

May 28, 1942

Mrs. Dorothy S. Thomas
338 Giannini Hall

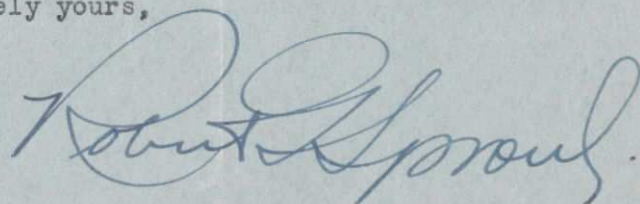

Dear Dr. Thomas:

I have approved a grant from funds available to the Institute of Social Sciences for the year 1941-42 in the sum of \$350.00 as additional support of the following project: An Analysis of the Mechanism of Enforced Migration of Enemy Aliens and their Families in California, Project No. 47.

This grant is to be employed for the following purposes: Assistance, field, expenses, and supplies, \$350.00.

All bills and requisitions are to be sent to the Dean of the Graduate Division, as chairman of the Executive Committee of the Institute of Social Sciences, for approval before forwarding to the Comptroller's Office.

Sincerely yours,

A handwritten signature in blue ink, reading "Robert L. Sprout". The signature is written in a cursive, flowing style with a large initial "R".

350/60

COUNCIL OF THE INSTITUTE OF SOCIAL SCIENCES

Minutes, February 18, 1942

A meeting of the Council of the Institute of Social Sciences was held at 12:45 o'clock Wednesday, February 18, 1942 in the Directors' Room of the Faculty Club. Present: Professor Ellis, vice-chairman, presiding, Professors Aikin, Armstrong, Davis, Dennes, Hildebrand, Huntington, Jones, Kerner, Lipman, May, and Thomas.

Minutes: The minutes of the previous meeting were read. The Council voted, after presentation of a request by Professor Kerner, to expunge from the minutes of August 7, 1941 the following reference: "A letter from Professor Kerner was read (a copy of which is appended to these minutes) requesting assistance in subsidizing the publication of his monograph, 'The Urge to the Sea: The Course of Russian History.' It was felt that there was not a sufficiently strong argument for the present group to approve a subsidy for publication at this time. It was moved, therefore, that the matter be postponed until the next meeting. This motion was carried."

Report of the Projects Committee: Professor Aikin reported for the Projects Committee on several matters presented to it at two recent meetings. This report included the following recommendations:

1. That a request from Professor Bolton for \$100.00 be referred to the Committee on Research for action.
2. That a grant of \$50.00 be made to Dr. Nisbet in support of a project entitled "The French Revolution and its Influence upon Social Disorganization."
3. That a grant of \$150.00 be made to Dr. Munk in support of a project entitled "The Effect of Totalitarian Economy."
4. That a grant of \$350.00 be made to Dr. Thomas in support of a project entitled "The Mechanism of Enforced Migration of Enemy Aliens and their Families in California."

After discussion of these recommendations it was moved, seconded and carried that the report of the Projects Committee be approved. (For details of the recommendations see copies of the minutes of the committee's action which are appended to these minutes.)

Report of the Executive Committee: Dean Lipman presented a report on behalf of the Executive Committee to the effect that a project on population study proposed by Dr. Thomas and Dr. Bedit was referred to the Social Science Research Council for a preliminary decision on whether or not that organization would support the project. The Social Science Research Council, however, found it impossible at this juncture to take action on the project.

Report of the Committee on Research in National Defense and Postwar Reconstruction Problems: Professor May, chairman of the Committee on Defense and Postwar Reconstruction Problems, presented a report on behalf of his committee, a copy of which is appended to these minutes. During discussion of this report it was pointed out that this committee has looked upon itself as a survey committee and has not attempted to weigh the merits of the various research projects submitted to it. After considerable discussion of the report it was decided to act on its recommendations seriatim. The following action was taken:

1. The first recommendation, which deals with the phrasing of the President's letter and which recommends that this letter be interpreted to mean that projects may be included which emphasize California aspects of problems which are a part of a larger national picture, was approved.

2. The first item of the second recommendation of the committee was approved, namely, the proposal to enlarge the scope of the survey to include studies dealing with international relations, in which case there should be added to the membership of the committee persons whose interest lies primarily in the field of international relations.

3. The third recommendation of the committee, which deals with coordinating centers for research activities, was approved.

