### **User Notes**

The folder names follow this pattern: RG1SER1BX1FOLD1

- RG=Record Group
- SER=Series
- BX= Box
- FOLD= Folder

The folders are generally in geographical order, but some variation may occur. The content and order of materials in the individual folders have not been changed from the CalTrans files. There may be gaps in the geographical coverage because not all files were received. For example, the “Final Report” folders for Santa Rosa say “(6 folders)” but only 5 were received with the original gift.

- “Final Reports” are typically the earliest files, dating mostly from the 1940s. These files often include appraisals (“right of way estimates”), maps, property owners index, photos and description of comparable properties.
- “Certificates of Completion” vary from the 1950s through the 1970s. They focus on a smaller number of parcels, sometimes only one or two. The files often include “Supplemental Appraisal Reports”, correspondence, legal documents regarding condemnation proceedings, comparables, property owners index, photos, maps, revised appraisals.
- “Supplemental Appraisal Reports” may include relevant economic information about the region as well as summaries of issues in the affected parcels.
- “Book” numbers refer to the file numbers CalTrans used to track completion of particular areas. Some documents will refer to correspondence or reports in other Book numbers. Use the search feature to find reference to specific Book numbers.
- “Parcel” numbers refer to internal CalTrans numbering system and are not linked to Sonoma County parcel numbers.
- “Comparable” numbers refer to internal CalTrans numbering system. Comparables are other properties on the market (or recently sold) that were used to determine pricing and valuation of appraisals. The same comparable may be used for several properties.
- “Notes” may include some direct quotes (in “ ”) from the appraisals or reports (“undesirable tenants”). Also included in this field on the inventory are observations based on the photos or notes. For example, if cars, people, gardens, businesses, advertising, etc., are in the photos, a notation may be included (“car, people ‘two stores are occupied by a macaroni factory’”). If the appraisals indicate the property is a rental, it is usually noted in this field.

Photos are included with most Right of Way Estimates (1940s) and Appraisals (1950s-1970s). If no photo was included, it is noted in the Notes field.

Owner and Address are noted if they are included in the file. In the files from the 1940s, Owner includes the names of husband and wife (“Nello and Emma Rossi”). Files from the 1960s and 70s include the husband’s name followed by “et ux” – and wife (“Charles De Meo et ux”).

A detailed inventory of the Santa Rosa files includes more specific information, including parcel numbers, addresses, owners, amount paid, notes, and information on digitized material.
