Activities:

1. Campwide Bonfire, October 16th
Attendance 150
2. Parent-Scout Party, December 12th
Attendance 175 - Games, skits, etc.

Future Plans: It is hoped that leadership may be secured from some of the wives of administration staff members, when they move on to the project since so many of our leaders will be leaving soon. We would like to call in a Scout leader from a neighboring city, such as from Pocatello, to direct a leadership training course.

RED CROSS

Organization: After a preliminary meeting with Red Cross officials and Mr. Townsend, the first official meeting was November 24, 1942 with 14 present. Mr. Forrest V. Stewart, State Director, explained the Red Cross program in general. Several other meetings were held with him, and it was felt first aid and home nursing courses could be given here.

Leadership: At the first meeting, Mrs. Yone Arai, 22-9-A was elected temporary chairman, and Hattie Kawahara, temporary secretary. Mrs. Mary Nakamura has replaced Miss Kawahara as secretary and Hiroshi Sumida and Dyke Miyagawa were selected as treasurer and publicity chairman, respectively.

Activities: A very successful War Fund Drive was held the weeks of March 7 to March 20 under the leadership of our treasurer, Hiroshi Sumida. Through the cooperation of the Block Managers who named solicitors for each block, and with the help of Mrs. Light and teachers, donations were collected amounting to \$2600.56.

In cooperation with Mrs. Evans and the hospital, a Home Nursing Course is to begin sometime in May with Miss Natsuko Yamaguchi, appointed by the Red Cross as intendant nurse to conduct the classes for two months.

Future Plans: At the present time we are considered as a Hunt Unit but since we have such a large membership, we feel

we should become a chapter. We are awaiting a visit from Mr. Stewart or his representative to discuss this matter.

Although we understand that there is a Red Cross ruling restricting production work in Relocation Centers, it is hoped that some action might be taken whereby those desiring to knit, roll bandages, etc. might be given the opportunity.

HI-Y CLUB

Organization: After several informal get-togethers of former Hi-Y members, a meeting of all those interested in an organization of this kind was called to meet with Mr. Everett Harding, Staff member of the Pacific Northwest Area Council YMCA (831 S.W. 6th Ave., Portland, Oregon) on January 31, 1943 with over 30 boys responding. The first official meeting was called on February 10, with Sam Okazaki assuming the organizational responsibility.

Leadership: The following officers were elected to direct the activities of the 25 members of this group:

Ray Fukutomi, President

Kiyo Yamamoto, Vice-President

Ace Hiromura, Recording Secretary

Bob Imai, Corresponding Secretary

Frank Murematsu, Treasurer

Shig Sakamoto, Sergeant-at-Arms

Johnny Uno, Historian

Mineo Inuzuka, Representative to Student Council

Tsuguo Ikeda and Mineo Inuzuka were elected president and vice-president, respectively, to replace Ray and Kiyo who left to outside employment. The clubs meet in the church library, 23-5-D. As you know, no advisor has been elected.

Activities: They Hi-Y assumed responsibility for the Jr. Red Cross drive held in the two elementary schools and the high schools on March 17 and 18, in conjunction with a camp-wide drive. \$158.57 was collected.

On April 9, the boys ushered at the three meetings held by Dr. Kirby Page, internationally-known evangelist, author and lecturer.

On April 22, for the exchange assembly with Twin Falls High School, and on April 23, for the Good Friday Service, the boys arranged chairs and ushered.

On Easter Sunday the boys ushered at the Sunrise Service and the morning worship service in Rec. Hall 34.

YOUNG WOMEN'S CHRISTIAN ASSOCIATION

Organization: The first organizational meeting was called September 19th with about 30 present. An advisory committee selected at that time, met the following week and elected a temporary board of six members. Mrs. Nobuko Suzuki, Mrs. Hana

Masuda, Frances Maeda, Ise Inuzuka, Jeanne Mori, Harue Okazaki.

Miss Esther Briesmeister, National Secretary for Relocation Centers, (1545 Tremont Place, Denver, Colorado) visited Hunt the week of November 2 to 7 to help with the organization of the following YWCA groups: Girl Reserves, Young Matrons, Business & Industrial Girls, College (mixed) and Co-Ed (mixed). At the present time, the Girl Reserves are our most active body.

Leadership: The Board coordinates the activities of the YWCA and is now composed of the following:

Mrs. Nobuko Suzuki, chairman

Ise Inuzuka, secretary

Esther Uchimura

Stell Yorozu

Mrs. Jerome T. Light

Mrs. Ellen Herndon

Helen Ammerman

Ruth Sakai

Alice Gwinn

Natsuko Yamaguchi

Shizuko Higano

The Board meets the 1st and 3rd Tuesday of each month in 23-10-A.