In so far as recommendations 4 and 5 are concerned, The Council took the following action: It was moved that the Council recommend to the President the continuance of this committee with functions as indicated along the general lines of the report of this committee. This motion was approved.

Professor May was instructed to circulate copies of his report to the members of the Council of the Institute of Social Sciences. The report as adopted by the Council is to be reported to the President with a request for further instructions.

Dean Lipman suggested that the Projects submitted to Professor May's committee be now submitted to the Projects Committee of the Institute for study as to whether or not they are relevant and valid projects and as to what should be done with them. The Projects Committee was instructed to do this and report at the next meeting of the Council. In this connection Professor Davis suggested that a substitute for Professor Knight be appointed on the Projects Committee so that the field of economics may be represented on that committee.

There being no further business the meeting was adjourned.

Respectfully submitted,

Florence M. Mullins
For Professor Ellis, Vice-Chairman

COUNCIL OF THE INSTITUTE OF SOCIAL SCIENCES

Minutes, May 15, 1942

A meeting of the Council of the Institute of Social Sciences was held at 12:15 o'clock Friday, May 15th, 1942 in the Stringham Room of the Faculty Club. Present: Professor Ellis, Vice-Chairman, presiding, Professors Aikin, Armstrong, Davis, Dennes, Huntington, Jones, Kerner, Lipman, and Thomas.

Minutes: The minutes of the last meeting were not read, inasmuch as they had previously been sent to all members of the Council. These minutes were approved.

Projects Committee Report: Professor Aikin presented the report of the Projects Committee respecting a number of projects which had originally been prepared for a committee of which Professor S. C. May was chairman and which included projects dealing with defense and post-war reconstruction in California. The report of the Projects Committee in amended form (see appendix to these minutes) was approved with the exception of the project presented by Professor Condliffe, on which action was taken as follows:

The Council took the view that since the Condliffe project was suggested as a joint study to be carried on under the direction of the Bureau of Business and Economic Research and himself, as director of the project, it should first be submitted to that body. It was moved, seconded, and carried, therefore, that the Condliffe project be first submitted to the Executive Committee of the Bureau of Business and Economic Research for its action, the results of this action to be communicated by telephone to the members of the Council for their vote on the matter on the basis of the discussion in the present meeting.

Library on War Economics: Professor Ellis reported on the status of the project suggested some time ago by Dr. Hallgarten for the collection of a library on war economics (see minutes of April 3, 1941 and June 27, 1941), stating that replies from the several libraries to which Professor Kerner had written concerning this matter indicated that no library was making a special collection of such materials, although all of the libraries stated that they were gathering such material in this field as became available to them. It was proposed by Professor Kerner, in view of the changed conditions since the proposal was made, that no action be taken on the matter at this time but that it be laid on the table to be taken up at some later date if conditions warrant it.

without prejudice

There being no further business the meeting was adjourned.

Respectfully submitted,

Florence M. Mullins
For Professor Ellis, Vice-Chairman

FMH

PROJECTS COMMITTEE MINUTES

Tuesday, April 21, 1942

A meeting of the Projects Committee of the Institute of Social Sciences was held at 12:15 o'clock Tuesday, April 21, 1942 at the Faculty Club. Present: Professor Aikin, presiding, Professors Davis, Ellis, Jones, Lipman, and Thomas.

A list of projects dealing with post-war and reconstruction problems originally presented to Professor May's committee and now referred to the Projects Committee for action and recommendation was taken up *seriatim* with action as follows:

Coles, Jessie V.	A study of families of workers engaged in war industries in the Bay region from the standpoint of adjustments to war and post-war problems	\$2500.00
------------------	--	-----------

It was the feeling of the committee that this is an excellent project, but that since the Bureau of Labor is now carrying on a similar project it is inadvisable for Dr. Coles to attempt such a project at this time.

Condliffe, J. B.	Educational reconstruction in California (Cooperative problem with Bureau of Business and Economic Research and Department of Education)	5000.00
------------------	---	---------

It was moved, seconded, and carried that Dr. Condliffe's project be recommended by the Institute of Social Sciences to the President for endorsement by the University in applying for funds from one of the foundations. It was the feeling of the committee, however, that in case such an application for funds should fail, the University itself should not feel committed to support the project.

French, R. S.	Educational and vocational rehabilitation of blinded and deafened due to war causes	4300.00
---------------	---	---------

It was the feeling of the committee that local facilities are not such as to make it possible to carry on this project at this time.

