

Research Files: Doris Foley Library for Historical Research

Introduction:

This is an alphabetical-by-surname index to files of family surnames and other topics for which research has been done at the Foley Library. The material in each file is results of research performed by library staff in response to past inquiries. The papers are not family genealogies. They are references to resources in the Foley Library found as answers to patrons' questions. Included are references to obituaries, naturalizations, home or mine ownership, events, and much more.

PLEASE NOTE: in many cases, nothing was found in the collection for the individuals named. If an asterisk (*) follows a name or topic, it means a request was received **but nothing was found** in the collections.

To access information in one of these files:

- Visit the library
- Call during open hours with a simple inquiry. Our staff is all-volunteer and may have the time to do a quick check of the file to verify if the person named is potentially your ancestor.
- Email a request for research time and/or photocopies