Rooms: The YWCA has taken over the teachers' Restroom in 23-10-A for their clubroom, with the understanding that other organizations, such as the Boy Scouts and Girl Scouts might share it. The room will be open from 1:00 to 5:00 PM weekdays and from 9:00 AM to noon Saturdays with Lucy Yoshioka, high school student, as an attendant.

SENIOR STAMP CLUB

Organization: A meeting of all those interested in stamp collecting was called January 23, 1943 with 11 present. A very enthusiastic group met and exchanged ideas and stamps. It was decided to call this group the Senior Stamp Club, and have sectional Junior Stamp Clubs for which they would act as supervisors.

Meeting: The club composed mostly of first generations, meets the second Saturday of each month in 23-12-AB.

Leadership: Mr. Kenji Kimura, Block 17 and Mr. Ryochi Sawaji, Block 1 co-chairman. Howard Suzuki, Block 24, secretary.

YMCA

There has not been a great deal of interest in this group, although it is hoped that some of the young adult men might assist in a boy's program. Mr. Everett Harding with offices in Portland (see Hi-Y report) may be contacted whenever assistance is needed.

HUNT DISTRICT, SNAKE RIVER AREA COUNCIL
BOY SCOUTS OF AMERICA

ORGANIZATION: The first meeting of the Leaders was called on Sept. 15 with 9 present. Troops were gradually organized through the combined efforts of the Scoutmasters and Club Leaders. Hunt District was officially organized on Dec. 11, 1942 when leaders met with Mr. Kendall E. Dayley, then Field Scout Executive.

LEADERSHIP: The Hunt District Board supervises the activities of the Scouts, and is composed of the following:

Mr. Harry L. Stafford, Mr. William L. Yeager, Mr. Geo. L. Townsend,
Members-at-large of the Snake River Area Council.

Mr. William L. Yeager, District Chairman
Mr. C.T. Takahashi, Vice-Chairman
Mr. George Sumida, Commissioner

Committees:

Mr. R.A. Pomeroy, Organization and Extension
Mr. Jerome T. Light, Leadership Training
Mr. George Tani, Health and Safety
Mr. Watson Asaba, Advancement
Mr. Frank Kinomoto, Finance
Mr. Tom Okazaki, Executive Secretary
No one has been selected for Camping and Activities

Much good work was done under the leadership of our former Commissioner, George Kakehashi, who left the project in March. Eighteen Scout leaders participated in a one-week training course led by Mr. C. R. Balmforth, Scout Executive of the Snake River Area Council (Bank and Trust Building, Twin Falls, Idaho) and Mr. Dayley.

TROOPS: Troop 119, Dr. Robert Higashida, Leader (4-2-A)
Richard Imai, Assistant (4-6-A)
Meetings held Sat., 7:00 p.m. in Rec. 2

Troop 121, George Abe, Leader (15-3-F)
Ken Yasuda, Assistant (26-4-B)
Meetings held Thur., 7:00 p.m. in Rec. 19

Troop 122, George Gojio, Leader (15-4-C)
Meetings held Fri., 7:00 p.m. in Rec. 26

Troop 123, Tom Okazaki, Leader (30-6-E)
Joe Shoji, Assistant (28-12-B)
Watson Asaba, Assistant (36-7-A)
Frank Kanatani, Assistant
Meetings held Tues., 7:00 p.m. in Rec. 36

Troop 125, George Fujinaka, Scoutmaster (34-1-A)
Meetings held Friday, 7:00 p.m. in Rec. 41

Explorers, Meetings held Thursday, 7:00 p.m. in homes

Cub Pack 122, without a leader. A Boy Scout is assisting temporarily. Meetings held Saturday, 1:30 p.m. in Rec. 26

Cub Pack 123, George Azumano, Cub master (29-4-A)
Akira Makino, Assistant (31-8-C)

The approximate total membership of the Scouts is 125.

Other Groups: Drum and Bugle Corps (20 members composed mostly of former Portland, Oregon Drum and Bugle Corps)

Joe Shoji, Bugle instructor

Sam Shoji, Drum instructor

Koji Sono, Drum Major

George Furusho, Bugle Major

Meetings held Sat., 2:30 p.m. in DH 23

Glee club of about 30 members

Meetings held Sat., 1:30 p.m. in DH 23

FINANCE: Scouts and Scouters pay annual dues of 50¢ and \$1.00, respectively. Individual troops are collecting dues at their discretion. The Sanke River Area Council has set a quota of \$500.00 that our District is supposed to meet, but we feel that it will not be possible to raise that sum. The District will give to the Council what it was raise.