Weeks, David	Research needed as a basic guide in making recommendations for public works, particularly with respect to such undertakings as the Central Valley, Columbia Basin, and Colorado River projects.	750.00
--------------	---	--------

It was felt that Professor Weeks' project was too broad in scope to be undertaken by any one person. It was suggested that the project should be referred to the staff of the Giannini Foundation and, if it was thought worthy, should be set up as a cooperative project of the Giannini Foundation rather than as an individual project.

May 15 1942

Wantrup, S. v. C. Professor Wantrup has not applied for a grant because he is uncertain as to whether or not he will be able to carry on his research, since he may be evacuated, but he has indicated his desire to apply if he is able to do so. The Projects Committee decided to report to the President its favorable attitude toward Professor Wantrup's project, but noted that the matter should be considered pending until a definite application is received from Professor Wantrup.

Sanford, R. H. Study of the mentality and character of certain nationalities and of common stereotypes pertaining to them, with special attention to those well represented in California, i.e., Japanese, Chinese, Portuguese, Mexican, Italians, Finns. \$2100.00

It was felt that this is not a good time for Professor Sanford to undertake such a project. It was suggested that the project might be taken up after the war when it would be possible for him to secure a staff to assist him and to devise techniques for carrying it out.

Siemens, C. H. Development of a technique for forecasting academic success of engineering and law students in the University of California. 675.00

The Projects Committee felt that this project has nothing to do with the war effort. It was suggested that Mr. Siemens might make application elsewhere where the request could be considered.

Two requests for additional support during the current year of projects which are now being financed by the Institute of Social Sciences were presented and action taken as follows:

Sluiter, Engel Research trip to Mexico to find archival materials on Dutch seventeenth century activity in the Caribbean 375.00

This request was approved for \$200.00 for transportation.

Thomas, Dorothy Mechanism and Consequences of Evacuation Program 350.00

This application was approved for \$350.00.

There being no further business the meeting was adjourned.

Respectfully submitted,

Florence M. Mullins,
For Professor Alkin, Chairman

June 23, 1942

Dean C. B. Lipman
Graduate Division
Campus

Dear Dean Lipman:

I am enclosing an application for an additional grant of \$1,638.90 on Project 47, Institute of Social Sciences. Up to the present, I have received \$700.00 from the Institute in two grants of \$350.00 each. As you will remember, these former grants were requested in order to enable Professors Aikin, Chernin, Kidner, Lowie and myself to begin collecting data on the enforced mass migration of the Japanese from the West Coast.

Financial assistance for this project was sought from the Rockefeller Foundation to the extent of \$45,000. on President Sproul's advice. The original memorandum to the Rockefeller Foundation is herewith attached. (exhibit A) After many negotiations the Foundation agreed to give us an exploratory grant of \$7,500. to be limited largely to the socio-anthropological aspects of the problem. The revised request to the Rockefeller Foundation, on the basis of which this grant was made, is also attached. (exhibit B)

As you will see, it is our considered opinion that a thorough exploration of even this segment of the study would require a budget in excess of \$7,500. And we are further convinced that complete separation of the sociological from the economic and political aspects is both inadvisable and impractical.

We are thus greatly hampered by the limited funds available through the Rockefeller grant, since a field study of this sort requires the participation of paid assistants. These assistants must include not only Japanese evacuees but also trained caucasian observers to check and supplement the data supplied by the evacuees. Furthermore, considerable travelling on the part of the senior staff and the Caucasian assistants is essential if the study is to be done properly.

I am enclosing also our payroll schedule for the Rockefeller budget which shows what a narrow margin we are operating on. (exhibit C) You will note that we have appointed most of our assistants for a period of less than one year. It will certainly be necessary to have a continuation of the record taking beyond these short periods if we are really to follow the effects of the evacuation movement. Our request to the Institute, therefore, is, in the first place, for \$938.90 to enable us to extend the appointments of the following people (or other equally qualified persons) to a full year:

1) Haruo Najima, six months,	Total	\$125.00
2) Earle Yusa ten months		208.30
3) Fred Hoshiyama ten months		208.30
4) Charles Kikuchi Ten months		208.30
5) Mari Okazaki six months		195.00

June 23, 1942

The total for the extension of time for field workers is \$938.90. The low amount paid to these workers is in the nature of an honorarium rather than a salary. It is no indication whatsoever of lack of research qualifications. Their education, their experience, and their level of intelligence compare favorably with those of our Caucasian assistants. They are all university or college social science graduates of demonstrated ability as careful observers.

In the second place \$500.00 requested from the Institute for travelling would be allocated to Mr. Grodzins and Mr. Spencer, our Caucasian research assistants. They would, of course, also be able to use a limited amount of the Rockefeller balance for this purpose, but without additional funds, their travelling and therefore their usefulness to the study will be unduly restricted.

Finally, we request \$200. for occasional stenographic assistance. In this connection, it should be pointed out that the Giannini Foundation has generously agreed to allocate \$3,250 to our study. This is all that we can hope for from them and it is earmarked for the following expenditures:

One Caucasian Research Assistant, Virginia G. Tauchar part time \$900.00; travelling for this assistant, \$200.00; travelling for myself \$600.00; stenography \$750.00; Statistical assistance \$600.00; supplies \$200.00. The sum requested from the Institute for stenographic help is necessary because of the occasional work that must be done off the campus and because of emergencies that are encountered from time to time.

As to the progress of the work under Project 47: We were able to initiate exploratory field studies in Tanforan, Puyallup, Tulare and Santa Anita assembly centers, employing Mr. Shibutani, Mr. Najima, Mr. Sakoda and Miss Tschuiyama on a part-time basis, and receiving the cooperation of Mr. Miyamoto who holds a Social Science Research Fellowship. We were also able to employ two Caucasian assistants on a part-time basis, namely Mrs. Virginia G. Tauchar and Mr. Morton Grodzins. Mrs. Tauchar, Mr. Grodzins and myself made weekly visits to Tanforan to consult with and instruct our observers. Instructions to the others were given by letter. We have received over 500 pages of field notes from these several observers. On the basis of these notes, supplemented by various checks, reports on the assembly centers are now being prepared.

Start → [The organization of the Tanforan report will indicate our procedure: Three observers at Tanforan prepared a report on their first month in the assembly center, from the day of evacuation to the day they were sent to Tule Lake. The report was organized under three main headings: Administrative Organization, Social Organization, and Social Maladjustments. Under the first of these topics are included analyses of policing, housing and mess division, maintenance division, service divisions of various sorts, the economic system, and rules and regulations. Under the second are included analyses of the

(Social Organization)

Double
page

Ita
I want
I

June 23, 1942

following basic social institutions: economic institutions - spending money, working, beginnings of private enterprise, substitutes for the money economy, etc.; the family - marriage, courtship, parent-child relationships; religion - organizations, rituals; recreation - daily routines, spontaneous groups; political groups - self government, internal intrigues, types of leadership, relations with administration, ~~and~~ education ~~and~~ social stratification. Also included in the study of social organization are analyses of specific social groups, relationships between factions, accommodation to the Caucasians, Issei-Nisei relationships, specific events and crises. Under the third heading, that is, Social Maladjustments, are included conflicts between parents and children, the problems of the unmarried men, sex difficulties, theft and other forms of delinquency, destitution, and personality maladjustments. 7

social stratification
End
This basic report was criticized by Thomas and Lowie and specific questions were directed to the writers. A group of five evacuees was then trained to follow up with continuing observations, each of them being assigned a particular topic and, in addition, keeping a diary record of the course of his own daily life. Thomas, Grodzins, and Tauchar hold a weekly seminar with these five assistants.

In addition to these formal reports, we are in constant correspondence with Nisei at various centers, and receive as many as twenty letters a week from them. We have also had access to confidential diaries from several of them. These are being used to supplement the formal reports.

Support from Project 47 has also enabled Aikin, Chernin, Kidner and assistants to begin an intensive analysis of the economic and political situations preceding evacuation. We have been given access to the files of many of the pressure groups, both those operating to bring about the evacuation and those proposing alternative procedures.

As the new fiscal year is about to begin, we find ourselves in a situation highly favorable to continuing our project in the relocation area. We are the only group of research workers who have received permission from the War Relocation Authority to study the evacuation. The attached letter to Mr. Coverley, the telegram from Mr. Eisenhower to the Rockefeller Foundation, the letter of Mr. Fryer to Captain Astrup, and the interoffice communication from Mr. Shirrell to Mr. Fryer indicate the unusual nature and extent of this cooperation. (exhibit D) We are planning to use Tule Lake as our chief locale and to send our Caucasian workers there to supplement the records taken by our Nisei observers. We are planning, also, to make spot observations at other relocation centers, in order to obtain comparable data on certain aspects of the problem.