OUTSTANDING ACTIVITIES:

	Attendance	Remarks
1. Hallowe'en Jamboree, Oct. 29	80	Mr. Dayley, guest of honor
2. Appearance of Drum & Bugle Corps in Twin Falls, 2/6/'43	29	Performed on streets and attend rally
Scoutmasters & Leaders	44	
3. 1st Court of Honor, 2/12/'43	225	50 Scouts and leaders from Twin Falls, visitors. Ranks and merit badges awarded.
4. 2nd Court of Honor, 4/14/'43	200	2 awarded Eagle Rank Visitors from Twin Falls
5. Appearance of Drum & Bugle Corps in Twin Falls April 27, 1943	50	Played at Court of Honor

6. The Drum & Bugle Corps has also played at various gatherings within the project such as at the departure of the volunteers, the Flag Dedication Ceremony, Etc.

FUTURE PLANS: Another Court of Honor is being planned for the middle of May, when three boys will be ready for the Star Rank, and two for Life Rank. When the farming season comes, it may be necessary to temporarily discontinue. It is hoped that in the near future a strong cubbing program can be underway. There is evident interest among the young boys of 9 to 11, but it will be necessary to train Cub leaders. Would suggest that a training course be set up for potential leaders, since the cubbing program is entirely different from that of scouting. Joe Shoji is assuming responsibility for cubbing.

MODEL PLANE CLUB (SAGEBRUSH CLIPPERS)

Organization: At the first meeting of the Club, 30 boys ranging in age from 12 to 18 responded. Plans were made for activities in the sections with the aid of key men. During the summer months, activity declined as the boys went out for farm work, although the building of gas and rubber models continued. On February 26, a reorganizational meeting was held at which time the Sagebrush Clippers were officially organized with an approximate membership of 50 boys. In the workroom in Rec. 31 under the supervision of Roy Morihiro the boys are able to work on their rubber and gas models.

Meetings: The Sagebrush Clippers in the upper section meet two Fridays a month at 7:00 PM in Rec. 28 and in the lower section, two Fridays a month in Rec. 10.

Leadership: Roy Morihiro is the advisor to both clubs and has given much of his personal material to enthusiasts.

Activities: On March 20, 1943 a Model Plan Contest was held on Field 21 with gas and rubber models which were entered. Over 50 boys participated. Roy and some of his helpers have held numerous U-Control exhibitions.

Future Plans: At some future date, it is hoped that we might compete with groups from nearby towns.

USO

A group of girls known as the Serviceers had as one of their projects, service to soldiers home on furlough. However, most of their membership has relocated and the group has disbanded. (The Parent-Soldier group organized here recently with plans for the welfare of the soldiers and their families.)

DRAMA CLUB

ORGANIZATION: The first meeting of the Drama group was held Oct. 28 with 25 responding. Mr. Robert Coombs of the high school faculty and Miss Thelma Hecht, experienced in the field of dramatic art, presented the possibilities of a Drama Group here. Meetings were held weekly under the guidance of Mr. Coombs, but due to inclement weather and gradual lack of interest, they were cancelled.

ACTIVITIES: Through the work of Mrs. Lulu Kashiwage, her puppeteers and Mr. Coombs' Drama group, four successful performances of a Christmas puppet play written by Mr. Coombs were held for the elementary children in Rec. 8 and Rec. 34.

SENRYU KAI

(17 word poetry writing club)

ORGANIZATION: The first meeting of this group was held Nov. 7, 1942. The group has an approximate membership of about 35 members. They meet twice a month to write poetry and to discuss the merits of their writing.

MEMBERSHIP: The majority of the members are not citizens, and are of the adult and older adult age group.

TANKA KAI

(31 word poetry writing club)

ORGANIZATION: The first meeting of this group was held Jan. 5, 1943. The group has an approximate membership of about 40 members. They meet the first Tuesday of each month in Rec. Hall 19, with writers of other types of Japanese poetry invited.

SHOGI, KARUTA AND GO

Enthusiasts of these games usually arrange for their own tournaments. Individual and sectional games are constantly being held. Mr. Chujo (10-) has been taking the initiative for the Shogi group, and Mr. Hashiguchi (21-) has been doing much of the contacting for the Go groups.

BLOCK CLUBS

Approximately half the blocks on the project have organized Young People's Clubs to promote activity in their blocks and to cooperate with the Community Activities program. A representatives' meeting was held on April 20, 1943, at which time future plans were discussed. It is felt that more and more recreational leadership must come out of the blocks.