Our application to the Institute, therefore, is for additional aid to a study well under way. The two grants already received were invaluable in enabling us to begin our research work on this project. Indeed, it might have been impossible to have begun the work at all if those sums had not been

Dean C. B. Lipman - 4

made available. Similarly, the sum now requested, small as it is, will be of inestimable aid in carrying on the work in the way it must be done, if we are really to demonstrate the full possibilities of this important field for research.

Very sincerely yours,

Dorothy S. Thomas, Professor
of Rural Sociology

September 28, 1942

Dr. Dorothy S. Thomas
338 Giannini Hall

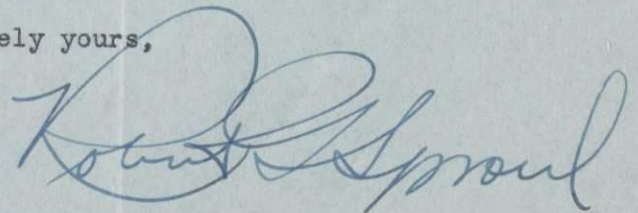

Dear Dr. Thomas:

I have approved a grant from General University Funds available to the Institute of Social Sciences for the year 1942-43 in the sum of \$1000.00 in support of the following project: Japanese Evacuation Study, Project No. 47.

This grant is to be employed for the following purposes: travel and field expenses, \$500.00; salaried assistance, \$500.00.

All bills and requisitions are to be sent to the Dean of the Graduate Division, as chairman of the Executive Committee of the Institute of Social Sciences, for approval before forwarding to the Comptroller's Office. All materials and apparatus purchased under this grant become the property of the University.

Sincerely yours,

A handwritten signature in blue ink, reading "Robert S. Sproul". The signature is fluid and cursive, with the first name "Robert" and last name "Sproul" clearly legible.

PROJECTS COMMITTEE

Minutes, September 10, 1942

A meeting of the Projects Committee of the Institute of Social Sciences was held at 1:00 o'clock Thursday, September 10, 1942, in the Directors' Room of the Faculty Club. Present: Professor Ellis, presiding, Professors Davis, Dennes, Hildebrand, Paxson, Sauer, and Wellman. Dean Lipman was in attendance as Chairman of the Executive Committee.

Applications for grants in support of research projects for the coming academic year were taken up by the committee. Professor Ellis made suggestions of a general policy which might guide the committee in making its decisions, as follows: (1) that applications for small grants, if considered worthy, might be granted in their entirety; (2) that applications for very large sums should be subjected to considerable scrutiny; and (3) that applications submitted by a recognized group might be considered with the assumption that the group is able to carry on the work it proposes.

Dean Lipman reported that he had asked the President for an additional grant of money for the support of the Institute of Social Sciences and that the President had replied that he would not now take up the matter, but that if there were projects that were especially good which cannot now be supported he would be willing to attempt to find more money later if the Council so recommended.

Consideration of the applications for grants was taken up in the following order:

No.	Applicant	Name of Project	Amount Requested	Amount Recommended
43	Bain, J. S.	Investigation of Economic Effects of Non-Price Competition	\$ 50.00	\$ 50.00
--	Kidner, F. L.	A Study of the Development of California Manufacturing	200.00	200.00
46	Nisbet, R. A.	The French Revolution and its Influence upon Social Disorganization	35.00	35.00

Action: It was voted by the committee that the above requests be granted.

7	Kerner, R. J.	Northeastern Asia Seminar (Russian Eastward Expansion)	525.00	525.00
---	---------------	--	--------	--------

Action: The committee voted that this application be approved for \$525.00.

5	Harper, L. A.	A Study of Economic Planning in Mercantile England and Colonial America	600.00	600.00
---	---------------	---	--------	--------

Action: The committee voted that this application be approved for \$600.00.

1600-60

Sept 10 1942

18a Hodgen, M. T. Study of Social Change and Periods of Achievement 1200.00 1300.00

Action: It was the feeling of the committee that since Miss Hodgen's project seems of lesser urgency than others, and since it is the policy of the Institute of Social Sciences not to make grants for employing full- or half-time research assistants except in unusual cases, support should be continued as given last year rather than with the increase requested. The committee voted, therefore, to recommend approval of a grant of \$800.00.

18 Teggart, J. F. Conditions of Periods of Cultural Achievement. 1500.00 800.00

Action: The committee felt that there was no reason at this time for an increase in the amount of support to be given to Professor Teggart's project, but that it should be supported as it was last year. The committee voted, therefore, to recommend approval of a grant of \$800.00.

30 Palm, F. C. A Study of the Background of the Present War 1200.00 ---

Action: After discussion of the project the committee voted not to recommend approval of the grant on the ground that there is no evidence that this is a work of original investigation, and that the project seems to be on too great a scale to be advanced very far on one year's appropriation.

47 Thomas, D. S. Japanese Evacuation Study 1638.90 1000.00

Action: After a discussion of this project and the support already promised to Mrs. Thomas by the Columbia Foundation and the Rockefeller Foundation, contingent on the University's support of the project, it was voted to recommend approval of a grant of \$1000.00 to Mrs. Thomas. It was understood that this would aid the President in making whatever grant he may be committed to on this project.

19 Heller Committee for Research in Social Economics 2500.00 800.00

Action: Professor Davis reported that the Committee on Research has already made a grant of \$1200.00 in support of this project. It was the general feeling of the committee that this was not the time to increase the budget of the Heller Committee. It was voted, therefore, that a grant of \$800.00 be recommended which will continue the support on the same basis as last year. Professor Ellis was recorded as objecting to this action since he believes that an increase in the grant over last year is fully justified.

In taking the above action the Projects Committee deemed it wise to suggest that the Institute of Social Sciences does not seem to be an appropriate source of support for the Heller Committee. It was the sense of the committee that that type of organization should be supported perhaps as a regular budgetary item in the University budget, and that the Heller Committee should therefore approach the President on this matter for any additional funds.

Other business: It was suggested by Professor Sauer that a small balance remain unallocated as a contingency fund from which small allocations for emergencies might be made during the year at the discretion of the Chairman of the Executive Committee and the Chairman of the Projects Committee. It was voted that \$500.00 be set aside to take care of such small requests, no allocation to exceed \$50.00 for any request.

Dean Lipman read a letter from Professor Morris requesting \$30.00 to aid in the publication of an article that he has prepared on "Magnates and Community of the Realm in Parliament, 1264-1327." This paper has been accepted for publication in a series to be brought out by Professor S. Harrison Thomsen of the University of Colorado, which will include research studies of mediaevalists and Renaissance scholars. Since it has been the policy of the Institute not to use its publication fund except to aid in the publication of research supported by the Institute, the committee did not feel that it could make such a grant to Professor Morris from the publication fund. It was suggested that the Council be asked to waive its usual procedure in order to make this small grant, or that perhaps the sum could be taken from the small emergency fund, or that the History Department itself might contribute this amount out of its budget. Professor Paxson stated that he will probably be able to take care of Professor Morris's problem from Department funds.

There being no further business, the meeting was adjourned.

Respectfully submitted,

Florence Mullins,
For Professor Ellis, Chairman

PROGRESS REPORT, May 10, 1944

The attached annual report, issued on July 1, 1943, describes the general structure of the Study. During the present year, work has proceeded according to the plans outlined in that report. Several monographs are now in first draft, e.g. one on the political situation preceding evacuation, another on the administrative procedures and policies developed in connection with evacuation and relocation, a third on the social history of the Tule Lake project prior to segregation, a fourth on resettlement in the Chicago area. The bulk of the material that has been and is still being collected, however, cannot be organized in final form until the Study can be brought to an end. It is anticipated that data collection stage of the Study will be brought to a conclusion as soon as the restrictions against the return of the evacuees to the Coast are removed.

The present set-up of the Study follows closely the plan in the Annual Report pp. 12-16, with two important changes: (1) Since the Annual Report was written, the process of segregating the "disloyal" from the "loyal" evacuees has taken place and Tule Lake has become the segregation center for the technically "disloyal" (repatriates, etc.). Among the "disloyal" is about one-third of the original Tule Lake population, i.e. some 5,000 persons. The greatest number (about 2,000) of "loyal" Tuleans was moved to the Minidoka Relocation Project in Idaho. Because of the sociological importance of following closely these two divergent groups, we have transferred our Caucasian anthropologist from Gila River to Tule Lake and our Nisei sociologist from Tule Lake to Minidoka. We are, therefore, discontinuing observations at the Gila River Project. (2) Because of the necessity of obtaining more complete data on the alien aspects of the culture in the Relocation Projects, we have added a highly competent Japanese alien social scientist to our regular staff. He is located at the Poston Project and is working in close collaboration with our Nisei anthropologist at this center.
